ABOUT THE SHAREWARE EDITION

The **WinOnLine™ Review™ Shareware Edition** is published weekly except for the last week of the month by **Windows OnLine™**. It is dedicated to bringing you news and reviews on the latest files available to members of **Windows OnLine™ (BBS)** and the general community of bulletin board users. Print publications just can't match the *immediacy* of this electronic media. **Week after week** we bring you the *newest shareware, freeware* programs and *features,* such as:

Windows Shareware Briefs - Quick and informative reviews of the **newest entries into the shareware and freeware market**. Are they good, bad or buggy? We'll give you useful details that will tell you if it's worth your download time!

New Files – Tasty extracts from the past week of **Windows** and **OS/2** files posted at **Windows OnLine™ (BBS)**. Now you will know about that **new graphics driver**, that **freeware update**, or discovered that neat **WAV** or new **FONT** file. All without sifting through files at several other on-line services, if they even have what you're looking for! For new DOS files, call **Windows OnLine™ (BBS)** to review our huge selection.

Feature Reviews - Hear about hands-on experiences with the inner workings of the some of the **newest shareware,** with full glorious and gory details of its ups and downs. Our experienced writers bring you perspective with their frank and honest reviews.

The WinOnLine™ Review™ Shareware Edition
is published courtesy of
Windows OnLine™

We hope you find this weekly publication of great value and interest and become a regular reader. We'd appreciate your comments and suggestions. Leave a comment (C) on **Windows OnLine™ (BBS)** at **1-510-736-8343** (bbs) or write to,

Windows OnLine

Enjoy!

WHAT'S IT ALL ABOUT, WOLLY?

Wolly was poked in the ribs by a good friend this week and advised that it was time to deliver a sermon. The topic: **Shareware ain't free.**

There aren't too many instances in today's world where you can try something before you buy it. While some authors rely on omitting certain features to encourage registration, ASP members and many other authors "give it all to you", but that's not generosity, that's professional courtesy. **Repay that courtesy and trust by registering the shareware you use!** Take the opportunity to tell the author what you like and what you'd like to see! Contribute to their effort both financially and with product suggestions --- and we all benefit.
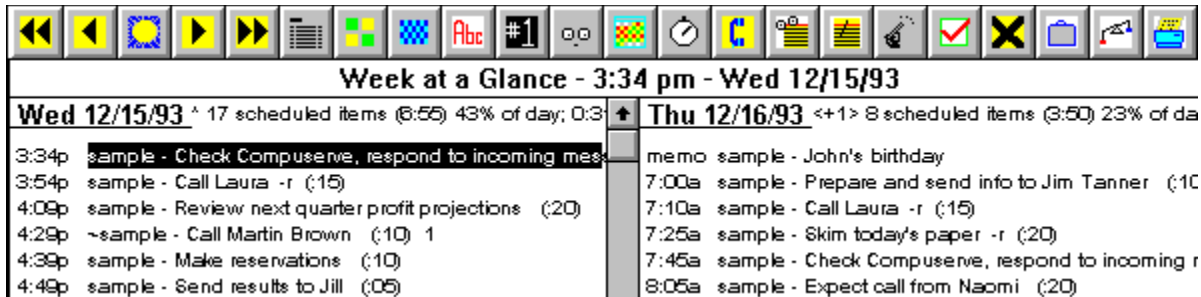

If you don't pay for the shareware you use, who knows what will happen?? With their financial incentive gone, all the programmers will end up working for **MACROMACHOSOFT®** and you'll have no choices at all!!

Enjoy the issue !

ABOVE AND BEYOND
Definitely

This **PIM** (Personal Information Manager) continues to grow in sophistication and use with each version to **give some commercial packages competition.** Above and Beyond makes scheduling your life and keeping track of that schedule easier than ever. If you're a road warrior, there are even facilities to **exchange files with your portable.** The system provides the usual **calendar views** and overviews, easily chosen through the **button bar,** and **single or recurring items are no problem** to add to the schedule. **Drag and drop an appointment from one day to another,** take advantage of group scheduling on your LAN. Naturally, an address/note/phone book with dialer and pop-up timer helps to complete the system. Agents are supported (timed application and batch file launches) to make routine tasks virtually invisible and many report options are available including **popular formats for those calendar folios.** Wolly can't even list all the options available from **AB30.ZIP** (274K). Wolly went back and looked at it a few times to be certain, but Above and Beyond was surprisingly priced at **$149.00.** Being the obnoxious fellow he is, Wolly called 1Soft to challenge their pricing and learned that an adjustment was imminent. So if you try and then like Above and Beyond, register it for **$99.00** and tell them Wolly sent you.

