X3352 SOME JUSTICE DEMO 94 UNPACK DISK UNPACK 030 VERSION

 Yes mister, I'll take two please! This is the best demo of Summer '94 by a long shot! It's a sound and vision extravaganza, with the best soundtrack ever to grace an Amiga demo. Released to promote a new EP from Urban Shakedown, it's a remix of Some Justice, the hardcore anthem of 1992, produced by Urban Shakers themselves, and reworked into a colossal bass-heavy jungle stomper. Stick this through a decent hi-fi and you just won't believe the sub-bass!

** 2.5 MB REQ ** ** 030/040 ENHANCED VERSION AVAILABLE **

+3415 VIDEOTRACKER V2.0 UNPACK DISK

 With VideoTracker you can make a videoclip around a module. You can use pictures, brushes, animations, animation-brushes, palettes, colorcycle, routines, texts, objects, vectorobjects, amigafonts, karafonts, landscapes, colorsets. When the video is finished, you can save the module and video data as a "Vidule". A vidule is a crunchable executable file which plays the module and the video. You can make a small intro or a big house-demo. You also can use VideoTracker with a GenLock and, for example, make professional movie-titles with colorfonts.

** AGA AND NON AGA VERSIONS ON HERE ** ** SHAREWARE **

+3416 SCION V3.13 UNPACK DISK

 This is a specialised database for keeping track of genealogical information. It features a full, easy to use, Intuition interface with key short-cuts for most gadgets. The programme is totally non-sexist and secular in nature, and correctly handles multiple marriages, "unconventional" marriages, adopted children, and unmarried parents. Other features include dynamic on-screen ancestor and descendant charts, extensive on-line context-sensitive help (using "AmigaGuide", © Commodore Business Machines), flexible "regular expression" searching, and multiple ARexx ports with extensive command set.

+3417 IMAGINE V3.0 FONTS & ATTRIBUTES UNPACK DISK

2 full fonts (letter by letter) + stacks and stack of attributes.

+3418 IMAGINE V3.0 ATTRIBUTES & FONTS UNPACK DISK

Only one font on here, but literally dozens of attributes.

+3419 MULTI USER V1.8 UNPACK DISK

MultiUser allows you to create a *IX-like environment where several users live together in harmony, unable to delete each others files, unable to read those private love-letters of other users ... And this even if several users are working on the machine at the same time (on a terminal hooked up to the serial port) ... You are the sole user of your computer? Well, make sure it stays that way by installing MultiUser! People without a valid login ID and password won't be able to access files you have made private with MultiUser. If you make all files private (not readable for others), the only useful thing they could do, is boot from a floppy ...

** CLI KNOWLEDGE REQUIRED **

+3420 TERM V4.1a NORMAL VERSION + DOCS UNPACK DISK

Because of the great amount of options, you are able to produce even more than just menus - as the name of program indicates!
** SHAREWARE **

+3444 PROTITLER V1.1 UNPACK DISK

ProTitler purports to be one of the finest video titling systems for the Amiga (all bar Scala!). It has a wide range of effects mainly designed with the genlock-user in mind, however if you don't have a genlock, the program still remains useful for video titling work. There are 13 features available which should be of use to all users.
** SHAREWARE **

+3445(ABC) DEAD OF NIGHT UNPACK A B C

DOD is a SUPERB 3 disk multi-language graphic adventure. The graphics are EXCELLENT. The game is based around the old-style Pick Up, Drop, Examine, Open and Close type genre. The english is a bit dodgy in places but this is one helluva game for all fans out there.
** SHAREWARE **

+3446(AB) MISSILES OVER XERION UNPACK A B

One of THE BEST PD GAMES OF ALL TIME. Im not joking either. This is fantastic. Basically, it is Missile Command, BUT, the graphics are stunning, the sound is stunning, the presentation is stunning, there are billions of different power-ups, (well a few anyway) AND it works on all machines too with enhanced bits for machines with 1MB chip RAM. Astounding, amazing. If you are a nostalgia freak, or just like shoot-em ups, THEN YOU MUST BUY THIS GAME TODAY. It could easily sell as a full price game and everybody would go potty over it. Also if you load it through Workbench you get an old basic ploppy version of MC too.

+3447 IMAGINE OBJECTS UNPACK DISK

This disk FINALLY contains the Williams F1 racing car object. It includes all the attributes for the surfaces and sponsorship. There are also three 4-colour brushes which are 'wrapped' onto the car to reproduce the Williams

colour scheme. Also on here is a 747 Jumbo Jet object in both Imagine 2.0 & 3.0 formats. It also includes several brushes which can be added to the object.

+3449 BIG DUMMYS GUIDE TO THE INTERNET UNPACK DISK

The BDGTTI is a massive .guide file containing stacks and stacks of information about the Internet. What it is, What it does, How to get on, What you can get once you are on. Lists of FTP sites and much much much much more. If you are thinking about going on Internet, then get this first.

+3450 (AB) AMITCP V3.0b UNPACK A B

These two disks contain the full archive to allow you to get up and running on the Internet once you have got your account setup with whichever service provider you choose. This is by far the BEST Internet software available. Unfortunately it is extremely difficult to configure although an install script is provided just to get you going. You will need an EXTREMELY GOOD knowledge of using the CLI and also a hard drive is required. The archive contains FULL documents for the program. 17 Bit will give no help on this program whatsoever, so if you have a problem with it or you cant use CLI or you dont have a hard drive, TOUGH. YOU HAVE BEEN WARNED. The software allows you to telnet, gopher, FTP, send and recive mail, full Usenet access, and whatever else you may need.

** CLI KNOWLEDGE & HARD DRIVE REQUIRED, DONT BUY IT OTHERWISE **

+3451 MOSAIC FOR AMITCP V1.2 UNPACK DISK

Remember Jet Set Willy and all those other lovely 8-bit platform games? Well, here is another one. Actually, the package includes two programs. With the JSB Editor you create the playfield and save it on the disk. With the JSB Game you can load in the room data and play it. The Editor and Game programs are completely independent of each other.

+3498 NEW UTILS #3 UNPACK DISK

EAGUI V3.0, EasyMPEG V1.03, ZShell V2.1.

+3499 ICON TOOLBOX UNPACK DISK

a. Create icons of any size and up to 256 colours from paint files.
 Automatically works out the type of the icon. Double image icons

- can be made from 2 pictures with totally different sizes and depths, also you can manually position the 2 pictures relative to each other.
- b. Smart window cleanup: much better than workbench's window cleanup. The cleanup is always 100% tight: if there's a free slot, it will be found! The positioning of icons is also more structured than that of workbench. Many practical heuristics are enforced.
 - c. Very flexible directory iconization with many options.
 - d. Convert icons into paint files with a minimum of fuss.
 - e. Cut a smaller paint file (a brush) out of a bigger paint file.
 - f. Copy an icon to another object NOT necessarily of the same type.
 - g. Change the colour-palette/number-of-bitplanes/resolution of a picture so that destination resembles source.
 - h. Change the colours of icons from workbench 1.3 colours to workbench 2.0 colours and vice versa. Can do whole directories in one go.
 - i. Switch the type of an icon: switch between garbage and directory, switch between data file and programme file.
 - j. Implement the colours of a paint file onto the workbench screen.
 - k. Stretch icons. Perform 2 way stretch/shrink on an icon.
 - l. Tile a sphere with an icon or picture.

+3500 AMOSSIBLE

UNPACK DISK

 A big stack of stuff for all you AMOS beginners out there. Tutorials, games, graphics, and much much more. Source code and routines and all that nonsense.

+3501 MAINACTOR V1.55

UNPACK DISK

 MainActor is a full featured animation program. You can create / edit / time / play animations of any size on your native amiga chipset or your graphic card (if supported).

