

## **Thanks for Trying the Responsive Time Logger Demo!**

This working demo is exactly like the full-featured version of Time Logger except that the number of time records allowed is limited, and you may not *print* time reports. Note, however, that since print preview is available, you can see how your time reports will look when printed.

Just double click on the Sample icon to get started. Press the F1 key if you need help.

### **Expenses**

Time Logger can track your expenses, but the online help doesn't have a search entry for this topic! For information on tracking fixed expenses, examine the help topic entitled "Edit Record Dialog."

### **Pricing and Ordering Information**

As of July, 1995, Responsive Time Logger costs only \$79. For current pricing information, or to order the full-featured version, please call us today at 800-669-4611.
