1.1 Sweet Cheater Version 4.5

SWEET CHEATER V4.5

This cheat list contains over 950 cheats, hints, and level codes for the Amiga and CD³2\$. The game titles with my name after them are the ones that I have found. I have put quite a bit of time into finding some of these cheats, so if you add any to your list all I ask is that you give me credit. If you upload the list to a bbs or include it on a compilation disk please do not remove or alter the header.

All the games with an asterick (*) in front of them have been verified. If the game has been verified and has more than one cheat, the cheat right after the game title is the one that has been verified, but in some cases all the cheats may work.

Some of the cheats may have changed throughout the list due to the fact that I have verified a lot of them and made corrections when needed. If a cheat didn't work before you may want to look at the cheat again, it may have been fixed. I try to verify as many as I can, but I don't have most of the games. I won't verify a cheat with an * unless I have personally tested it and found that the cheat works.

A new version will be uploaded to Aminet when I get over 50 new cheats.

If you know of any cheats, level codes, and hints that are not on the list or if there is an error on any please send mail to:

or send email to either address:

kkrellwi@nmu.edu
abaddon@longyear.acs.nmu.edu

If you send me a cheat that I don't have, and I will put your name after it and in the SOURCES section to give you credit for the cheat!

LASER SQUAD:

In laser squad, for fun do the assassins on level 1. Buy no armour, give the corporal an m4000 with two reloads, the next two rocket launchers with four rockets each, and the last two nothing at all. Deploy in the entrance, in the gap in the outer wall, and take the house to pieces with the rockets, waiting for droids or Regix to show up - get them with Jonlan's M4000. I managed to do the scenario with one shot - it went between the leaves of the door, blew up against a wall and Regix was on the other side. end of story, fade to black.

LEISURE SUIT LARRY:

Hold down 'ALT' and 'X' keys to get past proof of age. Hold down 'ALT' and 'D'. It will ask for a location number. Enter a number form 008-045 (must be a three digit number).

This solve didn't get all the points, but it finishes the game. my additions are in capitals.....(score 215 of 222)

The 1st step is to enter the bar, go to the bathroom and read the walls several times until you get the password. Then go to the sink and get the ring. you can (must!) use the toilet if you want. Go to the bar and buy a whiskey. Go to the drunk next to the bathroom wall and (kick him to wake him) give him the whiskey and he'll give you the remote control. Get the rose too. Go back into the bar and

knock on the big door.. when he asks you for the password.. tell him "KEN SENT ME", then enter. Turn on the T.V. with the remote. Keep changing channels until you find a channel he likes.. he'll move from the stairs. Climb up and voila! The prostitute: Don't hop into bed with her until you get the rubber. You just need the candy on the bench. Get it. go out the window, and go to the fire-escape ladder. You'll fall into a dumpster. Search it and get the hammer. Exit the dumpster and go left. Call a cab at the street.

Now go to the casino and go through the lobby. Get the card in the ashtray. Now gamble a bit until you have about 250 dollars. Go outside. Sometime in the game when outside the casino, a guy in a barrel will come up and ask you to buy an apple. Buy it. Call the cab.. tell him to go to the store. enter the store and buy a rubber. Also get the (magazine and) cheap wine in the back. (never enter the cab with the wine.. the cabbie will get drunk and kill you) pay for the wine and exit.. Wait for the russian looking guy to come from the left. (Ignore the dog) When he comes, give him the wine.. not money. (Look at phone dial number, answer the questions) Once you have the knife go right and show the pass to the bouncer at the disco door. Go in and sit down at the table with the lady. Smile and give her the ring, the candy, and the rose. Ask her to dance. When you finish off with the dancing ask her to marry you. She'll ask you for \$100. Give it to her and meet her at the marriage chapel. It's east of the casino front. Enter and go up to the front. Type "MARRY", and you'll get married. Go up to the honeymoon suite. (fourth floor, door with the heart, push four). Knock, and enter. She'll be on the bed, and {NOT IN THE MOOD!?!} Turn on the radio and listen to it. You'll get a number to call to get the wine delivered that she wants. Go to the casino and get some taxi fare money. Go to the phone in front of the store, (answer the phone if it rings) call the number and have them deliver it to the {HONEYMOON SUITE}. If they say it probably won't show up, you screwed up on the typing. Go back to the casino and go to the suite. Be sure that you have the knife. Enter and pour the wine. Things will take they're course and you'll find yourself tied to the bed. (THE BITCH!) Use the knife and free yourself. Get the rope and leave. Go to the casino again and using some saving, use the dollar and get about \$50. (go to cabaret. find a seat and sitdown. listen to act.) Once you have it, go to the bar and knock on the door again. Go up the stairs and screw her now that you have the rubber. Remove the rubber after you've used it. Go out the window and this time go to the right of the balcony. Tie the rope to yourself and tie it to the railing. Type "GO WINDOW" or (reach out) something so your hanging in front of the window on the right. Break the glass with the hammer. Get the pills. Pull on the rope and untie yourself. Go down the fire escape and call a cab again. Go to the casino and go to the eighth floor. Talk to the lady at the desk until the game tells you that you'll need some medicine or something. Give her the pills. She'll run off and leave the desk unguarded. Push the button and enter the open doors on the right. Enter and go up and right. When you're in the room with the bed, open the closet door. Enter it and type, "LOOK". Get the doll... (look at doll. inflate doll. look at doll. use doll.) then wait as you run after it. When you're near the hottub, (remove clothes) enter it. Look at the lady. smile, and give her the apple. Things will then run they're course, and voila!