Features

=====

- Intelligent caching/tracking, MainActor can cache your animations and picture lists, if you have not enough memory it will directly access your data from any device. This makes it for example possible to create/edit/play a 400MB animation on your 2MB Amiga.
 - If you run OS 3.0 or higher, you will get an extra speed bonus on animations by the use of the new graphic routines. For OS2.0/2.1 users there are specific routines in the modules, which will give them the best playback speed possible on their system (and my knowledge :)).
 - Under OS 3.0 you will get the extra features of showing pictures or playing animations in a scrollable, resizable window on your MainActor or Workbench screen. The colors will be properly adjusted to your screen attributes.
 - The modules have play routines of their own, so it will be possible to redirect the input/output of special modules to graphic boards or other hardware.
 - The play routines support a timecode per frame option. A sound module (per frame) option will be there in one of the next
-

releases.

- MainActor has a totally user reconfigurable GUI. The settings of your sessions can be saved, this includes the size/position of windows as well as the status of the projects.
 - MainActor has an arexx port, nearly all functions can be accessed through it. You can for example scale or dither whole animations on the fly through the use of an image processor, scripts are included.
 - MainActor lets you setup and save nearly everything concerning the display mode for playing an animation or showing a picture. For example you can set the X/Y offsets, the display mode ID of your screen (view) and so on.
 - MainActor supports localization (wb 2.1+ required).
 - You can now map your arexx scripts to the function keys.
 - New IFF-Anim8_32, IFF-Anim8_16, PCX modules.
 - The new Universal modules allow you to easily load all of the supported graphic formats. The Universal_Picasso-II modules remap the output of all modules directly to the Picasso-II graphics board from Village Tronic.
 - MainActor now has a powerful external player named 'MainView', it can view all animations/pictures for which MainActor has the proper loader module. It is executable from the Workbench or CLI and supports, per tooltypes or CLI arguments, all of MainActors view options.
 - MainActor now (optionally) saves icons for your newly created animations or pictures, enabling you to view the animations/pictures by selecting their icons. These icons support the same tooltypes as MainView.
 - You can now control how many times MainActor/MainView plays animations.
 - The new 'Flash' option allows you to profile your animations.
 - MainActor/MainView now have a center option which allows highly accurate centration of your images or animations.
 - New BorderBlank option.
 - MainActor has a new window called Project Information Window. The new functions included in the window are:
 - * An information window which will give you detailed descriptions of your current animation or picture list.
 - * You can now view the size and time profiles of your projects as a graphical representation.
-

- * You can compare the decompression times of your projects through new timer functions.
- New GIF/FLI/FLC/DL loader modules and FLI/FLC saver modules.
- Chunky pixel modules (GIF/FLI/FLC) will fly if loaded through universal modules which support graphic cards (like Universal_PicassoII etc.). You can of course also view them on your native chipset as normal.
- Introduction of a new (light) registration package. It does not have the handbook or the disk based updates but is cheaper.
- You can now use the save/append functions again, even if you have not registered MainActor. You will have to deal with requesters though.
- Major hd playback improvements of all modules. Average speed increase is about 2 - 5 times the speed of v1.2, giving you maximum performance.
- Sound Support. MainActor now has Sound Modules which allow you to associate sound effects to every frame of an animation. This works for pictures too. The sound information is module independent, that means that you could use the same sound information ("#?.snd") on every module type MainActor supports.
- New Real3D, IFF-Anim3, IFF-AnimJ, Picasso and AVI animation loader.
- The usage of the Append function is now easier. The saver module now recognizes automatically if the destination project is of the right type. That means that you can now use the universal modules for appending.

** HARD DRIVE REQUIRED ** ** NOW INCLUDES UPDATE PATCH **

+3505 SAT TRACK v4.2 UNPACK DISK

SatTrack outputs the satellite information in several ways. First it
can display the satellite information graphically on the Amiga screen.
The display can be saved as an IFF picture for printing and
modification using your favorite Amiga painting program (Dpaint,
DigiPaint or one several public domain painting programs.)
Information on satellites is also able to be written in a text form to
a file or printer suitable for report generation or text editors.
SatTrack has the ability to simulate the tracking of a satellite from
the future or past. This means that you can run SatTrack with a time
and date of your choosing, either in the future or in the past. This
allows you to quickly generate tracking information for events at
other times.

+3506 EFF'S GUIDE TO THE INTERNET V2.3 UNPACK DISK

The EFFGTTI is a massive .guide file containing stacks and stacks of
information about the Internet. What it is, What it does, How to get on,
What you can get once you are on. Lists of FTP sites and much much much
much more. If you are thinking about going on Internet, then get this
first. This was formerly known as the Big Dummies Guide To The Internet, but
this is the latest version.

+3507 TURBOCAT V1.5 UNPACK DISK

TurboCat is a simple program written to make cataloguing your disk
collection easier. It couldn't be simpler, all you do after the program
has loaded is insert your entire collection of disks into drive DF0:,
(no....not all at once!), and the program does the rest. It will
recognise the volume name of the disk and insert it into the list.
Your disk volume name will have been added to the list with a unique
number appended to it to enable you to quickly trace a disk in your
collection, with this program you can log volume names and disk contents
which is configurable in a number of ways.

X3508(AB) OXYGENE:INDIGO AGA UNPACK A B

A reasonable demo this one. Contains a very decent rotating city (mind you the text presented on top is nothing special), a basic doom sequence which zappppps into something much, much better, a picture warped and bounced, morphing flame objects, some decent shape animations and finally, a fairly well drawn tunnel sequence.

X3509 APEX:DOTSY AGA UNPACK DISK

This demo has a Melon Design feel to it: Cute, colourful etc. Check out the scroller on the vector-dot landscape!

X3510(AB) SILENTS:SOUL KITCHEN AGA UNPACK A B

A stunning AGA demo with tons of new features. Excellent as always from Silents.

X3511(ABC) REBELS:WHAMMER SLAMMER AGA UNPACK A B C

Rebels come up with a corker of a 3 disk AGA demo. The routines are unbelievable and the soundtrack is a stonker.

X3512 SANITY:ROOTS AGA UNPACK DISK

This contains a decent soundtrack which is complemented by a good demo overall. First off are a number of warping pictures, a great still drawing, a selection of different landscape routines, 3D dot animations that morph and rotate (very good) and more plasma warps.

X3514(AB) BOMB:MOTION ORIGIN 2 AGA UNPACK A B

This demo starts with a decent tunnel-doom type sequence with rotating vectors within the "ceiling" and "floor". An excellent start leads to a landscape rotation (in four colours but very fast), realtime movement throughout a vast room: 360 degrees movement with vectors appearing from the floor and a huge "snake spiral" (remember those spring-spiral toys that used to bounce down your stairs!) that moves within the room. After this the four-colour landscape routine from earlier transforms into the same routine but in 16-colours. The "WOW!" factor is now enabled as we enter a scene with a large morphing animation in the background with another morphing anim in the foreground. If all the above wasn't enough to make this one of the best demos of all-time we now enter the VERY BEST DOOM ARENA EVER!!! The demo moves very quickly around a doom atmosphere which has the most detail ever: it even has well drawn pictures on the walls. The final part of the demo is the best so far! You can ENTER THE DOOM WORLD YOURSELF and move around using the mouse. Walk up steps and more. Get this now!

X3515 ANDROMEDA:NEXUS 7 UNPACK DISK

Starts with a rotating "milky-way" visual set and leads into the quickest landscape rotation yet! All the routines in this demo are short but very powerful. This is how they should be. A set of fire designed vector objects are then present on the screen (hard to describe!) which lead to a final vector which contains a number of holes that allow light to escape in beams. These light beams have to be seen. The demo presents more interesting features

such as shade-clusters that are unique, motion blurred 256-colour picture, a bouncing ball with a difference, plasma zoom and a 3D ray-traced scroller. The best part of this demo is the superb raytraced environment which contains a beautiful smooth lamp animation that bounces its way throughout this environment: up the stairs, across vast spaces and more!

X3516(ABCD) POLKA BROS:TWISTED AGA UNPACK A B C D

And another demo from Polka Brothers.

