Form of Presentation xi
Future Development of NCSA DataScope xii

Chapter 1 NCSA DataScope Tutorial

Chapter Overview 1.1
Installing NCSA DataScope 1.1
Getting Started 1.1
Running NCSA Telnet 2.3MacTCP 1.1
Running NCSA DataScope 1.2
Loading a Dataset 1.3
Generating Images 1.5
Selecting Values 1.6
Using the Notebook for Calculations 1.6
Saving a New Dataset 1.7

Using Online Help 1.8

Exiting the Program 1.9

Chapter 2 Data in NCSA DataScope

Chapter Overview 2.1

Two-Dimensional Datasets 2.1

Evenly Spaced Grids 2.2

Unevenly Spaced Grids 2.2

Polar-Oriented Data 2.3

File Formats 2.3

HDF Files 2.3

Text Files 2.3

Loading and Saving HDF Files 2.5

Loading Text Files 2.6

Chapter 3 Window Types

Chapter Overview 3.1

The Text Window 3.1

Specifying Text Window Characteristics 3.1

Selecting Regions 3.3

Extracting Datasets 3.3

The Image Windows 3.4

Simple Color Image 3.4

Interpolated (Smoothed) Image 3.5

Polar Image 3.5

Image Size 3.6

Color Palettes 3.8

Image Generation 3.8

Stopping Image Generation 3.9

Window Synchronization 3.9

The Notebook Window 3.9

Chapter 4 Notebook Calculations

Chapter Overview 4.1

Notebook Calculations 4.1

Rules for Calculating 4.1

Constant Result Calculations 4.3

Built-In Functions 4.3

Trigonometric Functions 4.4

Mathematical Functions 4.4

Data Manipulation Functions 4.5

Transformation Functions 4.5

Built-in Kernels 4.5

Nesting Functions 4.6

Kernel Convolution Functions 4.7

Kernel Array Construction 4.9

Generic Kernel Examples 4.10

Kernels for Built-in Functions 4.12

External Libraries of Functions 4.14

Using the External Library Functions 4.14

Creating an External Function 4.15

Creating Your Own Library Functions 4.17

Chapter 5 Programs That Run on Remote Hosts

Chapter Overview 5.1

Networking Introduction 5.1

Installing Your Network 5.1
Checking Your Networking Setup 5.3

Using DataScope for Remote Computing: Delivering Data to DataScope with TCP/IP 5.4

Generating an Image Automatically 5.5

Making Movies with a Sequence of Arrays 5.5

Making Faster Movies 5.6

Saving to Disk 5.6

Command Summary 5.7

Using a Remote Network Server for Notebook Functions 5.10

Basics 5.10

Writing Your Own Functions 5.13

Writing FORTRAN Functions 5.15

Using a Sample Program 5.17

DataScope's Interactions with a Remote Host 4.18

Chapter 6 NCSA DataScope and Other Programs

Chapter Overview 6.1

Using NCSA DataScope with Other Programs 6.1

Cut, Copy, and Clear 6.1

Paste 6.2

Permanent Data 6.3

HDF Files 6.3

Obtaining HDF 6.5

Chapter 7 NCSA DataScope Menus

Chapter Overview 7.1

About the DataScope Menus 7.1

The Apple Menu 7.1

The File Menu 7.2

The Edit Menu 7.3

The Image Menu 7.4

The Numbers Menu 7.5
