

Zap'T'Balls II

Current Version

v1.0.1 - September 21st, 1998

Zap'T'Balls II is a Mac conversion of the Arcade hit, Super Pang.

Zap'T'Balls II is based heavily on the Amstrad CPC game of the same name, while taking a few pieces from Super Pang (otherwise known as Super Buster Bros in the US). ZTB2 features the two different game modes found in Super Pang, namely travelling through many scenes and one fixed scene where more and more balls keep appearing.

A screenshot is available on the WWW.

Zap'T'Balls on the Mac has gone through a large number of revisions through the years. Most notably, Zap'T'Balls III is now under development, featuring vastly improved graphics and gameplay.