LIBERATION:

To duplicate any item as many times as you want do the following:

First find a power point and stand in front of it. Then select any item from a droid's backpack and drop it on to the floor so that the name of it appears in the text window. Now pick up the same object and return it to the droid's backpack and engage the power point so the lightning bolts are touching you. Use the look right, look left command to move the view screen so that it is at an angle. Move the cursor to the bottom of the screen and hold down the right mouse button so that the cursor becomes a hand and left click, at which point an object should appear on the floor and you can drop as many objects as you wish. Look back to the normal view and when the power bolts stop you can pick up the objects that you dropped.

LOST PATROL:

Rest for 50 minutes and for no loss of food your strength is restored by a few points. This restores all of your remaining men to 99 percent. Keeping up your men's strength and morale is vital. Giving your men 50 minutes' rest a night, or during the day when it's too dark to array on, will slam your energy and morale levels to max. Even if you don't have much food, you don't have to worry, as your men will not eat it.

On reaching the first village (the first white cross on the map), search the area to find a hole in the ground where the villagers appear to be hiding. You then have two options: ENTER TUNNEL or USE GRENADES. Gomez is useful at this point, but if he is dead, go for the USE GRENADES option.

Start off questioning the villagers normally by asking them "Where VC?" Once you have an answer, start the hard questioning, or a

village boy will get hold of a gun and shoot one of your men.

Invulnerability against missiles: Whether you are skiing or driving a now-buggy, the moment you hear the missile being launched, stop immediately and begin to turn around. Keep turning on the spot. The missile will narrowly miss you then come back and keep pace alongside you for a while until it finally speeds off to clobber someone else not so smart.

Invulnerability against mortars: Watch for the bomber. It will always come over the horizon in front of you. If you are stopped, wait until it is approximately half way to you (otherwise it may be able to dodge your missile) then blast it. If you are moving fast blast it the moment it appears over the horizon. If the bomber does manage to drop mortars turn 90 degrees quickly and speed off.

*NAVY MOVES:

The access code for part 2 is-"786169"

PART 1: Move back slightly when you encounter a mine. They're much less sensitive from the rear. Avoid jetski bullets by jumping or ducking. When approaching sharks, move the up and down nut left and right. Octopi and sea monsters are easily thwarted by holding down fire until both missiles are ignited and then releasing. Struggle to dock with a submarine? Put a mini-sub in the gap between the tailfin and the hull, face the left of the screen and move upwards slowly, the computer takes over the docking procedure for you.

PART 2: The code is 948411.

Arrows indicate the direction of the lifts. Kill white marines and flamethrower troops to get more ammo. Stand over the body and search thoroughly. To get the code of an official, you must shoot him with a gun, not a flamethrower. To enter computer codes, stand by a terminal, push up and you'll be asked for a code. Two of the codes are: transmit message: 1st or 2nd transmission official open door: 1st or 2nd machine official to open the reactor door, use the terminal next to the reactor. The computer confirms the bomb is planted. Go out, use the same terminal you used to open the door and transmit the following: "OABERYAMD". Now type "END" at the ready prompt and run like hell to the conning tower.

*NEW ZEALAND STORY:

On the title screen, type "FLUFFYKIWIS" for unlimited lives. Press the 'HELP' key to skip levels.

On other versions pause the game, and press 'M'. You should hear a laser gun sound. Type "MOTHERFUCKENKIWIBASTARDS". Unlimited lives are yours.

