1.1 AGA Demos

X3352 SOME JUSTICE DEMO 94 UNPACK DISK UNPACK 030 VERSION

Yes mister, I'll take two please! This is the best demo of Summer '94 by a long shot! It's a sound and vision extravaganza, with the best soundtrack ever to grace an Amiga demo. Released to promote a new EP from Urban Shakedown, it's a remix of Some Justice, the hardcore anthem of 1992, produced by Urban Shakers themselves, and reworked into a colossal bass-heavy jungle stomper. Stick this through a decent hi-fi and you just won't believe the sub-bass!

** 2.5 MB REQ ** ** 030/040 ENHANCED VERSION AVAILABLE **

X3369 COMPLEX:PEE WEE DEMO UNPACK DISK

Another AGA demo from Complex. OK

X3489 BLACK LOTUS:TWISTED MINDS UNPACK DISK

A good demo from Black Lotus with some stunning visuals. Included are texture cubes, rotating tunnels and some great artwork amongst other things.

X3496(AB) REBELS:SWITCHBACK DEMO UNPACK A B

A superb AGA demo, one of the best ones we've had. Loads of nice effects and swirly colours and stuff like that.

X3508(AB) OXYGENE:INDIGO AGA UNPACK A B

A reasonable demo this one. Contains a very decent rotating city (mind you the text presented on top is nothing special), a basic doom sequence which zappppps into something much, much better, a picture warped and bounced, morphing flame objects, some decent shape animations and finally, a fairly well drawn tunnel sequence.

X3509 APEX:DOTSY AGA UNPACK DISK

This demo has a Melon Design feel to it: Cute, colourful etc. Check out the scroller on the vector-dot landscape!

X3510(AB) SILENTS:SOUL KITCHEN AGA UNPACK A B

A stunning AGA demo with tons of new features. Excellent as always from Silents.

X3511(ABC) REBELS:WHAMMER SLAMMER AGA UNPACK A B C

Rebels come up with a corker of a 3 disk AGA demo. The routines are unbelievable and the soundtrack is a stonker.

X3512 SANITY:ROOTS AGA UNPACK DISK

This contains a decent soundtrack which is complemented by a good demo overall. First off are a number of warping pictures, a great still drawing, a selection of different landscape routines, 3D dot animations that morph and rotate (very good) and more plasma warps.

X3514(AB) BOMB:MOTION ORIGIN 2 AGA UNPACK A B

This demo starts with a decent tunnel-doom type sequence with rotating vectors within the "ceiling" and "floor". An excellent start leads to a landscape rotation (in four colours but very fast), realtime movement throughout a vast room: 360 degrees movement with vectors appearing from the floor and a huge "snake spiral" (remember those spring-spiral toys that used to bounce down your stairs!) that moves within the room. After this the four-colour landscape routine from earlier transforms into the same routine but in 16-colours. The "WOW!" factor is now enabled as we enter a scene with a large morphing animation in the background with another morphing anim in the foreground. If all the above wasn't enough to make this one of the best demos of all-time we now enter the VERY BEST DOOM ARENA EVER!!! The demo moves very quickly around a doom atmosphere which has the most detail ever: it even has well drawn pictures on the walls. The final part of the demo is the best so far! You can ENTER THE DOOM WORLD YOURSELF and move around using the mouse. Walk up steps and more. Get this now!

X3515 ANDROMEDA:NEXUS 7 UNPACK DISK

Starts with a rotating "milky-way" visual set and leads into the quickest landscape rotation yet! All the routines in this demo are short but very powerful. This is how they should be. A set of fire designed vector objects are then present on the screen (hard to describe!) which lead to a final vector which contains a number of holes that allow light to escape in beams. These light beams have to be seen. The demo presents more interesting features such as shade-clusters that are unique, motion blurred 256-colour picture, a bouncing ball with a difference, plasma zoom and a 3D ray-traced scroller. The best part of this demo is the superb raytraced environment which contains a beautiful smooth lamp animation that bounces its way throughout this environment: up the stairs, across vast spaces and more!

X3516(ABCD) POLKA BROS:TWISTED AGA UNPACK A B C D

And another demo from Polka Brothers.

X3517(ABCD) OXYRON:KILLING TIME AGA UNPACK A B C D

This is Oxyron's first ever Amiga demo, so when I read this I thought "well

it may be reasonable then". I was wrong. Firstly, they present us their "Rot-Zoomer" which consists of a 4096 colour, fast, full-screen image which then transforms into a negative version. We are then treated to a 3D texture labyrinth which contains pictures on the wall which animate as you move past them. The demo then leads into a realtime texture city (very fast), next IFS fractals, mutating line vectors with 812 lines (very decent effect), more textured vectors in 4096 colours and finally, texture morphing and a texture tunnel. Certainly impressive for their first Amiga demo!

X3553(ABC) PSYCHEDELIC AGA DEMO UNPACK A B C

Easily the BEST, most STUNNING AGA demo seen to date. The routines are gobsmacking. Absolutely tons of features including a stunning animation at the beginning. Lightsource examples and a whole load of other stuff easily make Virtual Dreams stand out from the crowd.
