## ABOUT THE SHAREWARE EDITION

The **WinOnLine™ Review™ Shareware Edition** is published weekly except for the last week of the month by **Windows OnLine™**. It is dedicated to bringing you news and reviews on the latest files available to members of **Windows OnLine™ (BBS)** and the general community of bulletin board users. Print publications just can't match the *immediacy* of this electronic media. **Week after week** we bring you the *newest shareware, freeware* programs and *features*, such as:

**Windows Shareware Briefs** - Quick and informative reviews of the **newest entries into the shareware and freeware market**. Are they good, bad or buggy? We'll give you useful details that will tell you if it's worth your download time!

**New Files** - Tasty extracts from the past week of **Windows** and **OS/2** files posted at **Windows OnLine™ (BBS)**. Now you will know about that **new graphics driver**, that **freeware update**, or discovered that neat **WAV** or new **FONT** file. All without sifting through files at several other on-line services, if they even have what you're looking for! For new DOS files, call **Windows OnLine™ (BBS)** to review our huge selection.

**Feature Reviews** - Hear about hands-on experiences with the inner workings of the some of the **newest shareware**, with full glorious and gory details of its ups and downs. Our experienced writers bring you perspective with their frank and honest reviews.

## The WinOnLine™ Review™ Shareware Edition

**( Fax 510-736-8397 )**

**Enjoy!**

## WINONLINE.INI

### WELCOME TO '94

Wolly is feeling pretty good. It's 1994 and all is right with the world. Shareware continues to be a strong force in the computer community, and you, readers, are a most important part of it. As the programming tools improve, so will the programs. Some real blockbusters emerged last year! Keep your faith in shareware, and express it by registering that program you've been meaning to, today. Tell a shareware author what you think, good or bad.

Wolly lifts his glass of Cabernet in your direction, and thanks you for your support! Have a Happy New Year!

*Enjoy the issue*

*Wolly*

P.S. Stay tuned for some important news next week!

## SHAREWARE BRIEFS

### PICTURE THIS!

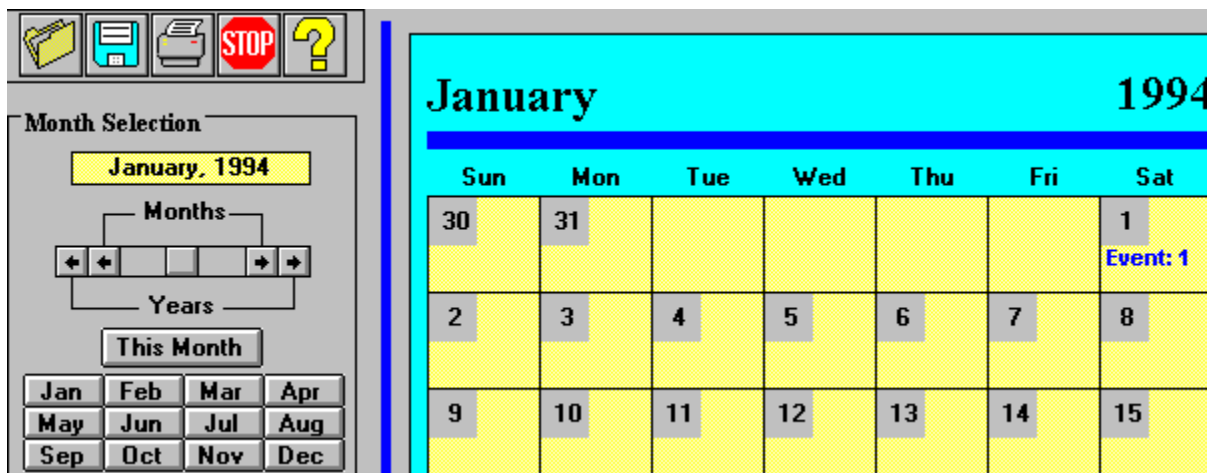

Sticky Fingers!

If your keyboard and mouse are often left sticky from dreaded "peanut-butter & jelly hand syndrome," you may have someone in your household who will like this program. Picture This is **a drawing and painting program for kids complete with sound effects**. Definitely aimed at the tykes, the interface is pure icon, with **crayons, chalk** and the like that kids may understand. Also included is **a rubber stamp tool that selects from groups of images** to add to the screen. Wolly wouldn't exactly say that Picture This is crippled, but the shareware version sure lacks a lot of the features that the registered version at **\$24.95** brings, such as clipboard capabilities, non-nag print, more sounds, more tools, options to save drawings as BMPs (put 'em on the fridge, Mom), etc. But the shareware version provides a healthy dose of fun, so check out **PTTD.ZIP** (160K) for the kiddies and keep the mouse cleaning fluid handy!

### CALENDAR MASTER

Well, perhaps not a master, but capable

Need to print a **wall-style calendar with events listed** each month? Perhaps Calendar Master will be your solution. It's **nothing fancy, but the output is reasonably attractive** and even better, very **functional**. Add events to each day with a quick click, and make them a one-time only or recurring occasion. The on-screen view will only show you the number of events on that date, but **the output will list your duties in tiny type** (*bifocal alert!*) with plenty of space for additional notes. Wolly was not too impressed with the fact that the maximum five week spacing didn't sit well with Calendar Master since January 1994 stretches to six weeks; it stuck the 30th and 31st up on the top line. A compromise, I suppose. [CALMAST.ZIP](#) (68K) was pretty resource-hungry, too, but it's probably not something you'd use more than once a month, anyway, right? Registration is **\$10.00**.