Near the end of level 1-1 there are three large steps that you must climb to reach your brother (sister?), who is in a cage. Stand at the left edge of the top step, facing left and jump. But as you jump, fire. If your current weapon is arrows, fire halfway up, but if your weapon is bombs, fire at the top of your jump. A whirl-wind should appear after four hits, and it will take you to level 1-4.

On level 1-2 shoot the baddies and collect the blue E on the floor to the right. Now hop back to the point you started at and stand on the last two blocks on the left side of the second floor. Shoot towards the left wall while doing tiny hops, and the warp will appear. This will bring you to level 1-2 where there are 2 Extend Life Pills

On level 1-3 from the starting position there are 12 ledges and a wall to the right. Go to the other side of the wall and fire to the left towards the second ledge from the bottom. Ship required. This will bring you to level 2-1 near the end of the round.

In 1-4, you will be in a little box under some water. Go up and to the right, and you come out in a small room with three boxes on the right hand side. Go up these, and you will see 4 long spaces, the top one having an {N} and a {D} in it. Go up to the top one, get the letters, stand in the centre of the space, facing left, and fire. yep, you guessed it, another whirl-wind. This one takes you to level 2-4.

On level 2-1 above your kiwi friend is a small tunnel which takes you to some stair-like ledges leading to a small cavern where there are two fruits. Fire at the fruit on the right. Ship needed to reach tunnel. This brings you to level 3-4.

On level 2-2 find a balloon and float up to where the bears on balloons emerge. Stand to the right of the green left-pointing arrow and shoot the bears balloons away. Repeat this until the warp appears. This brings you to the end of level 2-2.

On level 2-2 there is a ledge with a green arrow pointing right. Jump up into the water. This takes you to level 2-2 halfway through the level.

On level 2-3 follow the first water you come to. At the end are two ledges with spikes below. Stand on one ledge and fire at the other. This takes you to level 2-3 takes you halfway through the level.

On level 2-4 , stand at the entrance to the room where the giant octopus is located and fire to the right several times. A warp will appear that will take you to the beginning of level 3-1.

On level 4-1 above the Extend Life Pills is a tunnel. Fire above the 2nd letter from the right. You must be on a duck ship for it to work. This brings you to level 4-2.

On level 4-4 below the kiwi to the left are some spikes. Stand on the left hand side of them and using small jumps fire to the right. This brings you to level 5-1.

When you reach the ice whale, move to the right-hand side of the spikes, avoid the crystals, and wait until he picks you up. Once inside the whale, you can start shooting, but avoid the ice drops.

Meeting the rock monster without bombs makes him difficult to pass. So collect bombs, go to the highest platform and shoot him. Kill it by either dodging the bullets and hitting it when the doors open, or by fireballs.

The last boss you encounter is the balloon seal. He cant be killed, by blows to the body, so you must hit the balloon. Be careful for the balloon seal is armed with a cannon and shoots cannon balls at Tiki.

This will give you twice as many enemies. Press 'F8', 'F7', 'F6', 'F5', 'F4', 'F3', 'F8' and then 'F1' three times (or 'F2' three times) ('F1' and 'F2' are for what player is to have the sight). This will give you the laser sight throughout the game. Also, type "EDOM TAEHC" on the high score table for infinite lives.

Usually you have to shoot equipment boxes to get the laser sight, but press 'F8' and fire at the same time on the title screen and you will start a 1 player game with laser sight. For 2 players press 'F2' instead of 'F8' on the title screen.

OVER THE NET:

First, choose a one set game, play the sea-cup and enter one team or two human players. When it's your turn to serve, move the non-serving player up to the top of the court close to the net. This will force one of the computer players to follow him. Now do a jump serve (push up and fire), then hit the ball to the other computer player by pushing right then down. The ball should drop between him and the net and he should miss the ball. Hopefully this plan should work. I don't know if it works with the other teams like Coco, Freaks etc but it works with the Rollers and the Golden Boys.

OVERLANDER:

JUST A FEW TIPS - When cruising the highway don't stop shooting, and always choose the highest paid mission. Buy fuel carefully, only enough fuel for that level, after level 1 you must buy a leanburner. Try to stay in the middle of the road and travel fast, travelling slowly only burns more fuel. Fire bombs are more useful than smart bombs when you learn how to use them. Bulletproofing is necessary after level 2. When travelling through the barriers the best speed is 90-120mph.

