Note: Here you will find some really GREAT mods too, believe me!  
 Synthetic sounds are so intense! Most of these mods will remind you  
 some great memories from the good ol' times.

However, most of these formats are "Amiga only"! Although several ones  
 can be played on the PC (PlaySID (of course), Oktalyzer, MED, OctaMED,  
 TFMX and I think that's all... but maybe someone will try to adapt all  
 the other ones some day..?)

Note: Don't forget to load the corresponding DeliPlayers in Delitracker  
 if you want to listen to these formats :)  
 And don't forget that most of these synthetic mods have got subsongs!  
 Don't listen to the first one only.

Enjoy!!
