

Installation Instructions

The StarPress Multimedia Gallery is automatically installed when you install Material World. You can start the software at any time by double-clicking on the Gallery icon in the StarPress Program Group.

The StarPress Multimedia Gallery requires QuickTime for Windows®.

For video and sound driver and card compatibility please consult the QuickTime for Windows® Read Me.

To get the best out of *StarPress Gallery Version 1.0*

Make sure your computer meets these minimum requirements. These requirements are a 386/33 mhz with 4mb of RAM.

Your CD-ROM drive must be a double speed drive. That is, its transfer rate must be 300kb/s or better.

Your video card must support at least 640x480 pixels and 256 colors. Make sure that Windows is configured to display this resolution or greater.

Your sound card's driver must be installed in order to work in the Windows environment.

The default settings have been selected to be compatible with most of the hardware configurations. To improve performances, you can try to change the following settings:

-in QTW.INI in your Windows directory, replace

```
[Video]
Optimize=Driver
```

by

```
[Video]
Optimize=Hardware
```

-in AMT.INI in your Windows directory, replace

```
[Video]
Transparency=Bitmap
```

by

```
[Video]
Transparency=Driver
```