## TRUE TYPE FONTS

A couple

*Handwriting* [HANDWR.ZIP](#) (37K)

*עברית* [HEBSCRIP.ZIP](#) (12K)

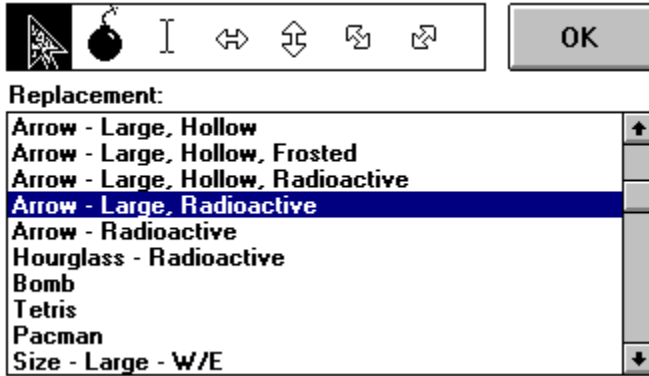

$H_2O_2$   $\pi$  [CHEMFONT.ZIP](#) (152K)

**ChemFont's** capabilities go beyond the normal True Type font. It **includes the Type 1** files as well as a **freeware macro** program to allow quick **entry of chemical formulae and symbols**. As a bonus, atomic weights are available through two key macro recall.

## ANIMOUSE

Dance, cursor, dance!

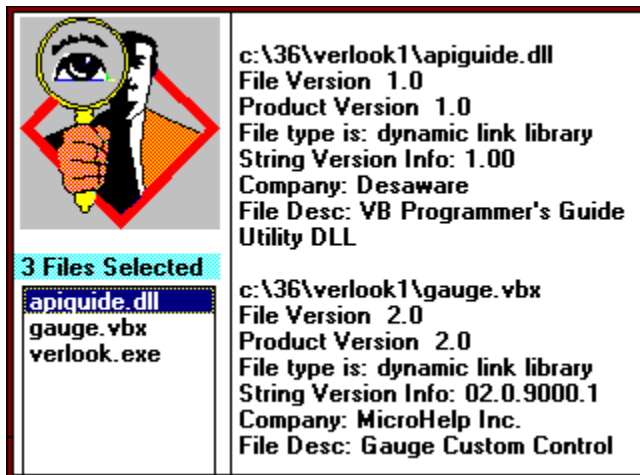

Rid yourself of those boring cursors and especially that crummy hourglass that you stare at far too much. Animouse lets you **choose from animated replacements** for arrows, too. It didn't seem to take much Windows resources to run, either, though it did bomb out of me a couple times during configuration. Strike a blow for desktop individuality and register [ANIMOUSE.ZIP](#) (26K) for **\$10.00**.

## VERLOOK

Who's who - what's what?

Ahh, what mysteries lie within these oddly named files within our directories. **Peek into the dark corners of VBX, DLL, DRV, EXE and FOT files and perhaps learn of their origin, their version numbers,** and print the secrets of the universe. Courtesy of author and self-proclaimed *Techno-Weeney* William E. Booth, [VERLOOK1.ZIP](#) (38K) is **freeware**. Thank, Wm. This may help me figure out what all those odd files are that over-populate my drives. Wolly should note that some files contain no such ID information to display.

# NOTE SWITCH

Auto-annoyance-abater

## NoteSwitch Version 1

This simple program solves the **occasional annoyance of Notepad Overload**. You know, when you **click on a TXT file associated with Notepad, and it's too big for it to handle**. Instead, associate the TXT extension to Note Switch, and if your target is too large for Notepad, it will automatically load into Write, or any other program you configure. **NSWITCH1.ZIP** (8K) is handy, and can be yours for **£2** sterling. (Check your Sunday paper's business section for exchange rates, or move to the UK and pay attention.)

# QUENZAR'S CAVERNS

Throwback, but don't throw it back

If you remember the days **when the 48K Apple II+ ruled the earth** (with the occasional Sinclair interloper), you may enjoy Quenzar's Caverns. Back then graphics meant you had lines (oooooh!) besides alpha-numeric characters, not this fancy bitmapped stuff. Quenzar's Caverns is **definitely a throwback to that era**, and will probably be roundly booed by the Nintendo (excuse me, *Super* Nintendo) generation (what, no blood?). But if you, too, are a throwback, **you might enjoy the simple pursuit of this essentially text-based adventure** with the occasional graphic just to excuse its presence within Windows. Not for everyone (but then people still play Parcheesi, don't they?) but perhaps for someone, **QUENZR12.ZIP** (167K) can be registered for **\$6.00**.

