

MOUTH KOTE®

Long-Lasting Oral Moisturizer

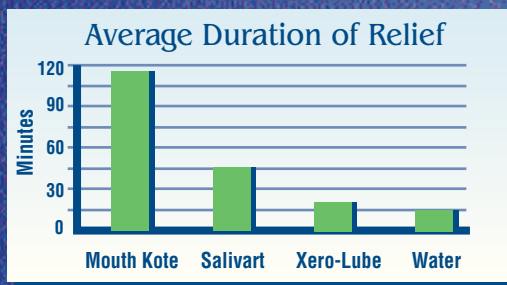

with Natural Yerba Santa

Patients preferred Mouth Kote 4 to 1

In a double-blind clinical trial^{1,2}, 83% of patients preferred Mouth Kote to Xero-Lube®, 78% preferred Mouth Kote to Salivart® or Water. The remaining patients stated no preference; none of the patients preferred the other products.

Long-lasting relief

In a double-blind crossover clinical trial^{1,2}, Mouth Kote provided the longest lasting relief for post-radiation and autoimmune disorder patients with dry mouth.

Patients with partial salivary function may experience relief for up to five hours

Natural Relief From Dry Mouth
(Xerostomia)

MOUTH KOTE®

Eases The Discomfort Of Dry Mouth (Xerostomia)

Patients with dry mouth experience:

- ◆ difficulties eating, speaking and sleeping³
- ◆ severe and rapid onset of dental caries³

Dry Mouth is associated with:

- ◆ aging
- ◆ radiation treatment
- ◆ certain medications
- ◆ some diseases (Sjögren's Syndrome, diabetes, arthritis, AIDS, etc.)
- ◆ post-surgery

Mouth Kote is a new class of oral moisturizer that creates a homogeneous layer in the mouth that has a viscosity and lubricity similar to saliva.

Yerba Santa Extracts

Mouth Kote contains natural mucopolysaccharides, extracted from the Yerba Santa plant. These mucopolysaccharides mimic the glycoproteins in saliva by holding the aqueous component in contact with the epithelial cells. This adhering action resists moisture dissipation.

Yerba Santa has been used in oral medications since the beginning of the 20th century with no known side effects or adverse reactions.

Great Lemon-Lime Taste, Sugar and Alcohol Free

Compliance will not be a problem thanks to Mouth Kote's pleasant lemon-lime flavour. Sweetened with Xylitol, which has been shown to help resist the formation of dental caries.⁴

Mouth Kote is now available in pharmacies!