# BILL'S COMPUTING TAX SCREEN SAVER
Bill who?
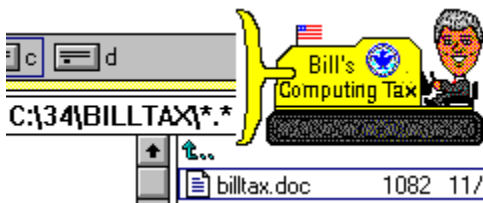

Wolly generally keeps his **politics** to himself, being an *extreme radical moderate, far to the center.* However, one must make an exception to engage in America's favorite sport: *President-bashing.* This **screen saver** uses Windows' built-in facility to display our Bill astride a bulldozer, appropriately decorated, clearing your screen. If you have audio facilities, Bill will alternately **laugh hysterically and recite his "I will not raise taxes on the middle class" speech.** Fun for all, all for fun! Register **BILLTAX.ZIP** (91K) for **$5.00** and receive a Hillary

Clinton screen saver absolutely free! Seems like First Lady-bashing is a fast-growing American sport as well.

VB ICON BROWSER
And much more
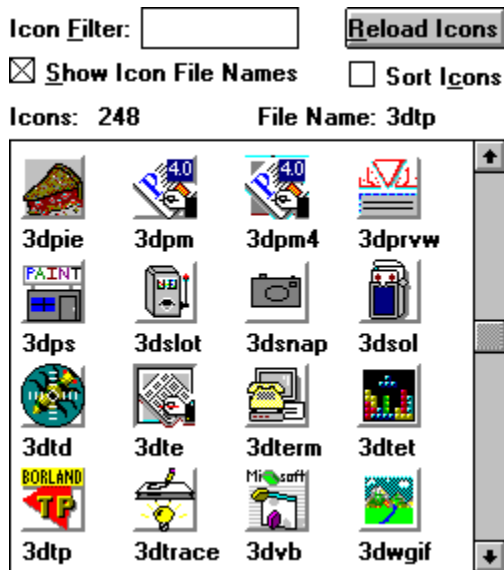

This program will handle that bothersome collection of icons with ease and a pile of functions. Not only can you **browse a group of icons,** but VB Icon Browser supports **drag and drop for the delete, copy and rename function.** View the icons with or without their file name; in any case **the file name appears when you place your cursor on any image.** The Icon Filter restricts the listing to your specifications. Printing brings up a dialog box with options galore, including **font selections, titles, subtitles, icon sizing, spacing, margins, etc., and the print speed and results of my fifty select icons was impressive!** Wolly thought **ICONB220.ZIP** (48K) very slick; it can be registered for **$19.95.**

TRUE TYPE FONTS
Unusual . . .

BUJARDET   **BUJ_TT.ZIP (41K)**

DinosoType   **DIN_TT.ZIP (66K)**

$\square$iodes **DIO_TT.ZIP (35K)**

Malabars **MLB_TT.ZIP (61K)**

ᄂᄆᄍ **SORA.ZIP (15K)**
Sorawin Korean (Hangul) font

Please read the documentation that accompanies font files for their conditions of use.

ICON MAN
No more hide and seek with icons!

This program **rids your desktop of the clutter of iconized applications** by handling the whole operation. Live applications are listed in the Icon Man box, which itself can be multiple columns, on top, etc. **A click of a button will minimize an application,** but rather than showing up as an icon, an indicator shows its condition within Icon Man, and a second click will restore it to view. The program uses **undocumented Windows functions** to hide the icons, so it cannot guarantee complete compatibility with all programs or future Windows versions, and not all of the Icon Man features described seemed to work for Wolly. However, **ICOMAN14.ZIP** (64K) is a **novel and useful idea,** and may be registered for **$20.00** if you find it of use.

NUTRISOFT CONTROL HYPERTENSION
POP! goes the arteries
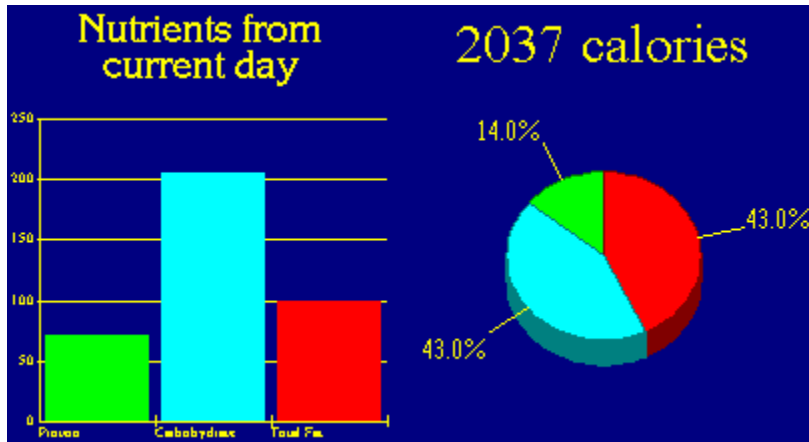

