PaperSight: Document and Image Management (including X-ray and slide) for the NeXT is also a valuable tool for small and large office automation, desktop publishing, as well as FAX and Scanner Control and Management. Professional PaperSight fully supports many scanners; FAX receipt management and transmission; text and voice annotation; nondestructive markup of images; line draw; whiteout; workgroup functions including workflow control, audit trail, and notification functions; rotate and resize image; and complete NFS compatibility. New "SuperThreading" allows documents to be connected with hypertext links for easy reference.