# POWERLINE OFFLINE READER

At some point, perhaps

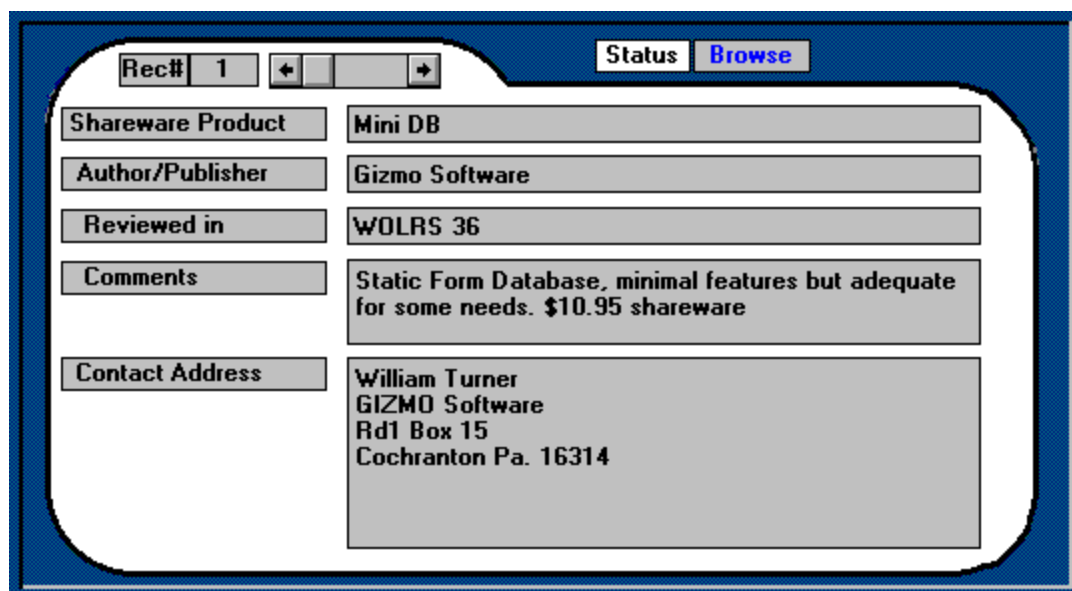

QWK	Conf	REP	Fold	Art	Tag	Write	Reply	Save	Index	Prev	Next
Conf: 0 Main Board		Num: 24345		12/26/93 10:32		Recvd		6 of 12			
From: FRANK MAHANEY				Ref: 24331							
To: JIM SHIELDS											
Subj: WOL & THE SYSOP										Public	

-> Been on many boards over the years, and without a doubt this is one  
-> of the absolute finest I've ever logged onto. In reading some of the  
-> messages to and from the members, I'm especially impressed by the way  
-> you respond to queries. Unlike many SYSOPs, you don't seem to get

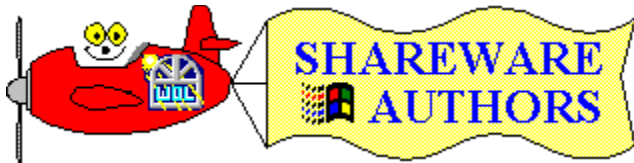

Wolly got socked by another off-line mail reader this week. Powerline Offline Reader is the first release of a **QWK packet reader**, this time from across the pond. As is seemingly the new tradition with the first version of new mail readers, it threw me out and closed a few times, but on the whole worked ok. Powerline OLR brings some decent features to the field of battle, such as **folders for saving messages, bookmarks, carbon copies, multiple signatures**, and other little touches, but the interface looks a bit primitive. What it lacks in look it makes up for in speed. Wolly **paged through his packet smoothly and the ANSI views were fine** when he turned them on, in spite of POW's Visual Basic origin. You may want to give **POW10.ZIP** (163K) a round in the ring or a more thorough workout that Wolly, although at **\$35.00** (or £23.50 including VAT) it would seem that it is **at a disadvantage when compared with much of its competition**, in feature, functionality and price. We'll watch closely as this program matures.

## MINI-DB

Appropriately named

If you have a **very basic database** need, Mini-DB may serve it. What you see in the illustration is what you get. You have only **five fixed fields** that you can **custom name**, with fields #1 through #3 limited to 50 characters each, #4 no greater than 100, and #5 limited to 200 characters, and a maximum of 500 records per database. The **display, as seen, is unalterable**, though there is an option to show records in a **spreadsheet type display**. Reporting is virtually non-existent, other than a record dump whose data ran off Wolly's page. Mini-DB does have a **query feature** that will search any combination of the five fields you specify. Minimal needs = Mini-DB. It **looks good and works well**, but **MINIDB10.ZIP** (432K) **will not take you far**. However, the price is also mini: **\$10.95**.

click me

## KEY SEARCH

Lookin' for Files in all the wrong places . . .

Have a collection of files? **Need to find all those with references to "Wolly"**? Of *course* you do! Let KEY Search **log your files**, which will take a while, but then let it look --- **now *that's* quick!** KEY Search **creates a database of files and their words** based on your requirements and cross references of all the files you choose by extension. Files with no words? Create your own keywords and/or description. If you want to **find any file with a mention of up to six words strung together** with "and" or "or", this program will list them for your pleasure, and quickly. Especially pleasing are the **MDI, drag and drop, and associative availabilities** of the found box contents. A quick double click and you're on your way. **KEY101.ZIP** (128K) comes with worldwide registration abilities; **\$39.00** is the US fee.

## SUNSHINE

Hypertext Highway

Sunshine is a **well-crafted file using Windows Help** that provides hypertext definitions and guidance through its sometimes confusing world of **computer words and acronyms**. A "For Absolute Beginners" section starts the novice from scratch, and the full document explains buzzwords and many elusive vocabulary words so you, too, can sound computer literate while hanging out at Radio Shack. It's **a bit confusing** to wander about the modules, but you can page through it easily and always escape onto one of the readily offered tangents to further explore a topic. Perhaps useful, but Wolly thinks **UIE104.ZIP** (239K) is **a bit pricey** at **\$40.00**. A tutorial on the Zip utility is included with the registered version.