X3517(ABCD) OXYRON:KILLING TIME AGA UNPACK A B C D

This is Oxyron's first ever Amiga demo, so when I read this I thought "well it may be reasonable then". I was wrong. Firstly, they present us their "Rot-Zoomer" which consists of a 4096 colour, fast, full-screen image which then transforms into a negative version. We are then treated to a 3D texture labyrinth which contains pictures on the wall which animate as you move past them. The demo then leads into a realtime texture city (very fast), next IFS fractals, mutating line vectors with 812 lines (very decent effect), more textured vectors in 4096 colours and finally, texture morphing and a texture tunnel. Certainly impressive for their first Amiga demo!

+3518 ZAXXON UNPACK DISK

From the people who wrote Donkey Kong, Popeye and various other C64 conversions comes a PERFECT conversion of this classic arcade shoot em up. Any old gits amongst you will know the game perfectly. If you've never heard of it, then get it. It is an excellent shootem up and you will be impressed.

+3519 VISUAL ARTS V2.0 UNPACK DISK

Visual Arts 2.0 is a new powerful GUI designer. Features includes: Menu and List manager, Object Master, Insert custom codes into any GadTools or GadTool Menu items, primitive drawing tools such as rectangle, circle and lines; Supports AppWindow and MultiProcessing windows. Add AREXX to any program, custom images, custom images for button, PopupMenu, get any IFF color map and use it in your program, color palette and over 40 custom patterns for fills. V2.0 now supports Context Sensitive.

X3520 NORMAL CARDS UNPACK DISK

A boring normal old farty cardset for Klondike AGA. This set will appeal to anyone old git over 60 who complains that the other cardsets are crap because they cant see the numbers. This includes boring cards with hearts and clubs etc on them.

+3521 NEW UTILS #4 UNPACK DISK

MidiPlay V2.24, StartUpMenu V1.41, MonkeyClock V1.1 (Requires MUI), New JPEG Datatype, Some HAM6 + HAM8 Icons.

V1.34, HotScreen V1.0, IFS, KeyComp.

+3523 MORE MAGICWB ICONS UNPACK DISK

Yet more of the little blighters to spruce up your normally crap looking workbench.

+3524 MINIMORPH V1.1d UNPACK DISK

MiniMorph is a program that will allow you to create smooth morphs/warps between two different images over a period of frames to create an animation. Actually it works only on greyscale pictures (16-256). It has been written 100% in assembler to be as fast as possible. For example morphing a 320*256*256 picture takes less than 9 seconds on a standard A1200. Also on here is Mainactor V1.5 and 3 games.

+3525 ROBS HOT GAMES #11 UNPACK DISK

AtomsAGA, Knights V2.42, Poing V2.2, Yahzee V2.2, LazyMines V2.1, and a trainer for the original version of Frontier.

X3526 VIPER AGA UNPACK DISK

Viper is a snake game, but is not just another snake game. The most impressive feature is that it allows you to steer in any direction (at any angle). It also allows up to six computer or human controlled players. Give it a try, I think you'll like it.

X3527 SHERILYN FENN CARDSET UNPACK DISK

A cardset for Klondike AGA using pictures of the saucy bit of stuff from Twin Peaks.

+3535 TERM V4.2 000 VERSION + DOCS UNPACK DISK

 The latest version of this superb communications package. New features and changes introduced in this version include:-

- Increased the width of all the integer gadgets in the rates settings panel.
- New look slider gadgets (requires gtlayout.library v5).
- Numerous bug fixes in the user interface support library.
- Added another two 'lock' options. Now you can choose to lock the current text colour and the text rendering style. Take care, the 'Reset styles' and 'Reset terminal' options will no longer change colour and style once they are locked.
- Added pen and text attribute translation. In the emulation settings you will find an option to select nonstandard pens. In this case, these pens refer to the terminal emulation rendering pens and text attributes.
- Tweaked the terminal emulation parser to swallow the Amiga specific commands to turn the cursor on or off (aSCR).
- The serial settings now sport an additional OwnDevUnit control switch. You can now choose to ignore requests to release the serial device driver or to have the device released, causing 'term' to check in intervals of 4 seconds if the device has become available again. The default behaviour (the device driver is released) is still supported.

AND STACKS MORE.

X3583 ZXAM V1.6b UNPACK DISK

This program is a Sinclair ZX Spectrum 48k emulator. It needs WB 3.0+, 68020+ and AGA chipset to run. New featurns in this version include :-

- Fixed a bug in the loading of Z80 snapshots. The emulator refused to load old (v1.45) Z80 snapshots if they where compressed. This bug was due to wrong information in the "Z80" v1.45 manual :-(
- Added the possibility of loading (but not saving) snapshots in KGB format.
- Modified some instructions. Now these instructions increments correctly the R register.
- Some enhancements in the flags emulation.
- Added an ARexx script for disassembling, BASIC listing searching of pokes, etc... It's a kind of monitor (Made by Leo Cocaña. Thanks Leo! :-)
- Fixed two bugs in the embedded disassembler (in the 'ld hl,(nn)' and 'ld (nn),de' instructions).
- Added the ARexx functions LoadMode(), SaveMode(), ActLoadMode() y ActSaveMode(). This way the new menu 'options' can be controlled from ARexx too.
- Added the ARexx function About()
- Modified the ARexx function ParseLoaded() for parse the KGB snapshots too.
- Now 'Reload' works after a 'Save program'.
- After 'Reset & Run' the 'Reload' shortcut is disabled (like the gadget).
- Embedded a 1 second pause at the end of the ROM's SAVE routine. This is for programs that SAVE headers and blocks without pause between them (like the GENS assembler).
- Added ARexx functions FindBlock() and DoChecksum().
- Added ARexx functions BreakPoint(), Trace(), DoInt() and BlockOfRegs(). With these functions you can execute Z80 code step-by-step, and put breakpoints.
- Modified the ARexx function GetReg(). Now it has a second parameter (optional) that sets the format of the result (decimal or hexadecimal).
- Now, when an ARexx script is running, the 'close window' events aren't queued anymore, and the menus are disabled.
- Fixed a bug in the 'Reload' routine after doing SAVE in PC_PP format.

+3588 IMAGEDESK V1.4 UNPACK DISK

ImageDesk is a program to catalog your picture directories. By this, small representants of the pictures, so called thumbnails, are being generated to get a quick overview of the directory contents. Those thumbnails are internally being expanded to objects which will include all essential attributes of the represented pictures. Imagedesk supports IFF, GIF, JPEG, PCX, BMP, PCD, PNM and TARGA.

+3589(AB) PHOTOGRAPHIC TECHNIQUES UNPACK A B

An educational package explaining how to take better pictures then Lord LichField. Using a Hyperbook frontend, incorporating pictures and text, anybody who hasnt got a bloody clue could do worse then buy this set.

+3590(AB) PHOTOGRAPHIC TECHNIQUES 2 UNPACK A B

Written in hyperbook, this 2 disk package will show you how to get the best from your holiday snaps whether using a shitty 5 quid Argos camera or a two grand Mukahato. Lots of examples of using light etc and also a section for posh gits who use videocameras.

+3591 COINMANIA UNPACK DISK

The AIM of the game, is to collect all of the coins, avoiding the hazards that block your path, whilst you race against the clock. When you move off the tile you are presently on, it will crack and disappear, so that you will not be able to go back on yourself. Souns complicated but this is a very addictive puzzle game.

** SHAREWARE **

X3592 JPEGAGA V2.1 UNPACK DISK

jpegAGA is, at this time, the highest quality JPEG viewer (if a map-file for that picture is available) To use it you need the AGA chipset, a 68020 or higher processor and OS 3.0 or higher. This program uses the HAM8-mode, grayscale display will use 256-color-mode. Although jpegAGA 2.1 has many new features it is still fully compatible to the previous versions.