LEVEL 1:

1. Select counterfeit money.
2. Fuel up to 14 notches on the fuel guage.
3. Get turbo, 4 battering rams and two flare bombs.
4. After the first bikes slow down or the gunners will kill you.
5. Destroy trucks from as far away as possible.
6. Slow to 100-150 mph to negotioate barriers.
7. If you stay in the middle lane when you come to the wrecks you wont die.

LEVEL 2:

1. Select kidnapped official.
2. Fuel up to half full.
3. Buy leanburner, a few bullet proofs, rams, and flare bombs.
4. After first bikes there's a nasty surprise in the valley below.

LEVEL 3: DARKLANDS

1. Select plutonium.
2. Fuel up to half full (if you have leanburner - if you don't then fill up to the max.
3. Buy rams, bullet proofing, flare bombs and lives if you need them.
4. The toughest part of the course is early on, so don't be afraid to let loose with the flare bombs.

LEVEL 4: THE GUTTER RUN

1. Select illegal chemicals. fill up to max level.
2. Buy maximum rams, bullet proofs and as many lives as you can afford and flare and smart bomb depending on your bank balance.
3. The barriers are every where on this level and you will need to be at 90 - 100 mph to avoid them all. Try to save your rams for later in the level.
4. The alleys in 4 are real mean. Smartbombs and bullet proofing are your best chances of survival.

LEVEL 5: GRAVEYARD

1. Choose the president. Fill up to maximum fuel.
2. Buy everything \$40,000 up front plus whatever you had from the last level should be enough, lives should be on the top of your shopping list followed by rams, proofing, brakes, armour and weapons - don't bother with the wheelblades!
3. do the same as for the last level. Because your car's at maximum everything, this level shouldn't prove too difficult.

*PACLAND: (New cheat by K. Krellwitz)

During play hold down 'S', 'I', 'U', and press 'RIGHT ALT'. There should be a slight pause and the ghosts will reset to the starting position. This will give you infinite lives.

When the title screen appears, type "AVALON". The screen should flash. You should have unlimited lives. If that doesn't work, try the following:

Start a two player game. Make it as far as you can with player one. With player two, you must be able to make it as far as the fairy to collect your boots. Now that you have gotten your boots, you are going backwards to where you started. Push the third cactus on the way back, and a yellow pacman will appear. Get it, now kill player two. Continue playing with player one. Every time player one dies, get the yellow pacman with player two and kill player two immediately. As long as you keep getting the yellow pacman with player two, player one will never die.

HINTS:

LEVEL 1: Run to the third fire hydrant, and when you get there, jump over it and push it to the left. This will give you a blue hat that will make you

invulnerable to the little ghosts that fall from planes.

LEVEL 2: Run to the third cactus, and push it to the left. You will now be invulnerable for the entire level!

LEVEL 3: After getting your magic boots, push the third cactus on the way back for a free life.

-Jump on the roof of ghost's car to escape.

-Only use powerpills when ghosts are in range, or else it is wasted.

-When you reach the breaktime sign, jump when you are about 1 inch away, for a bonus (depending how high you are when the level ends)

POPULOUS:

On the title screen, type "KILLUSPAL" to warp to level 999.

Fill the landscape with the maximum of 200 people to force one of the three hidden monsters to appear.

First load the conquest game as usual, and click on the game setup icon. Then select custom game and go to game options, changing anything you like. Finally click on evil, then two players, and then cancel. The enemy will now be unable to alter the landscape, preventing him from making any progress.

POWERDROME:

Here are some tips on the various tracks:

Oval: The secret with this track is to use as much afterburner as possible, but without blowing up your engines. Keep your eye on the temperature gauge. This track is fairly wide, so switch the centering field OFF and pick up speed. Go around as fast as you can.

Antacorp: A difficult track. Turn the centering field up to four or five, which will put you in the middle of the course. When you go through the underground chicane, hold down the right shift key. This will take you through the vertical scanner without slowing down; then straighten.

Clortek: Shortly after the start line, you will encounter a trench. Don't waste your time flying through it; just go over it. When you reach the pressure gate, which is around half way, don't slow down. If you're going to crash into it then slow down. Hopefully this won't occur, but in this instance it's no use fighting the consequences. When you come out of the exit, switch the afterburners on. Go for speed on this next stretch.

Otyaka: It's main section's underground, very dark and at first quite difficult. The track careers from left to right so turn the centering on at around level five. Once you emerge into the open, you'll come across a nasty right hand hairpin, so hold down the centering key again. This section takes some practice.