## BANK EXPERT

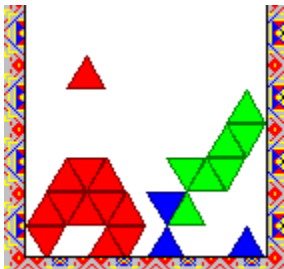

But obviously not a programming expert

ACCOUNT	Check no.	100
Home	Date	01-03-94
Pay to the order of	Wolly	\$ 1.38
Comments	Rough around the edges	

Wolly never gets used to **irrational shareware**. What frightens him is that this is version 2.2, and *it* never really gets off the ground. It's a real hodgepodge that starts off with a DOS install, and what looks very **DOS-like entry and message screens** that died and threw Wolly out with an error message. Bank Expert purports to be a **banking accounting system**, but Wolly wouldn't trust it with his piggy bank. More amusingly, **WBANK22.ZIP** (93K) registration is \$20.00. The author should take a walk though his nearest software store and see how much the far more competent and fully featured commercial competition is selling for (or even being "given away"). **This type of release gives shareware an undeserving reputation as a rip-off.**

## TAZ

Razz!

Taz is one of two games that came to Windows OnLine this week (the other being Patterns) from a single entity. This one is **similar to Tetris** in some ways, but far less engaging. Try to create the displayed shape all in one color. Then the next one. What to do with all the other triangles piling up? Star Graphics wants **\$32.99** for **TAZ.ZIP** (51K). Reality mode <on>, guys!

*written by*

*as told to Bob Gollihur*

## FM APPLIC

Despite the fact that I rarely use Program Manager as my shell these days, I continue to use the Microsoft Windows File Manager for file management duties. I must confess that one reason is the "familiarity factor". Don't get me wrong - I do *not* feel, nor have I ever felt that File Manager is a perfect tool, but for the most part, it really does suit the way I work. Though there have been at least a half dozen serious contenders for its place on my hard drive, each with their own particular advantages, none have yet won the day. Like most of us, I am a creature of habit, and I've grown quite comfortable in this particular easy chair.

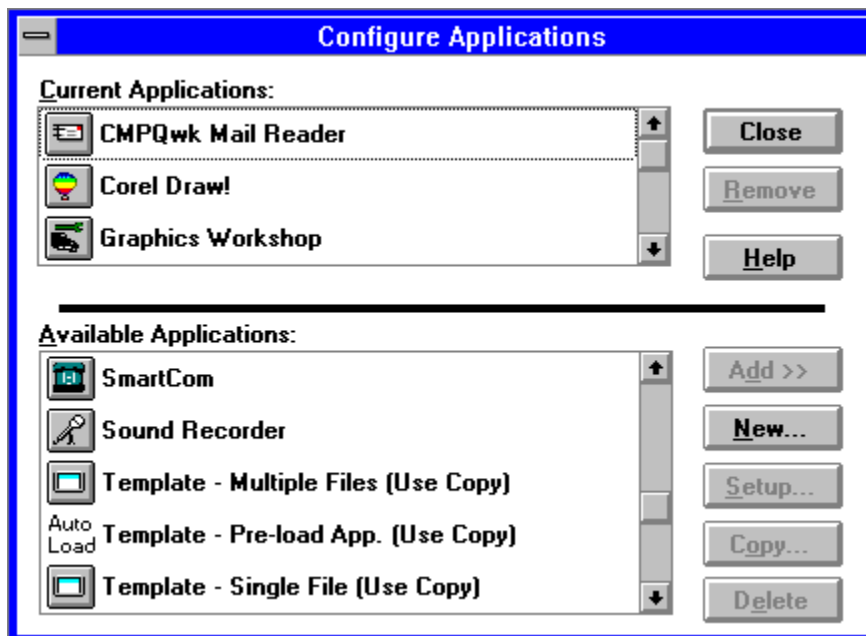

Comfort notwithstanding, I enjoy giving serious consideration to worthy newcomers, and have, on occasion, almost made the big switch. Not long ago, when I was *just* about to opt for one of the alternatives, I stumbled upon WizManager, a brilliant shareware add-in for File Manager. (Feature Review in WOLRS #16) Its enhancements in speed, functionality, and configurability convinced me in less than a day to both register the program and stick with FileMan. It improves and far surpasses even the upgraded version of File Manager that ships with Windows for Workgroups v3.11. Since then, I have made it a point to look at new File Manager add-ins, hoping to fill in the last few gaps.

"When what to my wondering eyes should appear..." (As I write, it *IS* still the season.) but *FM Applic 1.1* - This looks like the one! "And what gaps does it fill?", you ask. Well... just make yourself comfortable for a few minutes and let me tell you about one of Santa's more impressive 1993 Christmas gifts to Windows users.

The Windows structure provides a user-configurable mechanism called **association** which embeds the relationship between a given file extension and a given program. One such association provided by default, for example, is between the .BMP extension (which denotes a bitmap) and the Windows Paintbrush program. As a result, whenever you double click on any filename with a .BMP extension in File Manager, Paintbrush is initiated to display that file. Likewise, double clicking on any filename with a .WRI extension automatically starts the Windows Write program.

