placement of objects in the DOOM playfield. Additionally, RanDOOM has some smarts about the manner in which it will randomize things - it's designed to never leave you with a pillar blocking the exit, or a keycard on the opposite side of the door from where you start, or to erase all the DEATHMATCH warp-in spots with other objects preventing DEATHMATC network play, or to replace the endgame bosse with other objects (thus preventing the completion of an episode). In short, RanDOOM will always leave you with a playable level.
