

This is a kaleidoscopic screensaver by a fella by the name of Dave Johnson in WA. Given the D-head appreciation of excellent visual aesthetics, this may well be the Windows S-saver for you. Judge for yourself, of course, but I think old Dave truly did his homework here.

LOTS of options (the "random" setting is great). Plays along with your CD player (if you have one).

I'm not trying to be a salesguy for Dave. I don't even know him personally. Nonetheless, this is a truly enjoyable work of art. Thought it might be nice to have the file available here.

coop@inetnebr.com (Randy Cooper)

Please . . .forward any kudos, questions, etc. about the saver to Dave. I love it . . . but the creation is not mine.

Peace
