Hello GatorFTP Users:

I have done yet a little more work on GatorFTP.

Bugs:

1) The code to animate the icon during file transfers has evidently found a crack in NeXTstep 3.x's venerable armor. Until I am able to sort it out, it has been removed for this release.

New in Version 1.5:

1) Whenever you select a file, the modification date is now displayed next to the file size.

Enjoy,

Mike Mezzino
