NXFAX 1.04 OVERVIEW

NXFax is a reliable, high speed, fax solution which integrates perfectly with NEXTSTEP on Motorola and Intel based computers. Anything you can print you can fax just by pressing the Fax button on the Print Panel. You read, log, assign, and archive your faxes with the NEXTSTEP FaxReader. NXFax works perfectly with your favorite data communications programs like UUCP, SLIP, PPP, tip, Kermit, and MicroPhone.

Winner of the Best of Breed award for Communications, NXFax is at work in thousands of locations world-wide. NEXTWORLD "highly recommends" NXFax, calling it "our favorite fax-driver software."

NXFax offers the following features:

· sends and receives faxes under NEXTSTEP
· shares the serial port with other applications
· compatible with tip, UUCP, SLIP, MicroPhone, and other communications programs
· adaptive answering directs incoming fax and data calls
· accessible via networked machines
· communicates with the NXFax Monitor to provide user-level feedback
· demo mode allows unlimited single page sending of faxes
· $135 purchase price

The NXFax Monitor application offers:

· transmission status display
      current modem state
      remote connection identifier
      connect speed
      fax resolution
      pixels per scan line
      inter-scan line delay
· halt button terminates transmissions
· monitoring of networked fax drivers
· animated icon
· user preferences control automatic launch

PURCHASING NXFAX

You can purchase NXFax directly from Black & White Software for $135.   You will receive the award winning NXFax software plus extensive on-line documentation and a password. Ordering information appears at the end of this announcement.

DEMO

You can test NXFax before you decide to purchase. Without a password, NXFax runs in demo mode allowing you to send (but not receive) any number of single page faxes.

INSTALLING NXFAX

NXFax requires that you attach a Class 2 fax modem (refer to the supported modem list below) to your computer before the fax driver is activated. To install NXFax:

1.   Turn on your modem and log in as **_root_**.

2.   Launch the NXFaxInstaller by double clicking on NXFaxInstaller.app.

3.   Choose **_Info_** from the Installer menu.   Choose **_Help_** from the Info menu.

4.   NXFax 1.04 users should read ªThe Basicsº to familiarize themselves with NXFax's on-line help.   Click on the topic ªInstalling NXFaxº and follow the instructions there.

SUPPORTED MODEMS

NXFax has been tested with the following Class 2 fax modems:

Boca Research	- Boca 14.4	Supra	- SupraFAX 14.4 v32.bis
Intel	- Intel144/144E	Telebit	- WorldBlazer, T3000
MultiTech	- MT1432BA	Zoom	- VFX
Practical Peripherals	- FXSA, FXMT, FXPKT	ZyXEL	- all U-1496 models

Note that NXFax does not support Class 1 modems.

ZYXEL MODEMS

ZyXEL builds some of   the best and most reliable fax modems available. NEXTWORLD agrees saying that the "ZyXEL modem is the best we've seen."

Black & White sells specially priced NXFax and ZyXEL packages starting at $470 US. Packages include the NXFax software, 1496E high-speed fax/data modem, serial and phone cables. Shipping is free in the U.S.

UPGRADING FROM AN OLDER VERSION OF NXFAX

NXFax version 1.04 runs on Intel hardware and supports more different brands of modems than NXFax 1.03.   If you are still using a NeXTstation or Cube and not changing modems, you can keep using version 1.03.

Upgrades to NXFax 1.04 are free for registered customers who can retrieve the software from an FTP site or archive site (refer to the section "Where To Get NXFax Electronically"). There is a $15 handling charge for receiving an upgrade via U.S. mail.

NXFax 1.02 users who want to upgrade to NXFax 1.04 must be running version 3.0 or higher of NEXTSTEP.

Everyone who upgrades from a prior version of NXFax will require a new password. Password updates are free for registered users who provide us with a previously registered Host ID.

To request a password update, send

    First and last name
     Company name
    Voice phone
    E-mail address
    System Host ID

NEXTSTEP Version
Modem type and model

Customers with e-mail access are asked to send password update requests to nxfax@bandw.com. If you do not have e-mail access, please fax your update request to 802-496-5112 or call 802-496-8500.

MULTI-ARCHITECTURE FORMAT

NXFax 1.04 is shipped in Multi-Architecture Binary format so that it works with NEXTSTEP on both NeXT and Intel hardware. NEXTSTEP 3.1 (or later) is required to use this version of NXFax 1.04. NEXTSTEP 3.0 users should request a special "NeXT only" version of NXFax 1.04 directly from Black & White.

IMPORTANT NOTE FOR INTEL USERS

NEXTSTEP 3.1 for Intel shipped with a serial driver that does not work for high speed data and fax communications. If you want to install NXFax 1.04 on Intel hardware, you must either use NEXTSTEP 3.2 or obtain an updated serial driver directly from NeXT.