Right off, Wolly disagrees with their recommended weight chart. Since the upper height limit in their chart stops at 6'3", **Wolly can't find out how tall he needs to be for his weight.** However, this program has features to help you **control your blood pressure by calculating the amount of fat, carbohydrate, protein, sodium, calories, and other essential nutrients in your food consumption** using a standard database of common foods or your own data. It also analyzes the caloric contributions from these components to help you **obtain a more healthful diet,** thereby reducing your blood pressure. The system is **pretty slick, allowing you to personalize the foods and create menus** to follow to achieve your goals. The shareware version limits certain items and functions, such as saving some criteria or searches. If you are one of the many in the population who would benefit from a healthier diet, you may want to look at **NSCH22.ZIP** (625K), which may be registered for **$39.00.** Nutrisoft also publishes similar programs involving your health including a Fat and Cholesterol Counter, Control of Diabetes, Weight Perfect, and Pregnancy Nutrition.

click me

SUPER CURSOR
Unbeknownst to Wolly, he has a kryptonite chip in his computer

Change your cursor from that boring default to a colorful dart, arrows, pretty I-beam, etc., with Super Cursor. Suck up 5% of your Windows resources to do it, and get erratic cursor movement and slower than slow screen redraws. Wolly couldn't see anything super but did curse when trying this out on his 386-DX25 test system. **$16.95** will bring you 200 cursors, an editor, and a book for **SCUR10D.ZIP** (77K) if you're more into pretty than performance.

BACKUP
game
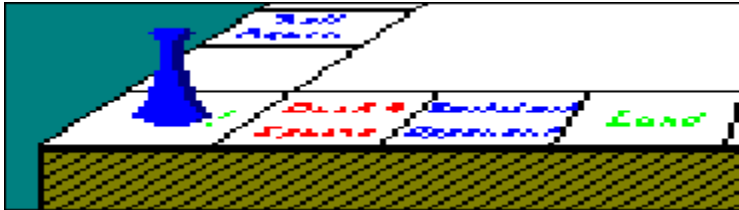

Backup is a board game imported onto your computer screen. Wolly **couldn't see the entire board at 640x480** that makes it kind of difficult to play. It's an elementary game best aimed at the younger set. The stated object of the game is for all four of a player's pieces to **go from the start box to your home box without being "bumped" off by the other players,** all the while dealing with the various board perils. Three of the four players can be the computer, and other configuration options such as autoplay are available. **Ho-hum. BACKUP11.ZIP** (116K) can be registered for **$12.00.** Wolly thinks naming a game executable BACKUP.EXE is somewhat ill-advised as well, doncha think?

WING DATE
Think I *would* rather wing it

WingDate's purpose is to **remind you (??) of significant dates.** You look at it to remind yourself. Two calendar months are shown, along with your list, though there is no way to scroll through months and odd highlighting of dates occur with no seemingly logical reason. **Events can be added, deleted or modified with ease, and you can send your list to the printer.** Wolly could see **no real world use** for **WNGDTE32.ZIP** (53K) with its lack of features and documentation, but registration is **$5.00** if you can. If this is version 3.2, Wolly suspects he would not have wanted to see 1.0.