The advantages of jpegAGA:

- very high quality (better than any other viewer)
- complete source is available
- best compatibility to all JPEG pictures because the unmodified JPEG source from the Independent JPEG group is used for decoding (jpegAGA 2.0 uses version 5A)
- high speed gained by using the GNU C compiler and the 24-bit-RGB to HAM8 converter written directly in assembly language
- support for grayscale JPEG's and for showing color pictures in grayscale format
- automatic screen mode selection, depending on the size of the picture
- pictures can be shown at reduced size, useful for high speed previews
- they can be scaled automatically to fit completely on your screen
- when more than one picture is selected jpegAGA will load and decode the next picture in the background while you are still looking at the previous one

+3593 LEAGUE SOCCER CARDS V1.1 UNPACK DISK

The very latest version of this most popular football card game. Match a pair to score goals, get penaltys etc etc. You know the score, (no pun intended).

+3594 PARNET HARD DRIVE UNPACK DISK

Parnet Harddrive is a version of ParNET which when installed on a harddrive works with Directory Opus to produce an effective backup tool and copying program. It will also allow access to a CD32/SX1 from an A1200 or an A1200 with Zappo CDROM from another A1200/computer. It should support CDTV too.

+3595 CLASSIC PUCMAN UNPACK DISK

Classic Pucman is an ARCADE PERFECT conversion of the very first pacman game ever which was written by Namco. You just cannot tell the difference between this and the cabinet version. If you have been crying out for it, then here it is and by god its a classic. Also if you can remember the original being released, then you must be a very old git.

+3596 DELUXE GALAGA V2.51 UNPACK DISK

Deluxe Galaga is based on the game StarBattle on the old VIC20. That was one excellent game, that I had a lot of fun with. It's also some features from the games Galaga and Galaxions. Version 2.5 contains even more new features including full multitasking, ship armour, new music and various other tweaks and fiddles just to make it that bit better. This is the most played game EVER in our office. BUY IT TODAY or we'll come round and bite yer legs off. THE best PD shootemup EVER.

+3597 FINAL WRAPPER V3.0 UNPACK DISK

FinalWrapper is an Arexx macro for SoftWood's famous word processor Final Writer. It allows you to create amazing text effects as wrapping text around

an oval or even alongside a spiral line with just a few mouseclicks and keystrokes! Also part of the FinalWrapper distribution are 4 other macros to do various effect styles. The second package on this disk is called FinalMacros, this is another eight Arexx scripts for FW to do tons of stuff including wave text etc etc etc. FANTASTIC STUFF.

X3607 FLOWERS CARDSET

UNPACK DISK

A klondike cardset with lot of pretty flowers. How lovely.

+3608 AMIGA DEMON V1.01

UNPACK DISK

This popular, single player, card patience game is better known in America as Canfield. The game is played with a single, standard pack of fifty two playing cards. Thirteen cards are dealt to form a reserve, known as The Demon with only the top card being visible. The next card is dealt face up, to the right of The Demon, to start the first of four foundations. During the game, as each other card of the same rank as this becomes available, it is placed in line with the first to begin the remaining foundations. Four cards are now dealt face up in a non-over-lapping row to the right of The Demon and below the foundations to form the tableau. The game then commences.

+3609 INFECTION

UNPACK DISK

Infection is a board game similar to OTHELLO but in the same instance totally different to OTHELLO. It is a game for 2-4 players. Any of which can be HUMAN or one of 2 computer levels (CPU1 & CPU2). The objective of the game is to eliminate all opponents, or in the event of the board filling up, have the greatest number of cells (pieces) left. Each player is given 1 cell which starts in their relevant corner. It is from this single cell that the player must infect the board and all opponents.

+3610 JUMPEM

UNPACK DISK

Jumpem is a puzzle game where the object is to bounce around on the tiles. When you have hit a tile, it disappears. You cannot go back on yourself, and the goal is to make all the tiles disappear and reach the exit.

+3611(AB) CYBERGAMES

UNPACK A B

This is a superb beatemup along a similar vein to Barbarian and Mortal Kombat. Although there arent as many moves, there are still some gory effects including the ability to chop your opponents head off etc, etc. Also you can buy special weapons including throwing stars, laser beams and various other goodies. Well worth a look.

+3612 THIRD DIMENSION #11

UNPACK DISK

Another jam packed issue of TD hits the street. Good for anyone into anything 3D Construction Kit. Superb disk mag.

+3613 TRILEMMA V5.0

UNPACK DISK

Trilemma is the strangest puzzle game ever to grace the hallowed halls of 17 Bit. So strange in fact that i cant think of any words to describe it. If you really like puzzles (old gibbers mainly) then this is one for you.

+3614 TURBOCAT V2.00

UNPACK DISK

TurboCat is a simple program written to make cataloguing your disk collection easier. It couldn't be simpler, all you do after the program

has loaded is insert your entire collection of disks into drive DF0:, (no....not all at once!), and the program does the rest. It will recognise the volume name of the disk and insert it into the list. Your disk volume name will have been added to the list with a unique number appended to it to enable you to quickly trace a disk in your collection, with this program you can log volume names and disk contents which is configurable in a number of ways. TurboCATV2.0 and upwards now uses a different file handling system which should allow many more records to be stored on the boot disk. This version is not backwards compatible with any other version.

+3615(ABCD) CHARLEY CAT 11:GARDENING CAT UNPACK A B C D

 Another superb anim from Andrew Whittaker featuring the loveable feline Charley. In GARDENING CAT, Charley has to put up with some of the usual garden terrors while his owner Jarrod lazes away in bed. Most of these terrors are caused by two perishing moles who make a real mess of the lawn! If you have seen the other anims in this series, then you know the quality, if you havent seen any of them and you would like a good anim, then get this.

+3618 UFO:FINDING THE TRUTH UNPACK DISK

 The third instalment of this disk/info mag concerning all things extra-terrestrial. There are dozens of articles on here about UFO sightings from around the world, unexplained phenomena and such like.

+3619 PENG0 UNPACK DISK

 Pengo is a maze-game. The maze is made up of blocks of ice, which you can push or melt. Blocks are melted by pushing a block that has another block directly in front of it. If that sounds confusing (and it probably does), play the game, and you'll understand what I meant. Everybody must have heard of Pengo at one time or another. It was one of the early arcade classics and still is today.

+3620 FILER V3.23 UNPACK DISK

 Filer is an Intuition controlled file manager for OS 2.04 and newer. You can use Filer for copying, deleting and renaming files or creating directories. You can create, list and extract archives with it or use it as an universal viewing tool. Filer even is able to control your whole system as a replacement for the Workbench. Some of Filer's features are:

- Font-sensitive, resizable and Style Guide compliant GUI

- ARexx interface
- Highly configurable
- Keyboard support
- Class support
- Archive support

These is a superb program if you cant get hold of Directory Opus. It does exactly the same job.

+3621 CD32 SAVER V1.2 UNPACK DISK

 Have you got an SX-1 for your CD32 and you are fed up because you can only save a couple of games into nonvolatile memory ? Well help is at hand, because this disk allows you to store all your save game files on disk. So now you can store bloody hundreds of em. Dead easy to use, it does all the work for you. Also on this disk is TwinExpress V1.1 and CD32 RAD for all you networking freaks out there.

+3622 ACCOUNTMANAGER V1.1 UNPACK DISK

 This program is NOT anything to do with keeping a track of your bank account. What it does is this, if you use the MultiUser password system (disk 3419) to lock people out of your hard drive you will know, that setting up new accounts and changing peoples UserID can be a bit fiddly. Well this program adds a complete GUI to MultiUser allowing you to mess about with everybodys parameters quite easily. Saving tons of messing about.

** REQUIRES MUI TO RUN **

+3668 WORD SEARCH DESIGNER UNPACK DISK

 One for the old farty types amongst you. Create the most difficult wordsearches imaginable and then pass them round to the other people on the geriatric ward.

