

Aligning Objects

You can align objects to the grid or to each other. You can align objects vertically or horizontally.

If you align vertically, you can align objects along their left or right sides, or you can align them by their centers. If you align horizontally, you can align objects along their tops or bottoms or you can align them by their centers.

Choose **Alignment (command-K)** from the Layout menu to set the alignment you want. To align objects, select them and choose **Align (command-k)** from the Layout menu.