Banzal: So named because it really is the hardest track. Crank the centering up as much as possible but reduce it down to six if feasible and necessary. You'll encounter the same kind of underground dip as on the Otyaka course, so use the same tactics. If you get through this you are GOOD.

Apocalypt: This section has an alarmingly tight hairpin situated three corners from the start. Take it using centring mode. While underground you will go through a loop de loop. You get through this using gentle movements of the mouse, with centring set around six. This should see you right.

Estoria: Back into sunny climes and a fairly wide track. Bomb around the course with a low centring setting or none at all.

From the starting point there are three exits: north, east, and west. Go east and destroy the first box, return to the starting point, and go north to destroy the second box. ***RAINBOW ISLANDS:**

Collecting all of the gems in the correct order of color (from left to right on the gem counter - RED, ORANGE, YELLOW, GREEN, LIGHT BLUE, DARK BLUE, and MAUVE) not only awards you the life and Bonus Gem, it also grants you access to a magical secret room. When you reach the end of the level, a silver door appears. You don't have to fight the Boss.

On the fifth island you'll find a box in the secret room which you should collect. There's also a gate with a '7' on it, leading to island 7.

Even more useful is how to create any color gem. The screen is split into several invisible vertical stripes of color. When a gem falls, its color is determined by the 'color' of the area into which it fell. Now all you have to do is gauge carefully where the dead enemy will fall to create the gem color of your choice.

Type one of the following on the title screen, while the rainbow is cycling through colors:

"BLRBJSBJ" _____ Permanent fast shoes.
 "RJSBJSBR" _____ Permanent double rainbows.
 "SSSLLRRS" _____ Permanent fast rainbows.
 "BJBJBJRS" _____ Hint a.
 "LJLSLBLS" _____ Hint b.
 "LBSJRLJL" _____ Continue after island five.
 "RRLBBS" _____ All hidden food becomes money bags.
 "RRRSBSJ" _____ Does both of the previous two.

Find a car you want, but cant afford. Now, leave the game. Find the name of the car you want and .txt, so if you wanted an Escort, you would find Escort.txt. Now use a text editor (I use TXED) and find a number (at the beginning). It should look something like 00000012345. Now, replace the places where the 12345 # is and put 0s in there place. Now just leave a trailing 1. Now the car will cost all of \$10. This is not only a way to get the car you want, but makes it cheaper to just buy a new car each time instead of refueling/fixing dammage.

SENSIBLE SOCCER:

To score off a corner every time, kick the ball towards the goalie. When a forward gets hold of it, kick it across the goal mouth and use after-touch to bend it into the net. The computer never quite manages to work out what is going on until it is too late. When your match appears next on the fixtures screen, for example England (You) v Germany (The Opposition), instead of choosing next match, click on Exit. Now choose friendly from the main menu and choose Germany as your team. Go to the Team/Formations Screen and get all the German star players on the bench, put the forward in goal, and generally mess about with the original team selection. Now start to play the game, but escape from it as soon as it begins. Return to the League/Cup games and View Opposition (Germany). Your opponents team will still be mucked up. Using this cheat you should be able to win every match.

This cheat will allow you to play the game in slow motion (aka Kick Off 2). What you have to do is play a match and then make a substitution. Then when the player is walking off, press the 'ESC' key and you will quit the game. Start another match and you should notice that everything plays at slow speed, even the timer! To return to normal, make another substitution, but let it carry through.

SHOCKWAVE:

A few hints and tips follow on how each of the four zones (armys, factorys, mines and rigs) effect the game:

MINES - Each time a mine is purchased the income you receive for each time pass doubles.

FACTORYS - The more factorys you have the faster more weapons are produced, these are essential.

RIGS - These supply you with the fuel for each mission run. The more rigs you have the greater the amount of fuel you receive for each time pass.

ARMYS - For every army unit you own, the enemy slows down. You have one army unit, for each four time passes that occur the enemy won't move for one time pass. If more than 50% of the sector is occupied by the enemy then you will lose one of your assests for each time pass that occurs. The best solution is when 30% of the sector is occupied go an attack the enemy.

SIMULCRA:

THE MOTHERSHIP: It follows you around generating meanies and can take many hits. Ram rather than shoot.

HOMING WEAPONS: Retreat as fast as possible then shot them. Most homing weapons have a limited range and can be outrun.

BLITZKRIEG: The best attack is a fast one. Attack a generator by flying along power barriers at full speed. Learn to recognise the edge barriers. Barriers you can shut down never merge with the edge, and nearly always lead to a generator.