written by

as told to Bob Gollihur

There I was, happily winging my way along in Windows, when WHAM! I got one of the more dreaded messages in the Windows collection of infamous euphemisms: a GPF, or General Protection Fault. I've long been mystified by Microsoft's obscure use of the language. Who makes ups these acronyms anyway???? I thought the old UAE's (Unrecoverable Application Error) messages of Windows 3.0 were a bit more descriptive and more to the point. But, I'm rambling; back to my point. Anyone who is ever blessed with a GPF knows that something is amiss in the system and the only repair is to bail out and start again. These little nasty surprises are created when Windows receives an unexpected command or memory access request. So, rather than over write something in memory that it shouldn't, Windows locks up and you find the cute little GPF box on your screen.
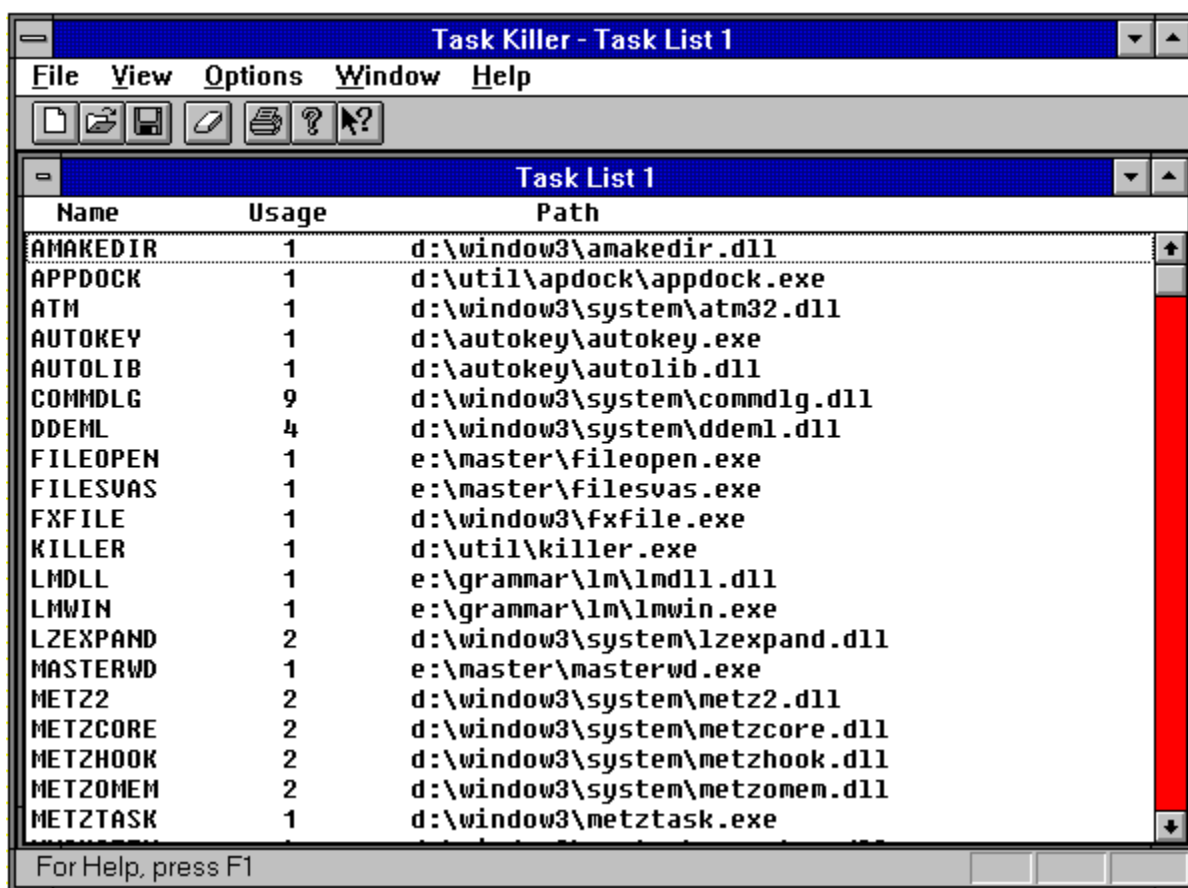

It's bad enough to get these messages, but trying to figure out what caused the problem is another adventure. If you can duplicate the GPF, you might be able to figure out the problem. If, however, you rely on Dr. Watson to help you, you might be disappointed. The Dr. Watson program will show you the state of your system at the time of the crash, but little else. And unless you know the code for the program that went belly up, the numbers this program gives you are actually not very much help.

In my case I solved my problem with a program that I had stumbled upon in one of my BBS forays. This program is called *Task Killer 1.3* and is quite possibly the most pleasant

shareware surprise I've found this year. As such, *Task Killer 1.3* is the recipient of the much sought after *"Work's For Me"* award.

  Task Killer 1.3 is one of those Windows shareware programs that does only one thing and does it very well. The program is designed to list and display all the DLL and EXE modules that are currently loaded in your Windows system at the time the program is activated. This might not, at first glance, seem to be so special. But, considering that DLL's and EXE's are two of the more frequent components that cause system bugaboos, knowing what they are doing in your system will help track down many problems. Task Killer 1.3 is a useful tool for virtually anyone using a computer. Programmers, technical support people, and network administrators will find this program priceless. But, even power user wannabees' shouldn't be without this tool on their system.

Name	Usage	Path
AMAKEDIR	1	d:\window3\amakedir.dll
APPDOCK	1	d:\util\apdock\appdock.exe
ATM	1	d:\window3\system\atm32.dll
AUTOKEY	1	d:\autokey\autokey.exe
AUTOLIB	1	d:\autokey\autolib.dll
COMMDLG	9	d:\window3\system\commdlg.dll
DDEML	4	d:\window3\system\ddeml.dll
FILEOPEN	1	e:\master\fileopen.exe
FILESVAS	1	e:\master\filesvas.exe
FXFILE	1	d:\window3\fxfile.exe
KILLER	1	d:\util\killer.exe
LMDLL	1	e:\grammar\lm\lmdll.dll
LMWIN	1	e:\grammar\lm\lmwin.exe
LZEXPAND	2	d:\window3\system\lzexpand.dll
MASTERWD	1	e:\master\masterwd.exe
METZ2	2	d:\window3\system\metz2.dll
METZCORE	2	d:\window3\system\metzcore.dll
METZHOOK	2	d:\window3\system\metzhook.dll
METZOMEM	2	d:\window3\system\metzomem.dll
METZTASK	1	d:\window3\metztask.exe

