Important – Please Read

- When running on Windows Vista, Registry Toolkit
should be run "As Administrator". Do this by right
clicking on the program shortcut and select "Run As
Administrator" when launching the program. Do this
even if your Vista user account is one with full
access permissions. Alternatively you can manually
modify the shortcut properties for the shortcut to
launch the program (Right click on the shortcut;
Click on Shortcut tab; Click on Advanced; Check
"Run as administrator")
