Overview

Easy Macro allows you to start recording and playback your keystrokes without leaving your application. If you register the program, you can hide the icon, so that the macro function appears to be built into Microsoft Windows. You may change the keys to any of the function keys so that they do not conflict with your favorite software.

Playback

To playback, you must have recorded a sequence of keystrokes, then hit the Playback key.

Stop Recording

Hit the Start/Stop key.

Start Recording

To start recording, hit the Start/Stop key. All of your keystrokes will be recorded until you hit the Start/Stop key again.

Set the Start/Stop Key

The Start/Stop function key is the key that you will use to start recording and the key that you will use to stop recording.

To set the Start/Stop key, double click on the Easy Macro icon. Select a key from the Start/Stop key drop-down box. Hit OK.
