

## **LabelWorks** Design and Print Labels and Envelopes

**LabelWorks** is *the* answer to your NEXTSTEP label printing needs. Whether you need a page of return labels for your home, or you need to crank out a mailing list from a data base, **LabelWorks** is the solution.

**LabelWorks** provides a palette of text and graphics tools with which you can design labels, cards, and envelopes.

**LabelWorks** contains a pre-defined database of over two hundred and fifty popular labels, cards, and envelope products. **Avery** labels and card products in United States *and* European page sizes. **LabelWorks** is the first released product to support **Avery** mini-sheets. Support is included for United States **MACO** labels and **MCS** labels, European **ZwecForm** labels, and **United Ad Label** sizes for your video cassette and tape labelling applications.

Use labels in either the normal horizontal orientation, or in the vertical (sideways) orientation. Switch label types and orientation on the fly. **LabelWorks** automatically adjusts the number of pages for you if needed.

Use the Dynamic Text field tool from the drawing tools palette to create a text template into which fields from records of an imported file will be substituted.

The Data List Manager enables you to import mailing lists from data bases and other products. Records (and their corresponding labels) can be sorted in ascending or descending order according