  The program not only lists the DLL's that are left in memory (when you didn't suspect them to be there) but you can find the programs that loaded the DLL's and sort out many DLL conflicts. In my case, this is what I found to be the problem with my system. I had a left over video DLL that was repeatedly loaded even though the drivers were long since discarded. In addition the program will allow you to:

- Terminate any module or runaway programs
- Decrement the usage count of DLL's
- Create multiple module lists showing the state of the system at different times
- Compare module lists in side-by-side windows
- Save module lists to files
- Print module lists

If *Task Killer 1.3* were a commercial program I'd have it on my list for Santa. But, fortunately the program is shareware and we can all benefit from this insightful programming. So unless you enjoy seeing the GPF window, or like solving mysteries, you'll want to keep this program close at hand. Be assured this is one utility that nothing short of nuclear war will get off my system. Members of Windows OnLine can find *Task Killer 1.3* as TASKLR13.ZIP in Directory #500 - (Windows-New Uploads).

Task Killer 1.3 (Registration fee: $15.00)

TOP DRAW

   I happen to have several commercial drawing programs, and use them all with varying degrees of skill. Indeed, they each come in handy when applied to the various purposes for which I purchased them. Some are great for my business-type graphics needs and some are really good for my more exacting programming needs. One of them I find best for unusual font manipulations, and another I find most comfortable when I need to combine resizing and format conversion. The list goes on. Occasionally, however, usually right in the middle of some project, I find myself wishing that I had a drawing program that was a little less complicated than the commercial packages, yet adequate to quickly accomplish a polished result. This wished-for "in-betweener" ought to be more able than Windows Paintbrush, while eliminating what often seems like too many steps to get the job done.

   TopDraw 1.0a is a Windows Shareware drawing program that, in many respects, fits the above description. Working with this software, I was surprised to discover many features that are usually found only in "pricey" commercial programs, including a couple I've never even seen before now. Its Bezier curve capabilities are absolutely top notch. The online tutorial is instructive and easy to follow, and I found myself easily producing some very attractive drawings in a short time. There are some features I'd like to see added, and a couple of aspects I found to be a little awkward to work with. We'll take a look at these in a bit.

   If you've worked with any of the commercial drawing programs, you'll find the interface and drop-down menu selections immediately familiar and comfortable. Configure the rulers in units of inches, millimeters, centimeters or pixels, and space the ruler markings with one of five increments offered for each, including **Auto**matic.   The working grid may be set up as dashed lines, cross-hairs, or dots, and may be extended beyond the page to the rulers. The vertical and horizontal toolbars provide sensible, quick access to needed tools. The vertical bar contains buttons (pictured below) for the creative devices.

 Select Tool - Move, resize, and rotate objects; Set the following options: Nudge Step, Control Angle Step, Contact Distance, Guideline Snap, Maximum number of outline points; Set vertical and horizontal offset preferences for Duplication.

Node Tool - Edit line/curve object nodes.

Text Tool - Create and modify text objects.

Shapes Tool - Add and select pre-defined shapes.

Notes Tool - Create and modify notes for the drawing.

**Zoom In to Region** - Select by left click and drag; 2x magnify.

Zoom to Fit Window - and Zoom to 100%.

**Zoom Out to Previous View**

Layer Tools - Move forward and back through the layers of the drawing.

The **Shapes Tool** is quite a remarkable feature. It provides a palette of predefined, sizable shapes. Moreover, it serves as a "holding tank" for user-defined/created objects that you might like to keep handy for repeated use. The online tutorial demonstrates this aspect very nicely. As it walks you through the creation of an outdoor scene, the usefulness of this feature is quite evident. The drawing includes a forest which, of course, has quite a few trees. This tool permits not only the rapid insertion of a large number of trees, but also easy manipulation of the size and character of each individual tree. As a result, imparting depth and perspective to the drawing was a snap. This is a feature I have never seen in any of the higher-end drawing programs. Using the tutorial, it only took about twenty minutes to produce the drawing pictured below.

  TopDraw provides for an unlimited number of layers within a drawing, another feature usually found only in commercial fare. It also includes a **Lock** feature to secure aspects of your choosing, thus freeing you to work in a given layer without accidentally disturbing already finished portions. It has always struck me odd that most commercial drawing programs do not allow more than one drawing open at a time. This is not the case with *Top Draw*. Multiple open drawings are, in fact, supported, in addition to the ability to imbed and hide your own commentary with the **Notes Tool**.
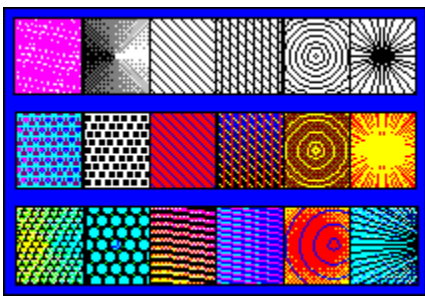

The horizontal toolbar focuses on line and text characteristics, coloration, texture, fills, and gradients. A virtual cornucopia of selections and variations of style and form are built right into the program. Manipulation of even the smallest detail is provided for, and easily accomplished. Each configurable category presents the user with a dialog box that clearly structures the available choices. The image on the right illustrates several of the possibilities. The graphical capabilities of *TopDraw* are **very** impressive.