How often have you set out to locate a particular file, or group of files, in File Manager, to use or view it (them) with some program *other* than the established, associated program(s)? In this case, the double click mechanism is unavailable to you. In fact, this task requires an annoying number of additional steps. First you have to bring Program Manager to the foreground, open the group in which it resides, and double-click on an icon to start the program. Next, select File|Open from the program's menu bar, navigate *again* through a dialog box to the desired location, *finally* engaging the target file(s).

Wouldn't it be *much* easier to simply highlight the file(s) in File Manager, move your cursor to a toolbar button or menu item, then with only one or two clicks launch the target file(s) in the desired program? *FM Applic*, co-authored by Howard Knight and Larry Diederichsen, makes it easy to do exactly that! Furthermore, it allows the user to launch a program with any appropriate configuration of **arguments**. Not only does it perform as an integrated menu-based File Manager utility in Windows 3.1, but in the Windows for Workgroups File Manager, there is the added advantage of fully configurable use of the provided toolbar.

*FM Applic* permits you to easily customize the treatment of any file. It is so thoroughly customizable, in fact, that if you wanted to, you could have four separate menu items all set to launch the *same* program, but configured so that each launches the program in a different way with specific command line **arguments** to suit different purposes. You've noticed that I have used the term, **arguments**, a couple of times now. Let's take a moment to understand what this means so that you can fully appreciate what this program does.

In this context, **arguments** are defined as the set of instructions that determine exactly how a file will be processed by a program. In *FM Applic*, command line arguments can be command parameters, argument fields or both. Most of you are probably familiar with the concept of command line "switches". When a program can function in several different ways, the user must provide the command parameters, or arguments, that tell it exactly how to behave

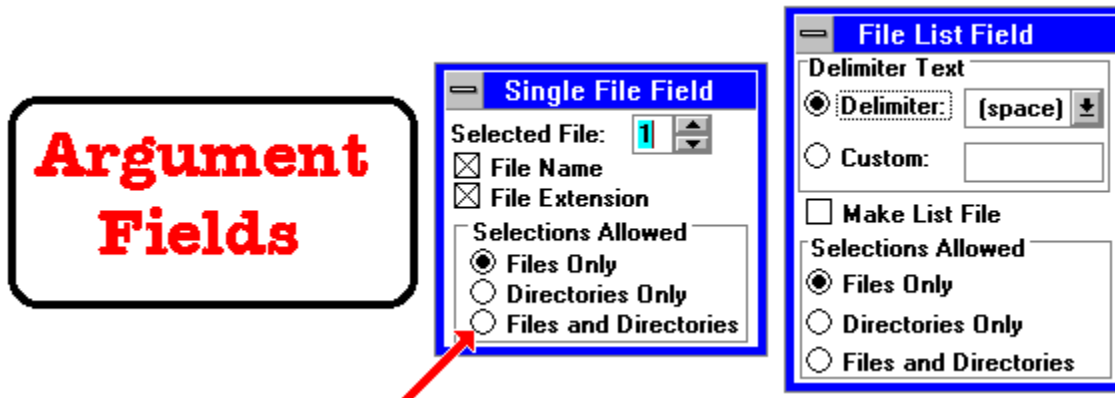

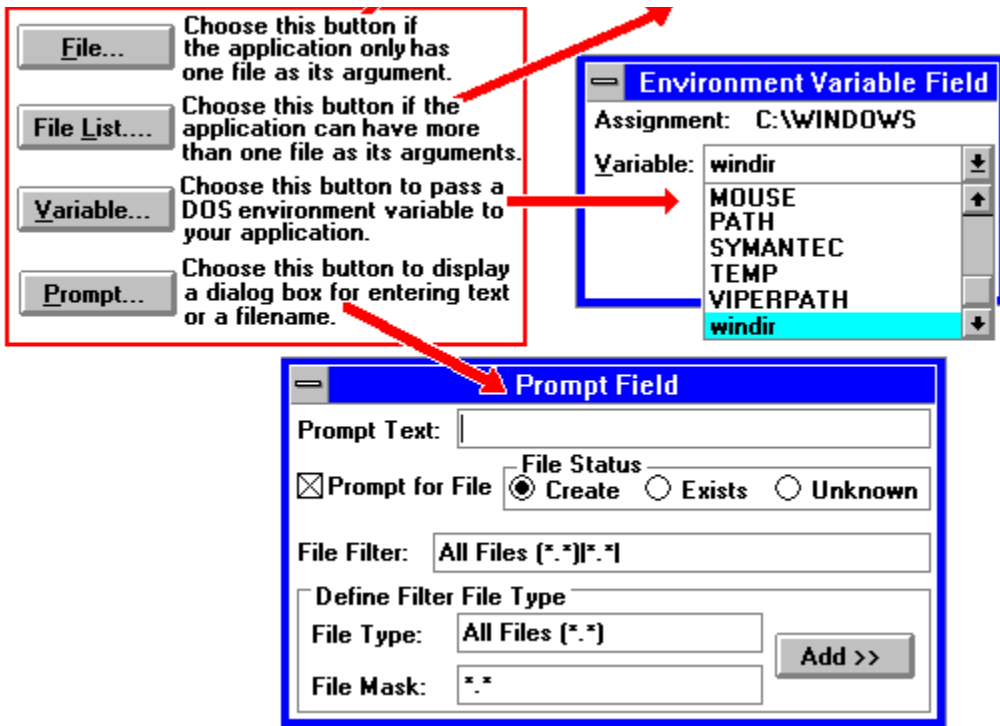

when it runs. By convention, these arguments are entered as switches on the DOS command line. A command line with switches looks like this:

**NDD.EXE c: /quick /r:filen.ame**

In this example, the switches are telling the Norton Disk Doctor program to (**c:**) examine the C: drive, to (**/quick**) skip examination of the System area, and to (**/r:filen.ame**) write a report of its findings to a particular file. If the switches are not included in the command line, the program first asks for these details before running. Some programs that accept command line arguments do not absolutely *require* them to run. In the absence of arguments, such programs don't stop to ask for details. They simply run with a default configuration.

