List of Examples

Example 2-1 Schematic of Using fork() 16
Example 4-1 Using systune to Check Address Space Limits 46
Example 4-2 Function to Lock Maximum Stack Size 50
Example 5-1 Timer Initialization 57
Example 6-1 Setting a Nondegrading Batch Priority 71
Example 6-2 Displaying Tuning Variable ndpri_hilim 71
Example 6-3 Setting a Real-Time Priority 71
Example 6-4 Initiating Gang Scheduling 74
Example 6-5 Setting the Time-Slice Length 76
Example 6-6 Command to Assign Process to Processor Set 77
Example 6-7 Setting the Clock CPU 79
Example 6-8 Setting the fasthz CPU 80
Example 6-9 Number of Processors Available and Total 83
Example 6-10 Restricting a CPU 83
Example 6-11 Assigning the Calling Process to a CPU 84
Example 6-12 Making a CPU nonpreemptive 87
Example 7-1 Skeleton of an Activity Process 101
Example 7-2 Alternate Skeleton of Activity Process 102
Example 7-3 Function to Set INJECTFRAME Exception Policy 120
Example 7-4 Function to Set STRETCH Exception Policy 120
Example 7-5 Function to Return a Sum of Exception Counts 121
Example 7-6 Function to Set Frame Scheduler Signals 125
Example 7-7 Minimal Activity Process as a Timer 126
Example 7-8 Exporting Device Driver Entry Points 128
Example 7-9 Device Driver Initialization Function 128
Example 7-10 Device Driver Termination Function 130
Example 7-11 Generating an Interrupt From a Device Driver 131

Example 8-1 Initializing Asynchronous I/O 139
Example 8-2 Polling for Asynchronous Completion 141
Example 8-3 Set of Functions to Schedule Asynchronous I/O 144
Example 8-4 Function to create a real-time file 152
Example A-1 Program to Return Cycle Counter Precision 176
Example A-2 Functions to Map and Read the Cycle Counter 177
Example A-3 Program to Exercise gettimeofday() 184
Example A-4 Producer/Consumer Program Test 1 188
Example A-5 Producer/Consumer Program Test 2 188
Example A-6 Producer/Consumer Program Demonstrating IPC Functions 188
Example A-7 Program That Explores the Address Space 198
Example A-8 Helper Functions for Using schedctl() 200
Example A-9 Asynchronous I/O Example Program 204