There is, however, some room for improvement. Use of text in a graphic is unfortunately limited. All textual entries must be associated with a form, and cannot exist as a singular manipulable entity. What this means is that there is no provision to enter and manipulate fonts in a graphical fashion all by themselves. In order to include text in a drawing, you must first draw a specific geometric form to contain it. The features that are provided, including automatic wrap, are more in keeping with a text editor, rather than a drawing program. I feel that inclusion of the ability to manipulate fonts as graphical objects would be one of two items needed to elevate *TopDraw* to status as a **truly** complete resource.

The second needed item involves "conversion-ability". Currently, an image produced in TopDraw may be saved either as a Windows Metafile (.WMF) or as a .TDR, the program's inbuilt raster image format. Added functionality to export drawings in other graphical formats would round this program out very nicely.

TopDraw is a drawing program that I highly recommend. It is great fun to work with, and I am thoroughly impressed with its scope and ease of use. I applaud Jeff Becker, author of *TopDraw*, and president and founder of Top Software, for releasing such a polished product into the Shareware mainstream. If you've never had a chance to work with a commercial drawing program, this is your opportunity. It really is that good.

WOL members can find the latest release of *TopDraw*, version 1.0a, in the New Windows Files Library #500 as **TOPDRAW1.ZIP**.

NEW WINDOWS FILES

The following file listings became available on Windows OnLine two weeks prior to the issue date, and may not yet be available on some bulletin board systems. Many more files were added to our library during that time, but only files of recent date are listed here. Members of Windows OnLine can download WOLRECNT.ZIP or use our mail door to obtain a complete listing.

WINDOWS - NEW UPLOADS from December 5, 1993 through December 11, 1993

(older files omitted)

1118.ZIP 9734 12-09-93 General protection faults in **WordPerfect 5.2 for Windows.** (Last Revised: 10/05/93)

AB30.ZIP 274055 12-09-93 Above & Beyond 3.0 - Excellent Windows **PIM**. Enjoy Above & Beyond's superb Dynamic Scheduling. Feel your productivity surge as it streamlines your workflow. Handles all types of recurring items. Features pop-up alarms, week/month views, timers, task tracking, launch apps on schedule, contact database, auto-dialing, and more. Online Help. Includes workgroup/LAN support. (Last Revised: 11/23/93)

ABC_FLOW.ZIP 1188578 12-06-93 MicroGrafx ABC **Flowcharter Demo.** (Last Revised: 11/23/92)

ASTRO20A.ZIP 534827 12-06-93 **Astrological program** for Windows 3.1 **[1/2]** (Last Revised: 11/10/93)

ASTRO20B.ZIP 1163309 12-06-93 Astrological program for Windows 3.1 [2/2] Version 2.0 with print and screen options for Radix-, Synastry- and Transit Horoscopes. Furthermore there is a text evaluation of the birth-chart of about 25 pages. 6 different House-systems the most common being Placidus, Koch as well as Equal-Houses. Files: 23 (Last Revised: 11/10/93)

ATOMS21A.ZIP 38549 12-06-93 Atoms   A simple **puzzle game** for Windows 3.1 Atoms is easy to learn and play. Includes full on-line help. Mouse driven interface. Version 2.1 Saves player names and best times for each of four difficulty levels. (Last Revised: 11/07/93)

BABYSTF1.ZIP 34172 12-07-93 Baby Stuff! V1.0: MS-Windows program **allows infants 18-months to 4-yrs to create shapes & colors by pounding on the keyboard;** good for learning shapes, colors, hand/eye coordination, or for just having fun; VBRUN200.DLL is req'd; 11/14/93 Better get a backup keyboard for this one <W>

BACKUP11.ZIP 116397 12-09-93 Backup v1.1: MS-Windows **board game** for four players (3 of whom may be computer players) where the object is for all 4 of your pieces to go from your start box to your home box without being "bumped" off by the other players. (Last Revised: 11/09/93)

BILLTAX.ZIP 91203 12-06-93 Windows **screen saver** - Bill Clinton tax (Last Revised: 11/24/93)

BUJ_TT.ZIP 40739 12-09-93 BUJARDET FRERES - **TRUE TYPE** FONT This font has been created after ads used by my ancestors at the World Fair in Paris, 1900. It is a very original, old-looking font, interesting for ads, or posters and layouts. Shareware $10. Upon registration, you will receive 50 more fonts, including many other original fonts, foreign (Japanese Kata & Hiragana, Russian, Slovak, Armenian, ancient Greek, Hebrew,etc.). (Last Revised: 11/15/93)

