About This Guide xi
What This Guide Contains xii
What You Should Know Before Reading This Guide xii

1. The IRIX Operating System 1
About the IRIX Operating System 1
Standards Compliance 1
Internationalization 2
Networking 3
X Window System 4
Silicon Graphics Extras 4
Fast 3D Graphics 4
Parallel Programming 5
Real-Time Enhancements 5
High-Performance I/O 6
Indigo Magic Environment 6
Device Drivers 6
Writing an Application Program 8

2. IRIX Developer Documentation 11
A Documentation Roadmap 11
The IRIS Developer's Option 13
An Annotated List of Manuals 14
Operating System Level Documentation 14
Compilers 15
User Interface Tools 17
Software Development Tools 18
Application Libraries 20

3. Compilers 23
C and C++ 23
Fortran 77 24
The Parallelizing Compilers 24
Power C 24
Power Fortran Accelerator 25
Pascal 26
Ada 27

4. User Interface Tools 29
X Window System 29
Xlib and Xt 30
4Dwm 30
User Interface Toolkits 31
OSF/Motif and IRIS IM 31
IRIS ViewKit 32
Indigo Magic Desktop Integration 34
Learning About Silicon Graphics User Interface Style 34
Integrating Your Application Into the Desktop 34

5. Software Development Tools 37
Creating Executable Files 37
Compiler Drivers 37
Object Files and Dynamic Linking 38
IRIX Tools for Debugging and Tuning Your Program 39
Debugging Tool 39
Tools for Object File Query and Manipulation 40
Performance Tuning Tools 41
The CASEVision Programming Tools 44
The CASEVision Environment 45
CASEVision/WorkShop 45
CASEVision/WorkShop MegaDev 47
CASEVision/WorkShop Pro MPF 48
Version Control and Configuration Management 48
CASEVision/Tracker 48
CASEVision/ClearCase 49

6. Application Libraries 51
Graphics Libraries 51
OpenGL 52
Open Inventor 54
IRIS Graphics Library 56
IRIS Performer 57
ImageVision Library 59
IRIS Digital Media Development Environment 63
IRIS Digital Media Libraries 63
Digital Media Tools 66
Printer/Scanner Management 67

Index 69