In the Windows environment, arguments are most often passed to a program *after* it is up and running. The user provides specific instructions to the program by clicking on provided menu items or toolbar buttons. This is where *FM Applic* comes in. It allows you to preconfigure and store sets of instructions for any program, so that when a program begins, using the file or files you have designated, it is *already* running exactly the way you want it to. The argument fields provided by *FM Applic* enable you to easily control how files are presented to a program. You can use the **File**, **File List**, **Prompt**, and **Variable** buttons to construct argument fields. Simply click on one of these buttons, fill out the information in the dialog box, and the argument field will appear in the Arguments text box at the current cursor position.

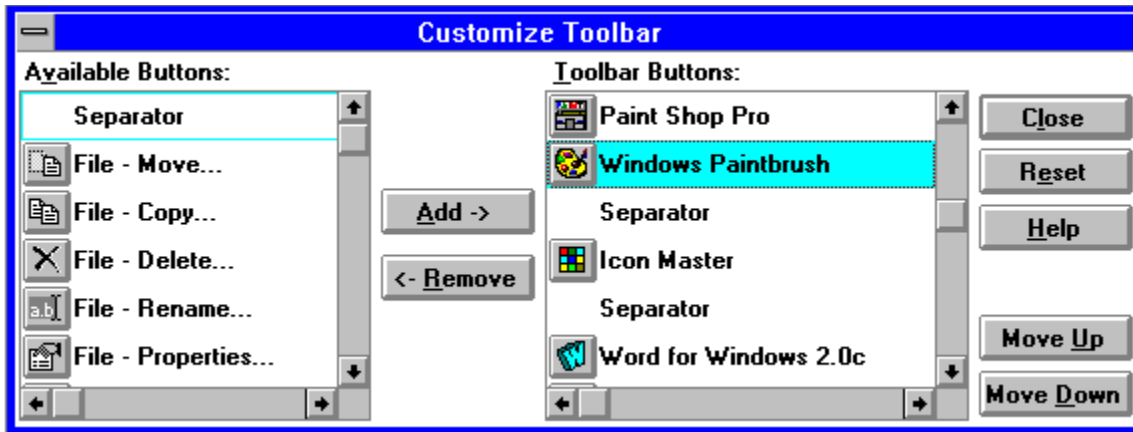

*FMApplie* installs an item named "**Applications**" in the menu bar of File Manager. When you click on this item, a drop-down menu appears, listing the items you have configured. Files that you select in the File Manager's current directory window or search results window become the input to the application you choose. For example, a very useful application that you will want to add is your favorite text editor. Simply click on the file that you want to edit, select your text editor from the Applications menu and, presto! You are editing the selected file with your favorite editor.

If you have not yet upgraded to Windows for Workgroups v3.11, I highly recommend that you do. Don't let the "Workgroups" tag throw you off. 3.11 is the upgrade to 3.1 whether you are using a single PC or an entire network. The many improvements throughout the program make Windows an even more enjoyable place to work. One of the more visible enhancements is the configurable toolbar that is now an integral part of the upgraded File Manager.

*FMApplic* provides the means to fully customize this toolbar with up to **60** different buttons and/or Applications menu items in the registered version. The distributed shareware version permits up to **8** at one time. You can associate an application with one of the many toolbar buttons provided with *FM Applic* or you can convert an icon (from an icon file) into a toolbar button for your application. Another useful function is included which allows you to assign your favorite application to the right mouse button. Every time you click the right mouse button, you are running your favorite application with the files that are selected in the File Manager. There is also available a special version of *FMApplic* for Windows NT.

All of this may seem a bit like a foreign language to you, but even if you're unfamiliar with these sorts of manipulations, you'll be surprised at how easy it is. Procedures are set forth in a very coherent fashion and are implemented mostly through simple push-button copy and fill-in-the-blank steps. The online help provides well-written, easy to understand explanations whenever you have a question. Like most well-written software, there is a bit of a learning curve, but the relatively small investment in time spent learning and configuring pays big dividends in the elimination of quite a number of repetitive tasks. The ultimate payoff, of course, is that *FM Applic* speeds your work by taking maximum advantage of the graphical interface. Frankly, I found it to be a **lot** of fun.

Wanna have some fun and work more efficiently? Of course you do! Give *FMApplic* a try. I'm certain you'll agree that it "fills the gaps" in **your** copy of File Manager. **WOL** members can find *FMApplic V1.1* in the New Windows Files Library #500 as **FMAPLC.ZIP**.