CATCIS14.ZIP 195547 12-11-93* CatCIS v1.4: MS-Windows **pgm to be used with TAPCIS catalog files** containing Data Library Catalogs from CompuServe's forums; provides a convenient way to view catalog items & write download scripts for TAPCIS and also provides for pruning catalog items from a catalog file enabling you to reduce the size of your catalog files by removing unwanted catalog item descriptions & more. (Last Revised: 11/21/93)

CNFND121.ZIP 59271 12-10-93* Confound v1.21: **strategy game** for MS-Windows that pits you against the computer each trying to occupy your opponent's home square. (Last Revised: 11/01/93)

CSHR406A.ZIP 177103 12-06-93 CardShark-Hearts v4.06: strong **Hearts game** for MS-Windows; features include auto-play, hint mode, view all hands at any time, replay deals, save and print deals, user-selectable playing styles and strengths of computer opponents, WAV file support for comments from computer hands & more; requires VBRUN300.DLL and VBCARD.DLL (available in previous release of archive. (Last Revised: 11/12/93)

CYBERC.ZIP 9753 12-06-93 CyberCom - High Speed Windows 3.1 **Comm Driver.** Designed for the 386+, CyberCom is a direct replacement for the standard Windows Comm Driver. Transfer at up to 115,200 KB with a 16550 serial port chip. Great for V.34 and voice modems that require 57,600 Kb. More reliable transfers with less overhead on your system. Better background Files: 2 (Last Revised: 11/28/93)

DESIGN10.ZIP 435547 12-07-93 **Design-A-Room.** Draw a room, add furniture, fixtures, then print it out. Add walls, etc. All to exact dimensions. Totally mouse-driven - for Windows 3.1. Know what your room looks like BEFORE you move heavy furniture! Ver (Last Revised: 12/01/93)

DESKTO.ZIP 74541 12-05-93 DeskTop v1.0 - utility editor for Windows to **edit or create your files,** plus much more. (Last Revised: 11/27/93)

DIN_TT.ZIP 66281 12-10-93* DINOSOTYPE - **TRUETYPE** FONT ! This very exclusive font contains instead of dreadfull ordinary characters, very live DINOSAURS. Original pictures ready to print, A-Z & a-z. Shareware $10. Upon registration, you will receive 50 more fonts, including many other original fonts, foreign (Japanese Kata & Hiragana, Russian, Slovak, Armenian, ancient Greek, Hebrew,etc.). For PostScript Type 1 look for DINOS-T1. (Last Revised: 11/19/93)

DIO_TT.ZIP 35120 12-11-93* DIODES LIGHT - **TRUE TYPE** FONT This font evocates a LED display. It ressembles some other fonts (LCD, etc.) but it's hollow design makes it look like lit diodes. Great for electronic ads and catalogs. Shareware $10. Upon registration, you will receive 50 more fonts, including many other original fonts, foreign (Japanese Kata & Hiragana, Russian, Slovak, Armenian, ancient Greek, Hebrew, etc).

(Last Revised: 11/15/93)

DOCPOW.ZIP 430447 12-07-93 DocuPower Pro 2.2 - **W4W Document Management** Super-charge WinWord 2.x **& new WinWord 6.x** Smash the 8 character file name barrier! Give documents long, descriptive names. OPEN, INSERT, PRINT your documents by pointing & clicking on descriptions. Use FILE FIND and TEXT SEARCH to recover your "missing" documents. Plus integrated FILE MANAGEMENT utilities. A Shareware Magazine Editor Choice Award Winner (9/93) Never misplace a file again! (Last Revised: 11/24/93) Big time Ed Hoffman fave! Check it out! <W>

DODOS10.ZIP 14788 12-07-93 DoDOS v1.0: MS-Windows program which allows you to **run DOS apps which won't normally run from Windows;** achieves this by creating a temporary BAT file using cmds supplied on the DoDOS cmd line, shutting down Windows, running the BAT file, then restarting Windows. (Last Revised: 10/08/93)

DODOS11.ZIP 17257 12-11-93* DoDOS v1.1: MS-Windows program which allows you to **run DOS apps which won't normally run from Windows;** achieves this by creating a temporary BAT file using cmds supplied on the DoDOS cmd line, shutting down Windows, running the BAT file, then restarting Windows. (Last Revised: 11/28/93)

EXW10.ZIP 72736 12-11-93* ExitWin 1.0 - A very unusual, elegant and functional **exit to DOS utility.** ExitWin will place a free floating EXIT sign on your desktop. It may be moved and locked in position by the user. Configurable for Exit and Re-Start or Exit Only , Always On Top, Single or Double Click to exit, Confirmation, .wav file sound effects. Shareware, $10. Requires VBRUN300.DLL not incl. (Last Revised: 11/09/93)

