

Release Notes for AQM 3.0H

Monday, May 21, 1996

1: Digital's Alpha AXP Architecture Now Supported by AQM.

AQM version 3.0G is now available for the Digital Alpha/AXP platform. Please call Argent Software for more information.

2: Internationalization of AQM

Previous release of AQM did not correctly support languages other than English in the manner in which security was assigned to objects and files. Version 3.0H correctly supports all languages supported by Windows NT for security definitions.