## NEW WINDOWS FILES

RED

*The following file listings became available on Windows OnLine two weeks prior to the issue date, and may not yet be available on some bulletin board systems. Many more files were added to our library during that time, but only files of recent date are listed here. Members of Windows OnLine can download WOLRECNT.ZIP or use our mail door to obtain a complete listing.*

### WINDOWS - NEW UPLOADS from December 19, 1993 through January 1, 1994

(older files omitted; graphics and sound files edited to limit list size)

3DXWD125.ZIP 65424 12-31-93\* Cyberspace Crossword Puzzle and Cyberspace Cruiser v1.25: three dimensional crossword puzzle for MS-Windows; req VBRUN300.DLL; 12/21/93; Ivory Tower Software. **Wolly was confused by this in WOLRS 14. (but then Wolly confuses easily) <W>**

4WINS202.ZIP 20846 12-27-93 4 WINs v2.02: MS-Windows version of the classic **Connect 4 game**; req VBRUN300.DLL; 12/07/93; Perry Prust.

ACCEL1.ZIP 20058 12-27-93 Accel-One - helps **investigate questions about the motion of an object undergoing constant acceleration in one dimension**. It provides graphical, numerical, and analytic solutions to such problems using either Newtonian or special relativistic expressions. Any 3 of 5 independent variables are allowed. VBRUN200. Files: 3 Oldest: 8/14/93 Newest: 9/12/93

ACMAG2.ZIP 97896 12-21-93 ELECTRIFIED ACCESS MAGAZINE ISSUE #2. An electronic **magazine covering MS Access**. It is a Windows help file with hypertext jumps, pop-up windows, color screen shots and more. Files: 6 10-21-92...12-16-93 New:

5BUTTHD.ZIP 51102 12-21-93 Beavis & Butthead Screen Saver - is a Windows 3.1 screen saver module featuring those lovable lame-brains from MTV. (Last Revised: 10/06/93)

AESOP12.ZIP 344421 12-29-93 Revision 1.2 of "**Aesop's Fables**", a **hypertext book** in Windows 3.1 Help format. It has been converted to WinHelp format using a verified public domain ASCII text that is now circulating the Internet. Don't let the word "fables" fool you, this is quite an entertaining yet scholarly work, suitable for the entire family. It is hoped that this document will be widely disseminated throughout the world, so you are encouraged to upload it to your favorite BBS sites and distribute it among your friends. Freeware no registration or purchase required. Copyright 1993 by Jon E. Noring. This revision replaces revision 1.1 with several improvements to aid readability and to update some administrative details. New:12-27-1993 Old:10-30-1993

AMAZE402.ZIP 187075 12-26-93 **3-d maze game** for Windows. (Last Revised: 12/06/93)

AMI\_MCRO.ZIP 14131 12-22-93 Two **macros for Ami Pro**. (Last Revised: 12/08/93)

ANIMOUSE.ZIP 25565 12-30-93 Animouse replaces your Windows 3.x mouse cursors with more interesting **animated and non-animated cursors** that you choose. It's a fun way to add a personalized touch to your Windows work environment. 12/09/93

APFF11.ZIP 75447 12-22-93 Amifind v1.1, **Ami Pro file finder** (Last Revised: 12/09/93)

APPLYOLE.ZIP 50287 12-29-93 **Applying Ole 2 - from Microsoft** - WinWord 2.0 format. (Last Revised: 12/15/93)

ASTLITE.ZIP 172004 12-27-93 Astro-Lite 1.1 is a Windows program that will pop up each morning and give you your horoscope for the day, in either a serious or funny version. Requires Windows 3.1 and a '386 or better PC. Shareware (\$20) from Flat Broke Software. Files: 9 (Last Revised: 12/03/93) **Definitely fun. See WOLRS #20. <W>**

AUTOWAV.ZIP 9506 12-27-93 AutoWave - lets you **play a WAV file by simply double-clicking** on the filename in File Manager. Requires WIN31, a sound card, a mouse, and a hard disk. VBRUN200 is also required. Last revision date: 10/11/93

AVLWIN.ZIP 20202 12-30-93 Windows **binary tree program** (avl) with source written in c and produces graphical output great way to learn a bunch! (Last Revised: 12/20/93)

BIMPZIP2.ZIP 7328 12-31-93\* Save disk space! **Keeps Windows wallpaper BMPs compressed** until you need them. Also picks a new bmp each time you start Windows. Needs VBRUN300.DLL not included. Files: 5 12-21-93...12-22-93

BMPZW200.ZIP 701393 12-20-93 BitMapZ for Windows 2.00 <ASP> **Bit map slide show** for Windows. Easy to setup and use. Allows an infinite number of slide shows with up to 32000 slides per show! YOU determine background, duration, priority of each slide PLUS you can even add clear text titles to each slide. From Unicorn Software Limited Files: 9 12-09-93...12-11-93 New:

BRAINJ17.ZIP 55356 12-27-93 Brain Jam v1.7: MS-Windows **solitaire** game/ card puzzle; 12/08/93; Brain Jam Pubs.

CALMAST.ZIP 67506 12-23-93 **Print calendars with events added.** Requires vbrun300. (Last Revised: 12/06/93)

CATALINK.ZIP 1316033 12-28-93 PECOS (personal **electronic catalog & ordering** system), a \$99.95 program. Requires Win 3.1. Point & click product info & availability etc. 24 hrs a day, 7 days a week. Last revision date in archive: 12-08-1993.

