# Impact

# Epidemiology

## Student Objectives

### Goal:
To identify aspects of dying including who, where, when, and why.

### Outcomes:
At the end of this module, the student will be able to:

**1.**                     Discuss life and death expectancies in the U.S. including disparities from the norm in special populations.

**2.** Identify the leading causes of death by age groupings and special populations.

**3.** Use information about leading causes of death when taking health histories and providing health promotion education to individuals and families.

**4.** Describe trends in settings where people die in the U.S.