+3669 ICON TOOLBOX V2.12 UNPACK DISK

-
- a. Create icons of any size and up to 256 colours from paint files. Automatically works out the type of the icon. Double image icons can be made from 2 pictures with totally different sizes and depths, also you can manually position the 2 pictures relative to each other.
 - b. Smart window cleanup: much better than workbench's window cleanup. The cleanup is always 100% tight: if there's a free slot, it will be found! The positioning of icons is also more structured than that of workbench. Many practical heuristics are enforced.
 - c. Mass produce zillions of icons (iconization) with many options.
 - d. Mass stretching of icons in a directory.
 - e. Mass palette remappings of icons.
 - f. Mass change of an icon default tool.
 - g. Convert an icons tool types to text file and vice versa.
 - h. Convert icons into paint files with a minimum of fuss.
 - i. Stretch icons. Perform 2 way stretch/shrink on an icon.
 - j. Tile a sphere with an icon or picture.
 - k. Remap an icon palette: for when you change your workbench palette.
 - l. Cut a smaller paint file (a brush) out of a bigger paint file.
 - m. Copy an icon to another object NOT necessarily of the same type.
 - n. Mass mapping of icons onto spheres.
 - o. Stretch a picture.
 - p. Tile a sphere with a picture.
-

- q. Change the colour-palette/number-of-bitplanes/resolution of a picture so that destination resembles source.
- r. Switch the type of an icon: switch between garbage and directory, switch between data file and programme file.
- s. Implement the colours of a paint file onto the workbench screen.
- t. Examine an icon: give info about an icon. Compared to Workbench info the emphasis is on the icon rather than on the associated object.

X3670(AB) BIG GIRLS 2 AGA UNPACK A B

 256 colour pictures of some stunning looking woman in various states of undress. Guaranteed to turn you on whether you have got a bird or not. Very good quality. Perhaps getting a little boring now though ?????

The first ever true animated arcade machine has been turned into a Klondike cardset. Quickly Rush !!!!!

+3691 TSMORPH V3.2 UNPACK DISK

TSMorph is a set of morphing programs. It consists of two programs:

TSMorph Edit the Morph parameters
TSMorph-render Generate the morphed images

TSMorph is used to create a parameter file which is used by TSMorph-render to produce the morphed images. TSMorph-render works with 24 bit internally. Run times can be about 3 seconds per frame for a 150x150 image on a 28Mhz 68040.

TSMorph-render can be used to morph one image to another in a set number of frames with a number of control points, just distort one image with control points. It can also be used to morph or warp a series of images (e.g. to morph between two animations). When TSMorph is run without parameters it will display an ASL file requester for a file created by TSMorph, it will then create the images, displaying a Progress Requester on the default (or named) public screen allowing the process to be interrupted and/or stopped.

+3702 SCORCHED TANKS V1.85 UNPACK DISK

Scorched Tanks is a tank warfare game where 1 to 4 human players or computer controlled opponents, take turns at buying fancy weapons and shooting them at each other. The more damage a player causes another, the more money they get. The more money a player receives, the larger the weapons they can buy. This is a very simple concept, but

extremely addictive! This version includes the following NEW features.

- 16 and 64 color graphics modes.
- 10 new weapons
- New music by 'Sidewinder'
- Enhanced graphics:
- Scrolling rainbow effect for added sense of depth.
- Trails that follow missiles.
- More graphics for a commercial quality feel.

+3703 SPRINGTIME UNPACK DISK

Each scheme of this puzzle game consists of tiles, grouped into horizontal and vertical square faces. Your character can walk freely over the tiles on the floor, and pass through the openings in the vertical faces. On the contrary, when a vertical tile bars your way, any attempt to move in that direction results in a rotation of 4 faces, which ends with your man standing on the tile he was previously leaning on. To complete a scheme, you must involve the spring in the right sequence of rotations until it gets to the tile with the flashing X. Sounds complicated. It isn't. What it is though, is the most BRILLIANT COMPLETELY INFURIATING PUZZLE GAME EVER.

X3704 BATTLE DUEL AGA UNPACK DISK

Another superb Scorched Tanks clone. This one has the following features:-

- can be played with up to 4 players
- offers computer opponents with selectable difficulty
- has 4 play modes: normal duel-mode, 2 tournament-modes and a practice mode

+3709 IMAGEDESK V1.5 UNPACK DISK

ImageDesk is a program to catalog picture directories by generating small representants of the pictures, so called thumbnails. Those thumbnails are internally being expanded to objects which will include all essential attributes of the represented pictures. Several thumbnail objects which corresponding pictures are in the same directory, could be saved together into a catalog file for being available immediately on request. The following picture formats are currently supported and will be recognized automatically:

IFF ILBM, GIF, JPEG, PCX, BMP, PCD, PNM & TARGA.

+3710 (ABCDEF) PROJECT UFO UNPACK A B C D E F

This is a 6 disk set containing over 4 Megs of UFO related text files from the BBS's across the world. It contains hundreds of articles about famous (Roswell) and not so famous sightings, theorys, predictions, possibilitys and tons more. An excellent collection.

+3711 NEWICONS UNPACK DISK

NewIcons is a revolutionary system patch which enhances your Workbench and gives the user much more power and configurability over the appearance of his/her GUI (Graphical User Interface). The NewIcons system works transparently, and provides for a standard icon system that will look the same on any system, no matter what the palette is set to. The system's features include:-

- Allows up to 256 color icons on an AGA machine. (!)
- Icon colors are color correct on an AGA system no matter what your palette is set to. They automatically appear in perfect color.
- Default icons for dozens of file types automatically appear for files without icons FAST. Recognizes file types in a very efficient manner. If you click on a "fake" icon, your appropriate user-defined default tool will appear in the "Execute command" text field automatically!
- Make a brush, convert it to an icon. It will appear on your workbench in the exact proper colors you created it in, no matter what your palette is set to. Imagine making gorgeous icons from your digitized pics, in more than 16 colors!
- Icon images are compressed to maximize disk space. They are uncompressed faster than you can say "NewIcons"!
- Also KS 2.04 compatible (16 color icon limitation).
- Fix that ugly Cross-DOS icon to look like a standard NewIcon.
- Unique icons for RAM-Disks and CD-ROM's that don't have icons.
- A complete set of beautiful, standardized Workbench icons, drawn by artist Roger McVey. And more on the way!
- Comprehensive set of utilities to allow you to manipulate your NewIcons.
- FREEWARE! Why would anyone want to pay cash for icons?
- Very stable. Beta Tested/Updated for over a year.

+3729 PRO LOTTERY V1.1 UNPACK DISK

There are many lottery prediction programs available for the Amiga, some of
which make promises of amazing wealth, others just pick random numbers, some
are just unuseable. Pro-Lottery is something very different. In fact, it's not
just regular wins that are offered - it's regular multiple wins. This is
because Pro-Lottery not only picks the numbers for you, but arranges them
across a number of tickets according to your budget. No matter how much you
spend on the lottery, whether it's 2 pounds or 30 pounds Pro-Lottery will be
able to come up with a suitable perm for you, all of them offering multiple
prizes when successful.

+3730 SPONDULIX MK 5 UNPACK DISK

Spondulix 'Mark V' has been designed as a very powerful personal accounts
system. It is also very easy to use. If you're the sort of person who has
been put off by other personal accounts systems because they look far too
complicated and you can never quite work out what your meant to do, then
this programme is for you. Features include:- Online help system, Graphics
window, Inter account transfers, Exchange rate system, Full sift and block
operations, Scientific calculator, Full printing facilities, List and
Invoice system and ttons more.

+3731 KING HIGH UNPACK DISK

KingHigh as the name suggests is a card game where the player has to guess

whether each card following the first shown is higher or lower than the last and the king is always high. There are a number of levels with each type of game divided by a Pontoon type of game where the player has to win 14 times and reach 100000 points.

X3733 ROSES 2 CARDSET UNPACK DISK

 Another cardset featuring our little flowery friends. One for the ladys perhaps.

+3734 TEXTURE STUDIO V1.0.2 UNPACK DISK

 TextureStudio supports the loading of texture modules in Imagine3 format. The parameters of the texture can quickly and easily be adjusted by means of slider gadgets or by typing in the numbers. The texture can then be mapped onto a plane, cylinder or sphere and rendered to a preview screen and/or as a 24-bit image to disk. TextureStudio allows the user to quickly render the texture and explore the effects of changing various parameters without the need to ray-trace a new image each time something altered.