SIMCITY:

When the title screen appears, hold down the 'SHIFT' key and type "FUND". This gives you an extra 10,000 smackers. It also causes an earthquake every tenth time you do it, so do it before you start your city.

Another tip is to set the citizen's taxes to 0%. Then just before tax collection (December or November if playing at fast speed) quickly set the taxes up to 20%. Then after you collect taxes, put it back down to 0%. This way the citizens think they are not paying any taxes.

You can build land on water. Find a straight (horizontal or vertical), stretch of coastline and string a powerline along it. Next, move one square over, out into the water and string another powerline parallel to the first. Repeat as many times as you want. Then just bulldoze all the excess powerlines and you can build on the new land. To make land you simply make a 3 lane highway across any water source. When you make a road by putting 3 sections of road on top of three section of road on top of three sections of road (3 by 3) you make 1 section of land in the middle.

IN THE FREIGHTER:

Don't fool with the pod that you came in as it is a waste of time.

You will notice an object to the front and right of the door you came out. You cannot move it but you will need it later.

Head off to the bottom of the screen and then go towards the right on the next screen. You will see a machine bringing scrap towards the ceiling. Hop on and wait. After it dumps you, type "STAND" and then type "JUMP". You will be on a cross beam. Go towards the left until you reach the control room. "CLIMB DOWN" onto the grabber and go around the control room. At the screen after the control room screen, stop the grabber and push the button to lower the claw. Pick up the warp motivator with the claw and after it get back to the grabber go to the right. After you go around the turn stop the grabber and lower the claw. You will have to put the warp motivator in the hole in the top of the ship. Ride back to the control room get off the grabber and fall down the chute.

At the bottom of the chute go to the left where the wire goes into the wall and get the reactor. Climb out using the ladder and head towards the top of the screen. you are now back where you started. Go to the right and go into the tunnel. As you pass thru the tunnel a rat will grab the reactor from you. Go back to the room where you got the reactor and get it again. When you climb out again, take the ladder. Now when you go through the tunnel take the wires and continue thru the tunnel.

Go to the large head and climb in the eye. Go to the ship and use the ladder to get on top and open the hatch and enter the ship. Put the reactor in the hole to the left and then use the wires to splice them together. Get in the cockpit and examine controls. Turn on the engine, turn on the radar, take off, use your front shields and blast your way out.

IN SPACE:

Scan the area. Don't bother with monolith burger or the

volcanic world but go to the other one (sorry i forgot its name). Land and go to the tourist trap and enter the building. Examine the postcards as there are interesting facts you need here. Sell your gem. Buy thermal underwear and a hat if you want it. As you leave you will meet a baddie who is out to get you. Don't go to your ship! Instead go to the left of the robot and take the elevator up. When the baddie follows, wait till he is near the gears and then grab the pulley. After he becomes burger go down and get his belt. Leave and go back to your ship and go to the volcano planet.

VOLCANO PLANET:

Put on you underwear and go to the left and wait until the survey team leaves. Get a detonator and the pole. Go in the direction that the survey team left and go up the mountain and drop the detonator in the machine in the crater. When you get to the crossing back to your ship, use the pole and jump the gully. Take off and go to pestulon.

PESTULON:

Use the belt and get inside past the guards. Go to the broom closet and change into the janitor's closet. Enter the accounting area and use the vaporizer on every trashcan you come to. Make your way to the picture of elmo and take it to the copy machine and make a copy. Put the picture back and make your way thru the accounting area to elmos office. After doing elmo's trash, leave and go to the balcony. When you come back, elmo will be gone and get the keycard off of his desk. Make your way back to the corridor and on the security door use the keycard and then the picture. When you see the jello mold people, push the ramp button and then vaporize the jello.

THE ROBOT FIGHT:

Just do your best, no tricks here.

THE SPACE BATTLE:

Go to Enos and grab a tree, trade it in at the Castron Depot ("LOOKEVERYBODY! TOOTHPICKS!!!").

PROFESSOR TAYMAR:

After getting all of the above ingredients, go to Broadway. Make sure you have a crate of castrobars in the hold.

Cruise the surface and tractor beam the first emma 2 you see. Bring it aboard. Taymar is inside. He will install the cuboid launcher and agree to go to apogee. Take him to the Apogee Depot. When the neutron bomb is built, take it to Q-beta's false moon. If all 6 projector bases have been rebuilt, drop by one and blow it up. You will see the space station, surrounded by mini-sentinels. Take a couple out with missiles. Move toward the station, and when you're directly over it, drop the bomb. A massive explosion follows, and you win the game!!!