FMA10C.ZIP 142319 12-05-93 **File manager extension for application menu.** (Last Revised: 11/06/93)

FMV3_5.ZIP 234326 12-06-93 File Magician w/ Free Real gold Nugget! Awesome 3D MS Windows 3.1 **compressed file handler!** Check it out! Files: 16 (Last Revised: 11/27/93)

FSP520.ZIP 268160 12-06-93 FontSpec Pro ver.5.2, ULTIMATE **Font Manager** New:12-05-1993 Old:12-03-1993

GEEBRAIN.ZIP 160646 12-11-93* This is from the TV show Animaniacs, with the ever-famous: Pinky: Gee brain, what do you wanna do tonight? Brain: Same thing we do every night. Try to take over the world! .WAV sound file. (Last Revised: 11/30/93)

GOLFAVI.ZIP 425550 12-11-93* This is a .AVI file (Video for Windows) of a great shot of a golfer teeing off. It is like a home movie....use Media Player in the Control Panel to play the file. (Last Revised: 03/09/93)

Notice:

   Windows OnLine (BBS) makes every effort to identify and to post only shareware, freeware, demos, working models and drivers (software files and programs) for it's membership which are intended for free public distribution. Due to the lack of documentation and other descriptive files contained within certain archives, it can be quite difficult to identify and remove improper and otherwise copyrighted files and programs from our file listings.

   It is the policy of Windows OnLine (BBS) not to allow such improper and illegal files and programs on the BBS, at any time. Our Readers and Members are asked to cooperate with us in our efforts to identify such improper files and to assist WOL in its efforts to remove ANY inadvertent inappropriate file postings.

WOL FILE DIRECTORIES

NOTICE:

Windows OnLine™ is currently expanding and revising its entire file structure. This listing is provided as a general view of the quality, quantity, and organization of our files. As soon as the new structure and content is finalized, this listing will be updated. Thank you for your patience and anticipation.

NOTE: DOS, OS2 and Windows newly uploaded files are located in
Directories 148;149;150.

The following directory contains all new DOS files to WOL

148.   DOS   - NEW UPLOADS   624
83,788,485

Totals For All DOS Files   20,185
2,296,098,105

Grand Totals   32,154
3,734,862,765

This listing is as of September 1993 and is presented as an example of the tremendous number of WOL directories and files available to members. Remember, these are clean file listings, purged of useless duplicates or obsolete files. Windows OnLine™ works hard to gather the best and latest for its members!

Windows OnLine™ brings

THE BEST AND LATEST FILES

NO JUNK - we obtain the files ourselves, screen them thoroughly and edit their descriptions

THE LATEST FILES and **MORE FILES** - we get them EVERY DAY!

MINIMAL DUPES - we clear off the old when we bring on the new

EVIDENCE: Scan the **NEW FILES LISTINGS** in this issue. This is just our Windows and OS/2 files. Twice as many DOS files come in each week in addition to the quality and quantity you see here.

REVIEW THE SIZE AND NUMBERS OF FILES in our listings

WOLRS REVIEW INDEX

Issues 1 through 33

This index is presented in order of program topic. If you want to search for a specific shareware program, you may do so by selecting EDIT and COPY, and then copying the listing to clipboard and pasting it into Notepad. Use the program's search feature to find the program in which you're interested.

**Wolly uses the following system
to evaluate programs auditioned
for the Shareware Briefs:**

Siemens UM 486-33DX
16 megs RAM, 256K cache
17" .25 Sony CPD-1730 Monitor
Diamond Stealth 24, (S3, 1 meg)
2 IDE Drives 245, 210 megs
Colorado 250 meg Tape Backup
Soundblaster 16
Panasonic CD ROM 150kb, 390ms

**A second system is also used as
an additional test platform:**

386-25DX
4 megs RAM
14" .31 VGA
Generic 256K VGA
1 ESDI Drive w/Stacker 3.1

Would You Like Your Program *Featured* or included in the Shareware Briefs??

Each week *Wolly* looks at the newer programs that have been posted on **Windows OnLine™**. *Your* program could be included.

UPLOAD your creation to **Windows OnLine™** *immediately* upon availability. Call **510-736-8343**

You may leave a (C)omment to the Sysop; a menu will allow you to designate the recipient. If you would like, you may send pertinent supplementary material such as press releases, registered copies and other information to:

> **Bob Gollihur, Editor**
> **WinOnLine Review™ Shareware Edition**
> **Seven Baywyn Drive, Ocean View, NJ   08230-1060**
>
> (609) 624-1470   -   CIS 71334,2065

Mail early to be certain it will arrive during the same week you upload your program to Windows OnLine™.

Please be advised that submission is no guarantee of appearance or a favorable review from Wolly in the Shareware Briefs. However, all current Windows shareware newly uploaded to WIndows OnLine will appear in the New Files column.