List of features

=====

- * Supports Imagine3 texture format.
- * Control of features via ARexx port.
- * Render unlimited number of textures simultaneously.
- * Render to HAM screen and 24-bit images on all Amigas.
- * Render 24-bit images of any size onto disk in IFF-ILBM24, JPEG or Targa format, regardless of memory available.
- * Saving of HAM preview screen to disk.
- * Support for colour, filter and bump type textures.
- * Easy adjustment of parameters by means of slider gadgets.

X3787 DELUXE PACMAN V1.6 AGA

UNPACK DISK

-----  
Our yellow hero Pacman must eat all of the pills in the maze to get to the next maze. But danger lurks in the maze. Four evil ghosts are looking for Pacman, and they want to stop Pacman from getting to the next maze. In the maze there are some power pills that Pacman can eat, and he can then kill the ghosts for a limited time. There are also some fruits that popup from time to time, and Pacman can eat these for extra bonus points. And sometimes some special tools will appear which, when eaten, may affect Pacman or the pills or even the ghosts. Some will speed up Pacman, some will give random points and some will lead to extra levels.

+3790 TURBOSUITE V3.1

UNPACK DISK

-----  
TurboCAT and TurboVIEW together form a pair of programs that are complimentary to each other, TurboCAT is used to compile and edit a complete record of what disks you have and, probably more importantly, what is on them. This program has several features and in order to display them it opens quite a large window whilst running. TurboVIEW, on the other hand is the workhorse of the two, it is designed to act as a handy, unobtrusive program that you can run whenever you need to find a particular file. When it is run It opens up immediately

on the search window that you can find on TurboCAT, the program has none of the bells and whistles that may be found on the main program, but is intended to allow you to interrogate the database without having to run the entire program. At the top right hand corner of the window is a field into which you may type in the name of the program or file that you are looking for. If it is on one of the disks which you have catalogued using TurboCAT, then TurboVIEW will find it, tell you which disk it is on, and offer you the the option of viewing the entire contents of that disk.

+3791 GEMZ UNPACK DISK

-----  
 This is another one of those annoyingly addictive puzzle games loved by everyone who buys PD stuff (well, most people anyway !!!). Two grids containing GemZ will be displayed. The grid on the right has been altered by the computer and the object is to make the grid on the left identical to that on the right. This is done by pressing the left mouse button on individual GemZ. This in turn will make the GemZ Change colour. In the middle of the screen between the two grids is the order in which the GemZ change colour. How each Gem changes colour will depend on which game level you are playing. In the easiest level, the Gem which is clicked on changes to the one which is two places lower down. The adjacent GemZ will change one place lower. If the bottom of the list is reached, then the Gem will disintegrate, and all GemZ above it will fall down to fill the gaps (like Tetris).

+3792 SCOUT V2.3 UNPACK DISK

-----  
 Scout is a tool that allows you to monitor your computer system. It displays many different things -- like tasks, ports, assigns, expansion boards, resident commands, interrupts, etc. -- and you can perform some certain actions on them.

+3793 BEGINNERS TYPING TUTOR UNPACK DISK

-----  
 Not a typing tutor as such, but typing games and exercises to increase your speed.

X3794(AB) MALEDICTION V3.0 UNPACK A B

-----  
 The first ever 3D texture mapped game arrives on the Amiga. Bits nicked from all sorts of games in here. Doom, Space Hulk, Dungeon Master, Hired Guns etc etc. You can choose different characters, weapons, scenery etc etc. Excellent.

\*\* FAST RAM & 030 PROCESSOR RECOMMENDED \*\*

+3795(AB) IMAGE STUDIO V2.1.1 UNPACK A B

-----  
 This is the premiere PD image processing package for Amiga. This latest version includes the following new features:-

- Added fully font sensitive interface.
- Added co-ords as a floating palette to reduce the size of the info bar.
- Added loaders and savers as external modules.
- Added "Flush buffers" to edit menu to allow free'ing of old undo/redo buffers.
- Added the ability to double-click on a script/convolve/effect in the

-----  
 The 'Bookie Beater' (BB from now on), is one of the simplest, yet most effective betting tools you could arm yourself with. In basic terms, it allows you to back more than one contender in an event, making the same profit, or a pre-determined profit, no matter which one wins. It does this by adjusting the stakes according to the odds (sounds simple, but is virtually impossible without a computer). An 'event' can be racing, football, rugby, golf, cricket, the Xmas No.1, the result of an election - in fact, any 'bettable' event. The 'result' that you bet on, can again, be anything you like - the winning margin in a rugby match, the first player to score etc. The list is endless.

+3802 SAUCE N CODE #1 UNPACK DISK  
 -----

This disk is aimed at AMOS coders who are already quite good. The disk is more a collection of interesting, good and useful routines than simple demonstrations on how to do basic things.

+3803 DUCK DODGERS UNPACK DISK  
 -----

A good platform game. The object being if it moves, kill it. A brilliant one for the kids.

+3804 MENUS & MORE V3.20 UNPACK DISK  
 -----

With Menus & More (M&M) you are able to create graphic orientated screen menus. Once you have installed your own menu, you can easily call many programs from one central screen. It's like designing your own workbench. Because of the great amount of options, you are able to produce even more than just menus - as the name of program indicates!

+3805 ZXAM V2 UNPACK DISK  
 -----

The latest version of the best Spectrum emulator on the market. Features include:-

- Emulation of a Sinclair ZX Spectrum 48k.
- Stabilized 48k sound.
- Load/save to tape, or redirected to disk or to ARexx scripts for use of complex tape formats, like .TAP.
- ARexx port with 93 functions.
- Fully multitasking.
- Automatic speed adjustment.
- Optimised CPU usage. The CPU time not necessary for the required speed is given to the others tasks in multitasking (a 1200/030/28MHz can run two copies of Manic Miner in multitasking at full speed, and 10% of CPU time is still unused).
- Full emulation of the Spectrum 128k sound (AY-3-8912), with white noise, volume waves and 3 channels of 4 bit samples.
- The stereo follows the ABC and ACB distributions used by the AY interfaces for Spectrum 48k (the left side contains the 48k sound and the A channel, and the right side contains the B and C channels).
- Dynamic assignation of the noise channel for 48k or 128k sound.
- The Spectrum's screen can be put inside a window over any public screen. This is possible even with RTG emulations, like the Retina one. The emulator tries to adapt to the colors available in the screen.
- System friendly screens can be used for the Spectrum display, even when

- disabling multitasking.
- Emulation of Kempston, Sinclair (Interface II) and Cursor (AGF/Protek) joysticks.
  - Includes a transfer to save to tape complete games.
  - Real border, but not synchronized with VBlank.
  - Flash emulated (only special AGA version).
  - FASTER version for more speed, but with a less accurate emulation.
  - The emulator adapts to the available hardware. If no sound channels or CIAs are available the emulator will disable automatically the options that uses that hardware.
  - The hardware needed for the emulation is allocated only when the emulation is running.
  - The windows of the emulator (both the control and display window) are appwindows, so you can drop snapshotsd inside to load.
  - Custom tape interface, much cheaper than a sampler.
  - You can run several copies of the emulator in multitasking. The only limit for the number of copies running is the available memory and the CPU power of the machine (or the patience of the user ;-)
  - Step-by-step execution of Z80 code, Z80 disassembling and breakpoints.
  - Full emulation of the R register.
  - Full emulation of BCD.
  - Emulated all the undocumented instructions of Z80.
  - AGA version can work in B&W or Color mode.

\*\* WORKS ON ANY MACHINE WITH AN 020 PROCESSOR \*\* \*\* FASTRAM RECOMMENDED \*\*

+3806 TRANSITION V1.0 UNPACK DISK

-----  
 Transition is a simple to use image convertor with a couple of processing tools thrown in for good measure. You can convert pictures to and from IFF (all modes including AGA), GIF, PCX, JPEG, BMP, PBM+ and OS2. Emboss, dithering and greyscale are all available as is batch processing.

