Zoom

You can zoom the display using the three Zoom controls. The radio buttons give you four preset zoom amounts:

2   Two times normal size
A   Actual printed size
(92/72 larger than screen size)
1   100%- normal
.5   Half size

The slider allows you to zoom in to any amount up to 5. If you want to zoom in more, type in the desired amount in the Zoom text field. (See Slider Control under Controls for more information.)

The image will be copied at its normal size when placed in a Layout Board window, so using the Click-and-Drag method of selecting a portion of the image can have unexpected consequences when used on zoomed text. Set the image to normal size before using this short cut method of transferring the image.
