As time goes by there will be version for separate versions for OS/2 and all the above Windows Products.

HISTORY

July 9th, 1995

This is mainly a maintenance release. There have been a couple of additions to STCom as well as a few fixes. The following is a list of additions and Fixes:

- Please make sure you unzip the STCOMxxx.ZIP Using the -d Command. This command creates the proper directories needed for a successful installation.

Example: PKUNZIP -d STCOM103.ZIP

- Fixed the truncation and addition of a bar character to the BBS name in the dialing dialog.
- Added ZModem-8k functionality to both Uploads and Downloads.
- Added the ability to select different phone books on the Phone book editing and dialing dialogs.
- Updated the Help file to correspond to the above changes.
- Updated the Setup program to warn you about the -d command when unzipping the STCOMxxx.ZIP archive.