 An updated version of SuperDMS. Now you can use every single feature in DMS from a VERY simple to use GUI.

X3810 BREAKIN BRICKS AGA UNPACK DISK

-----  
 Remember that old classic Break Out, hmm ?? This game has a lot of the same ideas (hm.. hm..) as the old classic has. The basic idea is very straightforward. You must use your mouse to move the 'bat' from left to right and from right to left, and try to hit the ball !!! . If this ball accidentally hits one of the funny blocks on the screen, you get lots of points !!!! This is a suped up AGA only Hard drive only version.

X3811 FEARS UNPACK DISK

-----  
This is the one level playable demo of the game supposedly very similar to Doom.

+3812 GARFIELD ANIM UNPACK DISK  
-----

This short animation is based on Two short stories from book No.2 in the Garfield paperback series. The gfx and sound fx are very good. Nice one for kids.

+3813 MR GREEDY ANIM UNPACK DISK  
-----

This is another animation based on one of the Mr Men books. It tells the story of Mr Greedy meeting a giant. Excellent entertainment for the kids.  
\*\* 2 MB RAM REQUIRED \*\*

+3814 ENLOCK V1.4 UNPACK DISK  
-----

Enlock is a superb dead easy to use hard drive password protection. It comes with a full installation routine, so you dont even have to know how to use dos. Its not as powerful as Multi User, but it will stop the casual computer user getting to the hot cracks on your hard drive.

+3815 WORDSEARCH DESIGNER V2.0 UNPACK DISK  
-----

Well as you can guess it allows you to design Word Search puzzles very easily on your computer and then allows you to print it for distribution to friends or more usefully, as a competition which can be distributed by clubs to raise funds. The program is already being used by many in this way.

X3819 PHOTOGENICS V1.2 DEMO UNPACK DISK  
-----

The art/image processing package that blew everybody away is now available in this limited demo version. The save function is disabled as are some of the loaders and effects.

+3820 IMAGEDESK V1.6 UNPACK DISK  
-----

ImageDesk is a program to catalog picture directories by generating small representants of the pictures, so called thumbnails. Those thumbnails are internally being expanded to objects which will include

---

all essential attributes of the represented pictures. Several thumbnail objects which corresponding pictures are in the same directory, could be saved together into a catalog file for being available immediately on request. These files could be saved packed, too provided XPK has been installed. This version includes the following new features:-

- Now executes AREXX programs on thumbnail click.
- Enhanced hotkey handling.
- New option HiQuality.
- Further AREXX commands.
- Enhanced slider gadget handling.
- File requester attributes are stored in the prefs, now.
- Larger thumbnail sizes possible.
- Config will be saved before ImageDesk exits
- Bug in the PCX reader removed.
- Reduced stack consumption.

+3821 DOPUS UTILS 2 UNPACK DISK

-----  
Loads of Arexx scripts and things to help make life easier for you whilst you are using Directory Opus. Things included are Cygnus Ed file handling, Lha handling, Arexx script handling + others.

+3822 EXCELLENT CARD GAMES 3 UNPACK DISK

-----  
5 superb card games on this disk. Poker, Czarina, Colours, Scottish and Napoleon.

+3823(AB) PAGESTREAM 3.0H PATCH UNPACK A B

-----  
The penultimate patch to Softlogiks now infamous DTP package. This update implements most of the remaining text features such as automatic hyphenation, paragraph spacing and page numbering. Typing speed has been improved in this version by 25% in frames with small amounts of text, and by 300% in frames with large amounts of text! Many other text speed improvements have been made, including improved memory handling. Text is still slower than we would like, but it is definitely better! This is the most significant update yet with literally dozens of bugs corrected.

+3824 RED DWARF QUIZ UPDATE #2 UNPACK DISK

-----  
This disk will update you Red Dwarf Trivia Quiz with loads of new questions and various other bits and bobs. The RDTQ is on disk 3693 in our library and is required for this patch to work.

X3825 THE MASK CARDSET UNPACK DISK

+3836(AB)BLACK DAWN 5: A NEW BEGINNING      UNPACK A    B

-----  
 This is the fifth game in the Black Dawn series and what a corker it is too. Again, the game is played with first person perspective ala Dungeon Master, and the game is very Dungeon Masteresque. Black Dawn 5 attempts to bridge the gap between Black Dawn 2 and Legions of Dawn. There are six missions in this demo version.

+3837(AB) ACT OF WAR HELPER SET                      UNPACK A    B

-----  
 This 2 disk set contains all that you need to set up your own Act of War missions, it includes gametiles, maps, weapons info and weapon pictures. All you need to do is the other parts, put the whole thing together with a little imagination. Each different type of mission is best put on a different disk to avoid any hassle later on with borders.

+3838 GALLEONS                                              UNPACK DISK

-----  
 Galleons is a two player game in the same vain as Tanx and Bip. The sole aim of this game is to blow the other player out of the water. This is done through skilful use of your galleon. The winner is the boat that is still a float in the water. Galleons features:-

- Water waves.
- Destroy the land with your balls (cannon balls that is).
- 50Mhz Update.
- Two player all time classic game ?.
- Never the same game twice.

X3839 MANGA MANIACS                                      UNPACK DISK

-----  
 A cardset for all you Anime fans.

X3840 BEAVIS & BUTTHEAD CARDSET                      UNPACK DISK

 A cardset featuring weird artwork from famous Amiga demos.

+3842 MORTAL KUMQUAT 3                                      UNPACK DISK

-----  
 A brilliant 2 player only beat-em up with fruit. Thats right folks you did read correctly. Mr Lime taking on Mr Orange, (sounds like Reservoir Dogs)

---

in a battle to the death. Lovely graphics and some silly sound fx make this an alround top notch PD game.

+3843 UTILS DISK UNPACK DISK

-----  
DiskMatter V1.14, DCATDiskCopy V1.05, SimCityFundCheat V1.03, YachtCPlus V1.25, MemoryMonitor V1.03.

+3844(AB) CAMERAS & ACCESSORIES UNPACK A B

-----  
This program gives the novice, or those wishing to upgrade, some idea of what the different types of camera available will do. Armed with this information, even a print out, a visit can be made to the camera shop with some real idea of what is required. You then come out with what YOU want, not necessarily what the dealer wanted to sell you ! Having bought the new camera, this program gives an idea of what is available to go with it. It is probably wise to use the two programs in conjunction, as studying them will tell the prospective purchaser exactly what is needed to fulfill all their perceived needs.

+3845(AB) THE PORTRAIT UNPACK A B

-----  
This tutorial is a complete re-write of an earlier version talking about how to shoot portraits. Probably the most common subject for the camera will be people. Families, kids, pretty girls, characters etc. Studying the pages of this computer tutorial will help the beginner get better results, and there should be a few points that will help the more advanced worker too.

+3846(AB) DEVELOP & PRINT UNPACK A B

-----  
This program is a tutorial on setting up a darkroom to do your own developing and printing. It also looks at associated processes. The keen photographer is likely, eventually, to decide to have a go at printing in black and white or colour. Following the advice given here will make the initial experience that bit easier than 'going it alone'. It also includes a section on processing the negative and other processing related text.

X3847 NOSTROMO CHEATS V5.00 AGA UNPACK DISK

-----  
This edition has over 1200 cheats, including full solutions for DreamWeb and Valhalla 2.

+3848 NO SAMPLER UTILS #4 UNPACK DISK

-----  
Welcome to "No Sampler?" Utilities Volume 4. This time we have a couple of utilities to convert between different sample formats and a program to correct filenames of Soundtracker modules taken from a PC. Also included is an Amos program by Peter Kwan which converts .WAV samples to Amiga RAW samples, and there are a selection of utilities by Ben Hutchings.

X3849 DATATYPES DISK UNPACK DISK

-----  
Over 35 datatypes on this disk for you to use with WB3. We have Gif, Jpeg, Tiff, BMP, Font, PCX, Info, Png and loads more.