On the main screen type "CODE", a prompt will appear asking you to enter a code. Enter any of the following codes:

"CODE" _____	A list of cheats will appear.
"BIDS" _____	Erases all bids from memory.
"LIMI" _____	Disables the 110 team rating limit.
"BEST" _____	Gives you the best players.
"FREE" _____	Enables managers to buy your players free.
"POOL" _____	Saves European pool to disk.
"VIEW" _____	Programmers tool.
"PROM" _____	Last season's promotions and regulations.
"MEMO" _____	Show available memory.

These last couple are activated by typing them in on the main screen without typing "CODE".

"EDIT" to enter the full editor. Now press 'W' to enable you to manage any team. A small green and yellow strip should appear just along from the LOGO and AUTO icon things, under the second logo space. You can now go to the Manager's menu and JOIN any club. Your rating automatically jumps to that of the new team, unless you are joining a lesser club.

Finally, if you want to alter teams because of transfers among Premiership and Division 1 teams, to maintain more accurate club records, instead of creating a whole new player in the editor, it is best to make yourself the manager of the club who bought the player, enable "FREE" transfers, and transfer the player that way. This means the player keeps his original ID number.

For example, Paul Furlong was bought by Chelsea from Watford, so to enable this change, simply become Chelsea manager, enable "FREE" transfers, and approach Watford.

TERMINATOR II-THE ARCADE VERSION:

When the game has loaded select your control method at the options screen as usual. Instead of going to {Start Game} press 'ESC'. Wait for the high score chart with the picture of the T-1000 to appear. As soon as the last digit is printed on the high score chart (the last 0 on the 10000, in 10th place), click the left mouse button (or the joystick fire button if that's plugged in to port one). Note you must click the button 0.19 seconds after the last digit on the high score chart has been printed on the screen. If you take longer, or click before the last digit is printed, the cheat will not work, so precise timing is required.

If you find this difficult there is an alternative. Hold down the fire button or left mouse button at the high score table until it is finished. This won't always work though.

Go back to the options screen. If you can see the picture of Arnie, but no options are displayed, then the cheat worked. Left click on the mouse (or joystick) to move on. Click again to skip the high score display. If you allow the high score chart to be printed again the game may mess up. Start the game.

If you didn't get it to work restart the whole procedure.

Once you've started playing you'll notice that a gunpowder and energy reading is displayed for player two even though he isn't active. Now pause the game (press 'P' not 'F1') and type in all the function keys in order F1, F2, F3, F4, F5, F6, F7, F8, F9, and F10 and you should skip the level you are presently playing. This cheat is for one player only.

On the first level go to the right until you come upon three mushrooms in a row (The first mushrooms you will see). Get the first mushroom, jump over the 2nd one and get the 3rd one. Now continue to the right until you reach a section with two special weapon power-ups that are next to two mushrooms (right before the first bridge and there is a cloud above them). Stand in front of the first power-up and pull down to take it. Now jump over the other power-up and the first mushroom. Get the 2nd mushroom. Work your way past the bridge until you come to the next tree in the background and stand in front of the tree. Now push the fire button and push up on the joystick. The screen should flash yellow letting you know it worked. Finally press 'C' for invincibility and press 'N' to advance levels.

NOTE: If you die before you activate the cheat you must press 'RETURN' to abort the game and restart. Also, you can pick up all the mushrooms and power-ups between the sections.

UFO ENEMY UNKNOWN: (Steve Lowder)

After playing the game for a while and building up your stores save the game. Now quit the game and go into your current save game directory and make a copy of the base.dat file. Now boot the game back up and sell everything you have (if you need money) or transfer stores (not ships or personel) to other bases. Now save the game again and quit. Next replace the base.dat file with a the copy of the original that you made earlier. Now when you go back to the game you'll have all the money from the sales plus all the equipment you sold. And, if you transferred anything those items will arrive shortly. Continue the above procedure as often as you like.

ULTIMA 6:

This is a cheat for Ultima 6 that will let you get any item you wish. What you do is talk to IOLO and say "spam" "spam" "spam" and "humbug" and it will put up a secret cheaters menu.