CDMW210.ZIP 866557 12-20-93 CDMaster For Windows 2.10 <ASP> Helping you **Master your CD Library.** It does what other catalogers only dream of! Max flexibility (user defined fields, pick lists & more!) UNLIMITED Tunes, and individual artists for each. Out puts to printer/screen/file. Labels, 3X5 & Rolodex cards. Can Pick CD! on every field or combination, even Tune! From Unicorn Software Ltd. Files: 10

CDPLAY34.ZIP 313851 12-21-93 CDPlayer v3.4 Windows **Audio CD Player** for both Windows and DOS. Provides all the functions associated with a normal CD player together with the ability to catalogue and search your CD collection. Features include Custom, single, shuffle, and repeat program play. Fit tracks to time, track skip, music search, replay track and pause. Plus browse through Disc catalog. From Jupiter Software. (Last Revised: 12/10/93)

- CHEFV18.ZIP 64624 12-31-93\* Chef v1.8: collects your favorite recipes and lets you multiply/divide them; eight userdefinable categories to organize your recipes & cut/copy/paste between categories; requires MSAES110.DLL, MSAJT110.DLL, VBRUN300.DLL, VBDB300.DLL; 12/11/93. **Great. Where do I get all these obscure (excepting VBRUN) support files?? <W>**
- CHEMEQ21.ZIP 5196 12-24-93 **Chemical equation formatter for Word 4 Win v2.0x**  
 Performs these chores: Shrinks and subscripts state designations, (s), (g), (aq), (l). Replaces '=' with a single headed arrow and '<>' with a double headed arrow. Replaces '.' (period) with a large dot indicating water of hydration. Subscripts and shrinks numbers designating atomic multiples; numbers designating charge multiples; plus signs and minus signs, that it thinks are charges. **Notice:**

*Windows OnLine (BBS) makes every effort to identify and to post only shareware, freeware, demos, working models and drivers (software files and programs) for it's membership which are intended for free public distribution. Due to the lack of documentation and other descriptive files contained within certain archives, it can be quite difficult to identify and remove improper and otherwise copyrighted files and programs from our file*

*listings.*

*It is the policy of Windows OnLine (BBS) not to allow such improper and illegal files and programs on the BBS, at any time. Our Readers and Members are asked to cooperate with us in our efforts to identify such improper files and to assist WOL in its efforts to remove ANY inadvertent inappropriate file postings.*

*Thank You.*

## NEW OS/2 FILES

RED

*The following file listings became available on Windows OnLine two weeks prior to the issue date, and may not yet be available on some bulletin board systems. Many more files were added to our library during that time, but only files of recent date are listed here. Members of Windows OnLine can download WOLRECNT.ZIP or use our mail door to obtain a complete listing.*

NOTE: DOS, OS2 and Windows newly uploaded files are located in Directories 148;149;150.

*The following directory contains all new DOS files to WOL*

<b>148. DOS</b>	<b>- NEW UPLOADS</b>	<b>624</b>
	<b>83,788,485</b>	
<hr/>		
<b>Totals For All DOS Files</b>	<b>2,296,098,105</b>	<b>20,185</b>
<hr/>		
<b>Grand Totals</b>	<b>3,734,862,765</b>	<b>32,154</b>
<hr/>		

*This listing is as of September 1993 and is presented as an example of the tremendous number of WOL directories and files available to members. Remember, these are clean file listings, purged of useless duplicates or obsolete files. Windows OnLine™ works hard to gather the*

*best and latest for its members!*

**Windows OnLine™ brings**  
**THE BEST AND LATEST FILES.**

**26,000 Windows - 3,600 OS/2 - 35,000 DOS FILES ONLINE**

**NO JUNK** - we obtain the files ourselves, screen them thoroughly and edit their descriptions.

**THE LATEST FILES and MORE FILES** - we get them **EVERY DAY!**

**MINIMAL DUPES** - we clear off the old when we bring on the new.

# WOLRS REVIEW INDEX

## Issues 1 through 35

This index is presented in order of program topic. If you want to search for a specific shareware program, you may do so by selecting EDIT and COPY, and then copying the listing to clipboard and pasting it into Notepad. Use the program's search feature to find the program in which you're interested.

Activity Monitor	Watchdog	9

**Wolly uses the following system  
to evaluate programs auditioned  
for the Shareware Briefs:**

Siemens UM 486-33DX  
16 megs RAM, 256K cache  
17" .25 Sony CPD-1730 Monitor  
Diamond Stealth 24, (S3, 1 meg)  
2 IDE Drives 245, 210 megs  
Colorado 250 meg Tape Backup  
Soundblaster 16  
Panasonic CD ROM 150kb, 390ms

**A second system is also used as  
an additional test platform:**

386-25DX  
4 megs RAM  
14" .31 VGA  
Generic 256K VGA  
1 ESDI Drive w/Stacker 3.1

## **Would You Like Your Program *Featured* or included in the Shareware Briefs??**

Each week *Wolly* looks at the newer programs that have been posted on **Windows OnLine™**. *Your* program could be included.

**UPLOAD** your creation to **Windows OnLine™** *immediately* upon availability. Call **510-736-8343**

You may leave a (C)omment to the Sysop; a menu will allow you to designate the recipient. If you would like, you may send pertinent supplementary material such as press releases, registered copies and other information to:

**Bob Gollihur, Editor**  
**WinOnLine Review™ Shareware Edition**  
**Seven Baywyn Drive, Ocean View, NJ 08230-1060**

(609) 624-1470 - CIS 71334,2065

Mail early to be certain it will arrive during the same week you upload your program to Windows OnLine™.

Please be advised that submission is no guarantee of appearance or a favorable review from Wolly in the Shareware Briefs. However, all current Windows shareware newly uploaded to Windows OnLine will appear in the New Files column.
