

Index to MIDI Christmas

Thank you for purchasing MIDI Christmas. This CD-ROM contains a variety of music for the Christmas season, from several different areas of the world over the past centuries. Each piece of music is stored in several different formats. There are MIDI files for FM cards and MIDI files for wavetable and sample based cards. The music is also recorded in Windows WAV format, with a resolution of 16-bit stereo, and a sampling rate of 22.05 kHz. Below is a listing of the directories on this CD. All documentation is in Windows Write and ASCII text formats.

Directory	Contents
Root directory	This file
Docs	Text files with song titles, MIDI information, WinJammer information, and song text.
Mid-FM	Type 1 MIDI files for FM cards
Mid-FM\Type 0	Type 0 MIDI files for FM cards
Mid-WT	Type 1 MIDI files for wavetable and sample based cards
Mid-WT\Type 0	Type 0 MIDI files for wavetable and sample based cards
WAV	All music selections in WAV format
WinJam	Files for installing WinJammer* to your machine

***Please note that your purchase of this CD-ROM does NOT include the price of WinJammer. WinJammer is provided here, by the kind consent of the author, for your evaluation. If you like WinJammer, and wish to continue using it beyond the evaluation period, please register WinJammer with the author as per the instructions in WinJammer. Once registered, the "nag" screen that is displayed when WinJammer or WinJammer Player is started will no longer appear. You will also receive technical support as outlined in WinJammer Help. WinJammer is provided here through the shareware concept, which allows you to try the software before you buy it, insuring you only buy what you like and find useful.**