Here is a list of some items:

- 008 magic helm
- 016 magic shield
- 023 magic armor
- 028 swamp boots

- 047 halberd
- 048 glass sword
- 050 triple crossbow

054 magic bow
055 arrow

058 spell if you type after this 255 and then 1 you will get
all the spells on the scroll
059 codex

088 257 gold coins
089 1 gold nugget
090 torch

097 gargoyal vocabulary
107 shovel

The following are runes:

0242 honesty
0243 compassion
0244 valor
0245 justice
0246 sacrifice
0247 honor
0248 spirtituality
0249 humility
1417 britianna lens
1419 garg. lens

For those of you that haven't found the magic method of travel in Ultima 6, holding 'ALT' '2' '1' '4' will bring up a prompt (in Gargoylian) for three coordinates - these three hex numbers will bring you to any location in Britannia, the dungeons or the Gargoyle world. This is apparently the programmers method of travel and is faster than a fan powered Balloon!

The three numbers are basicly the x,y & z coordinates for the map, with 0,0,0 located at the upper left corner on Level 0 (Britannia). For this discussion, I will use the form x,y,l to describe this coordinate system. The first two numbers (x & y) increase by 1 for each move in the horizontal or vertical direction. The x coordinates begin at the left edge and the y coordinates begin at the top. The third coordinate (l) represents the level; Britannia is Level 0, the dungeons are levels 1 thru 4 and the Gargoyle world is Level 5.

'ALT' '2' '1' '4' is entered on the numeric keypad. Each coordinate is entered separately, ie, press 'RETURN' after each one.

'ALT' '2' '1' '3' this gives the Gargoyle coordinate for your present position plus a free view of the map - forget all those gems and peer spells!

'ALT' '2' '1' '3' returns a 13 digit number, the last 7 of which are the coordinates. The first 6 are related to the total number of moves you have made. For the example above, the number would look something like: 79000029D0430 or 790000 moves and coordinate 29D,043,0.

BEWARE: You can land in a real 'snake pit' with some of these locations. Always be prepared for the worst when teleporting to a strange location.

To access the cheat mode you have to go to flight school. To get an awesome pilot click on the bullseye on the airplane at the top of the flight school menu. The screen will either flash or you will get a requestor asking if you want to quit (say no). Then create a new pilot with the name "Orca The Killer Tomato" type as it's printed. Orca doesn't need school. To access a menu option (much of which is no longer useful or active) create a new pilot and name him " Who is The Riddler". Make sure to put the two spaces before the name. WWF WRESTLEMANIA:

Get your man outside the ring and pick up the steel chair to beat up any harder Fighters that you are having trouble with. This should help you to get further. When you are about to go into a joystick waggling battle, follow these steps:

- (A) Pause the game.
- (B) Plug the mouse into the joystick port you are using.
- (C) Unpause the game, and move the mouse rapidly from side to side. This will enable you to waggle quicker than your opponent.
- (D) When your character has won the move, pause the game and plug the joystick back in.

Place the chair outside the ring (next to the bottom left turn buckle) just up a bit. Now jump into the ring and you should have the chair. Climb up on to a corner post, and instead of jumping into the ring, jump the other way. Weird gravity!

During a two player practice game, get 1 player to climb onto the top of the top left turnbuckle, then get player two to be as close as possible to him. Player two should drop and kick the player, then he will turn into a "ghost". He can pick up the chair and take it into the ring. Press escape then compete for the title, and the chair will still be there.

If you manage to reach level 10, you're better off using your radar to kill the xybots. Just line them up using radar and fire, you don't have to be able to see them. Keep as many keys with you as possible because some levels don't have enough to complete them.

There are short cuts to level seven on levels one and four - you get extra cash for using them. If you have the extra energy upgrade try not to let your energy fall below 100m, because you lose the upgrade if it does.

Drums are not just decorations - hide behind them when possible and use your zapper near to them to find more cannon power.

On level eight, near to the top left hand transporter you can get to two white coins by blasting away one of the three walls around them.

Don't split up in the two-player game, because it's easier to complete it together.

The master xybot lives on level 11, and you'll need to stock up on double shot and extra shot speed to stand a chance of survival.

Try to get one xybot to stand behind another - they'll blow each other apart.

ZOMBI (UBI SOFT):

If you have seen Dawn of the Dead, you already have a good idea on how to solve most of the puzzles. But here's some extra tips anyway:

1. To lock up the mall to keep zombies from getting in, you need to park the trucks over the entrances. Get the key from the office on the 2nd floor and go to the 4th floor where the keys to the trucks are kept.
 2. To keep the dead zombies from coming to un-life, lock them up in the freezer in the basement.
 3. Before you can go play in the basement, you need a source of light. Get the fuses and gloves from the 3rd floor and go to it!
