Mods-Anthology

1.1   OLDIES! - Remember the good ol' times.....

Welcome to this special LINK to the very first mods

composed on the Amiga and the C64!

-=-=-=-=-=-=-

I'm a great oldies-lover :) and I couldn't have released this Collection,
so called "Anthology", without linking together (nearly) all the Oldies
included in these 4 CD-Roms.

[But "4 CD-Roms" is a problem, you will have to change CD quite often...]

Below you will find the ModList of the real 'Oldies' directory, which can be
found on the CD-4, in "/Modules/Misc", but there are tons of other oldies
over the 3 previous CDs, just go to the end of this list, you will find the
links to these mods.

Pay careful attention to the CD-number..........

..........unless you own a multi-CDRom drive! =)

-=-=-=-=-=-=-

[This list refers to CD-4!]

Note: As I said, these are not the ONLY oldies included in this Collection!

    You will be able to find some -great- other ones in the MAZ4: dirs,
    (standing for the mods sorted by Groups, on CD-3) like:

```
        MAZ4:Alcatraz        MAZ4:BeastieB        MAZ4:Brainsto
        MAZ4:Brnstmrs        MAZ4:Crypto          MAZ4:Deathstr
        MAZ4:Dexion          MAZ4:Fashion         MAZ4:IT
        MAZ4:Kefrens         MAZ4:MLP-Artw        MAZ4:Phenomen
        MAZ4:Predator        MAZ4:Rebels          MAZ4:Scoopex
        MAZ4:Silents         MAZ4:TheGiant        MAZ4:The_Link
        MAZ4:TJC             MAZ4:Triangle        MAZ4:W_Copper
```

    Obviously, there are some essential oldies in most of the Composers'
    directories, but there are too many to mention :)

    Simply don't forget:

      - On CD-1: 4mat, Bit-Arts, Diablo, Dr.Awesome, Firefox,
             Fleshbrain, FRED.

      - On CD-2: Glue Master, Greg, Gryzor (huhu!), Mahoney & Kaktus,
             Mantronix, Moby, Music-Steve, Peter Salomonsen.

      - On CD-3: Reflex, Romeo Knight, SLL, Splitter,
             Static, TSM, Uncle Tom and Walkman (The Great!).

    You may also find some rather old mods in the 'MAZ5:Misc_Old.*' dirs,
    (CD-4) Misc_Old.A-D, Misc_Old.E-K, Misc_Old.L-R, Misc_Old.S-Z,
    however not AS old AS the real oldies :) but still...

    Finally, don't forget the MAZ6: dirs (CD-4), all the synthetic modules!
    Of course there are tons of oldies in there! Don't miss the Custom
    modules, Delta Music, Future Composer 1.3, Future Composer 1.4,

FRED, Hippel, Hippel 7V, Hippel COSO, Mark II, Maniacs of Noise,
Music Assembler, PlaySID (of course! :), SidMon, SMUS, SoundMon,
Whittaker (Rhaaa, lovely!) and the only TFMX mod included (thanks to
Chris Huelsbeck himself) : Turrican II Main Title (7V) !!

Hhhmmmm, oldies, oldies... maybe poor samples, but so great melodies!

[Hint: Have a look at the /Tools/Amiga directory,
you will have a nice surprise, I guess...]
