

# On Vacation™

**On Vacation™** is a small and simple NEXTSTEP™ utility designed to configure your computer to let people know you're **On Vacation** or away for an extended period of time. **On Vacation** also allows you to forward incoming messages to any valid e-mail address and inform the original sender that someone else will be responding to the mail.

**On Vacation** will, upon receipt of the sender's message, respond with your reply message. It will only issue your message to that sender once in a 7-day period. Simply turn on **On Vacation**, enter your reply message, hit a button, and when you leave the office your messages will be forwarded to another user or stored in your mailbox.

If you would like a sample of an **On Vacation** reply message, send e-mail to: [vacationdemo@nyro.com](mailto:vacationdemo@nyro.com).

To order **On Vacation** or for additional information, contact **NYRO Technix** as indicated below. Prepaid and COD orders accepted.

Technical note: This product is designed to use the .forward file. This may not work in certain network environments. Source code is available for an additional fee to assist customers with special needs.

Please recycle.

"On Vacation™ is like an answering machine for NeXTmail™. Great little utility, almost as fun as being On Vacation."  
-Hal Fox-Palmer, MACadam Computers

"I use it every time I leave my (NeXT)station. Wish I were On Vacation more often."  
-Meredith Huntington, Transamerica Corp.

"...keeps me from getting the same message two, three, four times. Now the computer tells them I'm away and that I'll reply to their e-mail when I get back. I can even tell jokes when I'm On Vacation."  
-Brian Dempster, CitiCorp

"It's small, it's easy, it's quick. Just the way I want it before I go On Vacation. I especially like knowing that my secretary is getting all my mail when I'm gone."  
-Alexander Stewart, Southland Title Corp.

## On Vacation™

Compatible with  
computers running  
NEXTSTEP™ 3.2 or higher.
