List of Tables

Table 1-1 CPU Modules and System Names 5
Table 1-2 Number of TLB Entries by Processor Type 9
Table 1-3 Cache Algorithm Selection 23
Table 4-1 VME Bus PIO Bandwidth 66
Table 4-2 EISA Bus PIO Bandwidth (32-Bit Slave, 33-MHz GIO Clock) 70
Table 4-3 EISA Bus PIO Bandwidth (16-Bit Slave, 33-MHz GIO Clock) 70
Table 4-4 VME Bus Bandwidth, DMA Engine, D32 Transfer 73
Table 5-1 Fields of the dsreq Structure 82
Table 5-2 Flag Values for ds_flags 83
Table 5-3 Return Codes From SCSI Operations 85
Table 5-4 SCSI Status Codes 87
Table 5-5 SCSI Message Byte Values 87
Table 5-6 Fields of the dsconf Structure 88
Table 5-7 dslib Function Summary 90
Table 5-8 Lookup Tables in dslib 95
Table 6-1 Functions for Outgoing External Signals 114
Table 6-2 Functions for Incoming External Interrupts 115
Table 8-1 Entry Points in Alphabetic Order 138
Table 8-2 Use of Driver Entry Points 139
Table 9-1 Functions to Manipulate Device Numbers 181
Table 9-2 Header Files Often Used in Device Drivers 185
Table 9-3 Functions for Kernel Virtual Memory 188
Table 9-4 Functions for Allocating pollhead Structures 189
Table 9-5 Functions for Allocating buf_t Objects and Buffers 190
Table 9-6 Functions for Suballocation 191
Table 9-7 Functions for General Data Transfer 192
Table 9-8 Functions Moving Data Using uio_t 194

Table 9-9 Functions to Test Physical Addresses 195
Table 9-10 Functions to Manipulate a vhandl_t Object 196
Table 9-11 Functions to Convert Bytes to Sectors or Pages 198
Table 9-12 Functions Related to Physical Memory 199
Table 9-13 Functions to Map Buffer Pages 199
Table 9-14 Functions Related to Cache Coherency 200
Table 9-15 Functions for User Process Management 202
Table 9-16 Functions for Basic Locks 205
Table 9-17 Functions for Mutex Locks 207
Table 9-18 Functions for Sleep Locks 209
Table 9-19 Functions for Reader/Writer Locks 211
Table 9-20 Functions to Set Interrupt Levels 213
Table 9-21 Functions for Timed Delays 214
Table 9-22 Functions for Synchronizing Block I/O 217
Table 9-23 Functions for Synchronization: sleep/wakeup 219
Table 9-24 Functions for Synchronization: Synchronization Variables 220
Table 9-25 Functions for Semaphores 222
Table 10-1 Compiler Variables Tested by System Header Files 229
Table 10-2 Compiler Options for 32-Bit Kernel Modules 230
Table 10-3 Compiler Options for 64-Bit Kernel Modules 231
Table 11-1 Commands for Symbol Conversion and Lookup 256
Table 11-2 Commands to Control Execution 257
Table 11-3 Commands to Manage Virtual Memory 259
Table 11-4 Commands to Display Memory 260
Table 11-5 Utility Commands 261
Table 11-6 Commands to Display Memory and Symbols 265
Table 11-7 Commands to Display Process Information 265
Table 11-8 Commands to Display Locks and Semaphores 267
Table 11-9 Commands to Display I/O Status 267
Table 11-10 Commands to Display buf_t Objects 268
Table 11-11 Commands to Display STREAMS Structures 268
Table 11-12 Commands to Display Network-Related Structures 269
Table 13-1 VME A16 Addressing in Crimson Systems 307

Table 13-2 VME A24 Addressing in Crimson Systems 307
Table 13-3 VME A32 Addressing in Crimson Systems (One Bus) 307
Table 13-4 VME A32 Addressing in Crimson Systems (Two Buses) 308
Table 13-5 Accessible VME Addresses in Each System 310
Table 14-1 Functions to Create and Use PIO Maps 326
Table 14-2 Functions That Operate on DMA Maps 330
Table 14-3 Functions to Manage Interrupt Vector Values 332
Table 15-1 Host Adapter Driver Classes 355
Table 15-2 Host Adapter Function Summary 357
Table 15-3 Input Fields of the scsi_request Structure 363
Table 15-4 Values for the sr_flags Field of a scsi_request 364
Table 15-5 Values Returned From a SCSI Command 366
Table 15-6 Software Status Values From a SCSI Request 366
Table 15-7 SCSI Status Bytes 367
Table 15-8 Host Adapter Status After a SCSI Request 368
Table 15-9 Adapter Error Codes 378
Table 15-10 Primary Sense Key Error Table 379
Table 15-11 Additional Sense Code Table 380
Table 15-12 SCSI State Error Messages 384
Table 16-1 Important Reference Pages Related to Network Drivers 395
Table 16-2 Mutual Exclusion Macros for ifnet Drivers 398
Table 17-1 Functions to Create and Use PIO Maps 439
Table 17-2 Functions for IRQ and Channel Allocation 442
Table 17-3 Functions That Operate on DMA Maps 445
Table 17-4 Functions for EISA DMA 446
Table 18-1 GIO Slot Names and Addresses 513
Table 19-1 Multiprocessing STREAMS Functions 548
Table 19-2 Kernel Entry Points 554
Table A-1 Driver Exported Names 564
Table A-2 Device Driver Interface Objects 565
Table A-3 STREAMS Driver Interface Objects 566
Table A-4 Kernel Functions 566
