

How Does The Song Go Installation:

Unzip howdo201.zip into a temporary directory (after installation, this directory may be deleted).

Remove previous version of How Does The Song Go:

- delete directory (folder) c:\rtsoft\howdo, and
- remove program manager item (start menu shortcut) to How Does The Song Go.

Install:

- Point file manager (explorer) at the temporary directory, and
- double click on the setup item.
DO NOT use file-run (start-run) - the setup program has, under certain conditions, been know to fail using run command.

By default, the setup program will:

- copy these files to your windows\system directory (folder) if they do not exist:
 - mvapi2.dll
 - mvbmp2.dll
 - mvbrkr2.dll
 - mvfs2.dll
 - mvftsui2.dll
 - mvmci2.dll
 - mvsrch2.dll
 - mvtitle2.dll
 - mviewer2.exe
 - commdlg.dll DO NOT remove these two files, if you remove HowDo and
 - ctl3d.dll viewer (they may be used by other programs).
- create directory (folder) c:\rtsoft,
- place three files there: howdo.mvb, vwrhelp.mvb, and howdo.ico,
- create program manager group (start menu group) rtsoft,
- create program manager item (start menu shortcut) to howdo.mvb, and
- associate mviewer2.exe with .mvb files.
