

Faery Tale Adventure 2: Halls of the Dead Trainer v1.1 Documentation

Introduction

This is a trainer for Faery Tale Adventure 2: Halls of the dead for Windows 95. If you are using the DOS version of the game, then this trainer will probably not work.

Instructions

Once all the files are unzipped into your FTA2 directory, simply follow the instructions for use.

- Run your FTA2 game
- Press **Alt+Tab** to return to Windows 95
- Run the trainer and select the desired options
- Press **Alt+Tab** to return to FTA2

Options available

Once the trainer has started, there are four options available.

1. All hitpoint = 255
2. Julian mana = 100
3. Philip mana = 100
4. Kevin mana = 100

These options are self-explanatory. To enable any of these options, simply click on the desired option once. Once the option is enabled, a # should appear before the enabled option.

For example, clicking on **All hitpoint = 255** will freeze the brother's hitpoints at 255. The option will now look like this **#All hitpoint = 255**. To disable any option, click on it once.

The pull down menu next to each option allows you to specify a shortcut key to enable or disable that option without having to minimize the FTA2 game.

Clicking once on the box situated on the top-left hand corner under the ? will give some details about the trainer.

Important note

This trainer was made for the Win95 version of Faery Tale Adventure 2: Halls of the Dead. If you have any other version, it is unlikely that the trainer will work. In addition, the trainer was made for use with the full installation size. So if you have the minimum install, or anything other than the full install, do not expect the trainer to work. In any case or scenario with exception of the ones stated, use of this program may cause damage to your game, anyother program, and/or your computer.

Disclaimer

Use this program at your own risk. I am **not responsible for any damage** using this program may do to your computer, hardware or software, or anything else (i.e. you, your dog, etc).

Contacting me

Feel free to contact me at gkltan@singnet.com.sg for any comments or questions. But please do not contact me if you are unable to get the trainer to work. If the trainer does not work, check if you have followed the instructions carefully. If you have, try running the full installation of FTA2 and not the smaller install sizes.

If worst comes to worst, go to www.avault.com/cheat/ and download the **Magic Trainer Creator**. This program lets you make trainers. Do not contact me about this as I am not the author, nor am I a programmer of any sort.
