

HAPTER 4: BOSSES!

1. This is a touchy area that I'm going to tackle, but if I must...

Be careful with boss placement, don't put him too close to an entrance or exit...make the player sweat a little.

2. Also, when using multiple bosses, make sure there is enough ammo & health to go between them.

3. An exception, here: if using multiples, you'll probably already have all keys necessary to complete the level; then, maybe putting a random boss directly at the exit is OK.
