

# Microsoft Windows® NT Version 3.51

## Hardware Compatibility List

---

The following computers and peripherals have been tested and are supported with the released version of Windows NT 3.51. Some computers may be sold with peripherals that are not yet supported by the Windows NT operating system, or that require a device driver supplied by the manufacturer. We have not tested every computer and/or device in all possible configurations. Please refer to the Release Notes for additional compatibility information when installing Windows NT 3.51.

Attached as an addendum is the Windows NT 3.51 PowerPC Hardware Compatibility Section. Refer to this section for information regarding tested PowerPC architecture systems and devices.

If you encounter problems while running Windows NT 3.51, please file a bug report by filling out 'PROBREP.TXT' located in the \i386 directory on Windows NT 3.51 CD-ROM or floppy disk #2 of the Windows NT 3.51 installation disks and submit it as instructed in PROBREP.TXT.

Items listed with footnote number <sup>1</sup> require one of the device drivers available in the \DRVLIB directory on the Windows NT 3.51 CD-ROM.

**Updates to these lists will appear in Library 1 of the WINNT (GO WINNT) forum or Library 17 of the MSWIN32 forum (GO MSWIN32) on CompuServe® Information Services.**
