DiskLine v1.04

DOCs for DiskLine v1.04 (c) 1994 by Glen Neal.

Requirements --

Windows 3.1. Soundblaster is optional.

Description --

DiskLine runs in the lower-right corner of the Windows screen.

Operation --

Here are the operation of the three buttons:

A : About DiskLine, shows the version number.

C : Configure. Lets you pick which two drives to show.

X : Exits the program at once.

Now you can drag DateLine where you want, and it will remember the new position next time it is run.

If you don't have soundblaster, it now beeps the PC speaker.

That's about it!

THIS IS SHAREWARE! --

You may try out this program for a reasonable time. If you continue to use it, please register it.

This shareware version is NOT crippled in any way! It simply reminds you to register, once for every 10 times you use it.

I have my doubts about this shareware business. We will see about honor.

WHY SHOULD I REGISTER? --

Aside from freedom of guilt and a good nights sleep, here's what you get:

+ A disk containing the registered, NO NAG latest version.

+ A megabyte of .wav file samples on the disk to try out.

+ Full access to the support bbs PC-Oklahoma for three months.

+ This documentation in printed form.

HOW DO I REGISTER? --

The price of DiskLine is $15.00.

+ Online, using Visa, Mastercard or Discover by calling the support bbs
   at 405-243-3200. After you are online, type CHARGE at the main prompt.

+ By voice, using Visa, Mastercard or Discover by calling me at 405-243-0574.

+ By mail, send check or money order for $15.00 to:

   Glen Neal
   220 Ridgecrest #45
   Elk City, OK 73644

HOW DO I GET SUPPORT? ---

+ Online, call the support bbs PC-Oklahoma at 405-243-3200.
   Page the sysop, or leave the sysop a comment or message.

+ By voice, call me at 405-243-0574.

HOW DO I GET THE NEWEST VERSION? --

+ Call the support bbs PC-Oklahoma at 405-243-3200.
   New versions are posted regularly.

+ We have several Windows 3.1 products for you to try. All are available
   for downloading on your fist call.

TROUBLESHOOTING ---

+ If you get the message saying BWCC.DLL was not found, or error = -1,
   call the support bbs at 405-243-3200 and download BWCCDLL.ZIP.

   Unzip it into your Windows System folder. No need to restart windows.

   Other windows programs will need this DLL also. It is similar to the DLL
   used by Visual Basic, VBRUN200.DLL.

+ If it says a sound driver is not installed, go to the Windows control
   panel, and run the Sounds icon. Select ADD, and pick a Soundblaster
   driver that is for your card version.

   I will add support for other sound cards and the pc speaker soon.

Please call the support bbs if you have problems or discover a bug(!).