+3850 MASTERBLASTER V2.0 UNPACK DISK

-----

This game is based on the idea of Dynablaster. You can play with up to 5 oponents at the same time. The main goal is to survive and kill all the other enemys. You can do this by placing bombs on the ground. They will destroy the brick walls around you and may even release some extras to collect.

+3851 SCION V4.07 UNPACK DISK

-----  
This is a specialised database for keeping track of genealogical information. It features a full, easy to use, Intuition interface. Version 4.07 is a substantial upgrade to the earlier Version 3.13. The programme is totally non-sexist and secular in nature, and correctly handles multiple marriages, "unconventional" marriages, adopted children, and unmarried parents. Other features include dynamic on-screen ancestor and descendant charts, extensive on-line context-sensitive help, flexible "regular expression" searching, and multiple ARExx ports with extensive command set.

+3854 TERM V4.4 000 VERSION + DOCS UNPACK DISK

-----  
Term is a telecommunications program designed for use with any Commodore-Amiga computer running Kickstart 2.04 or higher. New features to V4.4 include :-

- Now uses gtlayout.library v13 to layout the menus; now many more menu items and menus fit onto small screens.
- Screens and windows now open large enough for the status line display to fit.
- The screen saving/printing code is now smart enough not to include the status line in the bitmap that it is going to be output.
- The phonebook now uses a fixed-width font when running under Kickstart 2.04.
- The status line display boxes are a bit wider now, so hopefully no data will be cut off any more.
- Added new "Direct connection" option to the serial settings. If enabled, this switch suppresses RTS/CTS warnings and disables the carrier check. This is useful for direct nullmodem connections and for using the Amiga as a dumb terminal.
- You can now configure the opening size and position of the standard asl requesters (file, font, display mode) in the misc settings. Just select the positioning mode you want (centered or placed relative to the top left corner of the main window) and click on the "Edit..." button. A file requester window will open. Drag it to the position you want and change its size if necessary, then click on "Use". 'term' will keep position and size as default values for the requesters to open.
- Added LZX archive file type.
- and loads loads more.

+3855 TERM V4.4 030 VERSION + DOCS UNPACK DISK

-----  
See 3854 for full details.

+3856 TERM V4.4 EXTRAS, LIBS & LOCALE UNPACK DISK

This disk contains the suport utilities and librarys for Term 4.4. It also includes the locale files for France, Italy, Spain, Holland and Sweden.

---

+3857 INSTALL WB3.0 UNPACK DISK

-----  
This disk will install Workbench 3.0 full release to your hard drive. You will need your original disks for the job.

+3858 TRAP 'EM UNPACK DISK

-----  
A simple but addictive platform romp. Negotiate the 3 towers by destroying all the monsters on each level. Lay traps so that the various creatures get caught, then blast them to bits to finish them off. The 3 towers each contain 10 levels and every 5 levels are split with a 'gravity-ridden' jetpack course. There are many types of monsters and as you progress it becomes more difficult to destroy them. Some can avoid your traps, shoot at you, lay their own traps and even zoom around.

+3859 EASYCALC V2.0b UNPACK DISK

-----  
EasyCalc is the best PD spreadsheet ever developed. It contains literally dozens of features and rivals even the most expensive commercial packages. Features including:-

- 10 different style of graphs.
- 3 types of cell
- Over 50 cell functions
- Arexx Interface
- Supports Tooltypes
- Online tutorial
- and many more features

+3860 ANTZ UNPACK DISK

-----  
You are the Antmaster. Your mission is to give doom or deliverance to hundreds of tiny dot like creatures called the ants. You have to eat away the bad guys, pixel by pixel. Do this by charging ants towards them in a kamikazi attack. No ant survives an attack with an enemy. Their destiny is death.

+3861 THIRD DIMENSION #16 UNPACK DISK

-----  
Yet another issue of this excellent disk mag. It contains stacks and stacks of articles for 3D Construction Kit users. Lots of handy hints and tips on here.

+3862 ORGANIZER BITS UNPACK DISK

-----  
This disk contains lots of extra supplements to be used with Digita's superb Organizer. Topics include Amiga related subjects i.e. PD Houses, User groups. TV & Film i.e. Top 10 Tottie on TV. Sport and some miscellaneous stuff too.

+3863 DARK ANGEL UNPACK DISK

+3864 NOTEBOOK UNPACK DISK

-----  
Notebook is a flexible sorting and organizing program that can be used as a schedule-notepad-address book, or less specifically as an organizer of

---

groups of "Items" that you type in. You can attach pictures and text files to Notebook Items and use certain Codes and Commands to adapt Notebook to a wide variety of tasks.

+3865 DOWNLOADER UNPACK DISK

Downloader is a program that downloads 26 new printer fonts into most 24-pin dot matrix printers and into other printers that can emulate the Epson Q standard. It also has a text-file printing facility that can change downloaded fonts and text styles mid-line.

+3866 STEREOPTICON UNPACK DISK

Stereopticon is a program that converts sets of normal IFF pictures into true stereoscopic pictures viewable through red/blue glasses. Animators can use Stereopticon to make stereoscopic animations. Programmers can create games with blitter objects that seem to move through three-dimensional space, from far behind the monitor screen to well in front of it.

+3867 THE ZX FILES #1 UNPACK DISK

The ZX Files is a disk magazine dedicated to everyone out there who either still uses a Spectrum or uses the Spectrum emulator on the Amiga. As this is the first issue, articles are a bit thin on the ground, but the author is hoping that YOU lot out there will contribute. This issue contains various cheats, instructions for quite a few games, some speccy artwork (?) and some technical news from the last few years. So put on those rose tinted spectacles and get bashing those rubber keys.

X3868 A GALLERY UNPACK DISK

Some absolutely stunning hand drawn artwork by a guy called Jason Brown. The quality of the pictures is amazing. In fact i would go as far as to say that this is one of the best slideshows i have ever seen. This geezer should be working for a software company.

+3869 LOTTERY PRO + UTILS UNPACK DISK

This is a lottery predictor with a difference. There are various ways of picking your numbers with this program, but the best way on here is to play games to do the job. Joystick wiggling, Horse racing, Quiz, Target practise and a couple of others help make lottery predicting fun, instead of all that statistical rubbish you read in the papers. Also on here are a stack of WB and CLI utils.

+3870 SHAPESHIFTER V3.0b UNPACK DISK

ShapeShifter is a multitasking Macintosh II emulator for the Commodore Amiga. It allows programs written for Apple Macintosh computers to run on the Amiga without hardware modifications or expansions. The emulation runs as a normal task under the Amiga operating system, so that Amiga and Macintosh programs can be used concurrently. With ShapeShifter you can combine the flexibility of the Amiga with the power of Macintosh software!

Some of the emulation's features:-

- Color display with up to 256 colors on AA Amigas (1200/4000), up to 16 colors on older models in all available resolutions
  - Support for Amiga graphics cards with EGS/CyBERgraphics, the Picasso-II and the Merlin up to 16,7 million colors
  - Needs no MMU
  - No support for other Macintosh operating systems apart from System 7.x, only 32 bit clean programs will run
  - Uses up to two Amiga disk drives. Macintosh HD disks can be used directly with an HD drive as in the Amiga 4000, DD disks formatted with ShapeShifter can be read by any Macintosh. 800K Macintosh DD disks, however, cannot be used.
  - Simulation of up to two Macintosh volumes in AmigaDOS files
  - Can use up to two hard drive partitions directly as Macintosh volumes
  - A SCSI interface in the Amiga can be accessed from the Macintosh and allows for using CD ROM drives, removable hard disks and other devices
  - Access to Ethernet networks with MacTCP
  - Multichannel sound output
  - An Amiga sound digitizer at the parallel port is supported
  - Amiga tablets can be used from the Macintosh side
  - Redirection of the two Macintosh serial ports to the serial/parallel ports of the Amiga, even on I/O expansion cards
  - Texts can be exchanged via the Macintosh and Amiga clipboard
  - An AmigaDOS handler exists to access the files on Macintosh volumes from every Amiga program
-
