solidThinking RELEASE 2

Welcome to solidThinking RELEASE 2, a completely modular 3D environment, including modules for Modeling, Animation, Import/Export.

With all the power of the first release, winner of the 1993 Best Of Breed Award for "3D and CAD" programs, "solidThinking RELEASE 2" introduces a new charming interface as well as unique features.

solidThinking RELEASE 2 allows you to create almost everything you can imagine. With its rich set of tools it allows you to design complex 3D models, modify their shapes, surface characteristics and positions in a structured hierarchical environment. You can add an unlimited number of light sources, position your camera and generate a photorealistic representation of your scene at a specified resolution.

Industrial and interior designers, architects, town-planners, advertising managers, publishing consultants, video producers and artists can gain from its power and flexibility thus improving creativity and productivity.

Installation
To install solidThinking RELEASE 2 and PhotoRIB click on associated packages and locate the apps in your Apps folder. Some sample pictures are also included.

Notes
The version included in this CD is not the final release but only a *preliminary demo*

version of the Modelling module. The final release of the program will be shipping on June 21th, 1994.

For this reason some features are not included or disabled.

This preliminary demo version comes with a *Help On Line* that can be useful to better understand how the program works. The Help On Line can©t in any way substitute the *Manual* of the program, essential to fully take advantage of all the power of the program.
