

Jeskola Buzz 1.2

what's new:

- machines view

- * new way to create machines. machines are listed in gear/index.txt
- * led shows if a machine is doing something or not
- * mute generators by clicking the led
- * solo generators in popupmenu or by double clicking the led

- sequence editor

- * a sequence track is automatically created for new generators (you can still use ctrl+enter to create more)
- * return key selects the pattern under cursor and switches to pattern editor
- * F6 sets play position to current row
- * ctrl+i inserts a row on all track
- * ctrl+d deletes a row on all tracks

- pattern editor

- * an empty pattern is automatically created for new generators
- * return key switches back to sequence editor (does the same as F2)
- * ctrl+0..9 sets number of rows the cursor moves down after editing

- parameter dialogs

- * new slider control (supports entering values directly on keyboard and mousewheel)
- * parameter preset system
- * F11 hides/shows the dialog
- * dialog positions on screen are saved to bm* files
- * midi bindings are saved in bm* files
- * copy current parameters to clipboard (and paste to a pattern)
- * reset to default values
- * randomize all parameters

- other

- * realtime parameter recording to playing patterns (F7)
- * toggle looping play button
- * configurable colors (buzz.col)
- * search for missing machines
- * support for stereo generators (developers: use WorkMonoToStereo, ignore pin)
- * debug mode for developers (in CPU monitor dialog)
- * machine dlls and wave dirs are not loaded before needed anymore (fast startup, lower memory usage)
- * support for .txt machine help files
- * many bugfixes
- * registered users list (help/register buzz)
