Party-Results

1.1 Party Result-Files...

Welcome to this special LINK which groups together lots of Party Results from various Competitions and Contests held during the last five years.

You'll be able to directly play the corresponding modules (charted in each Music Compo) and even the modules coming from the charted demos! :)

Creating all these links was quite a hard'n long work, so enjoy it now!

Simply pay attention again to the CD-number stated on the right of each entry, in order to avoid the "Please insert Volume xxx" ;-)
(if you're not the LUCKY owner of a multi-cdrom drive)

1.3 Results from The Abduction '95

Very official serious unexaggerated superfinal Abduction 95 Results.

Graphics and music jurys contained highly respected scene/nonscene artists so that the justice in qualification was done. errors could've been done, but even highly respected scene/nonscene artists are humans. in music there were 56 tunes which were cut down to 19 final tunes. some ugly pictures were disqualified. most of the introentries were shown.

Abduction 95 had appr. 260 visitors. the tradition of abduction parties in the beginning of june will continue next year, so see you there.

Assembly '94 - The Third Phase

- Party Report #1 -

First of all, we would like to thank all of you who attended Assembly '94 and gave us your precious support. Without you we could never have accomplished all this. Thanks!

This text file was written to give people who weren't able to make it to Assembly some idea of what it was like. We are going to release more information at a later time in the Result Intro and also on the CD-ROM.

Anyway, let's get down to business...

In general Assembly '94 was a big success. We had the total of 2800 whole weekend visitors and 600 short visit visitors, which means that Assembly '94 was the biggest demo party held so far. Around 60% of all visitors were PC owners, the rest were Amiga and C-64 owners.

All the sponsors were satisfied and most of them were present at the party place as well. In the end the sponsor list looked like this:

1. Advanced Gravis
 2. Terton / ZyXEL Telecommunications
 3. Compaq Computer
 4. IBM
 5. ATI Technologies
 6. Toptronics
 7. Epic MegaGames
 8. Id Software
-

9. Sound Solutions
10. Creative Labs
11. Waite Group Press
12. Team 17
13. SSI
14. PC SuperStore
15. Megazone
16. Cute Communications
17. Finnish On-Line Games
18. Foley Hi-Tech & Hyperware
19. Data Fellows
20. Pro Component

There was a lot of people from the media present, for example a news crew from CNN.

The overall quality in the competitions was good. The 4kb intro competition on PC was the most surprising one, but ofcoz all the other competitions were good too.

We will send the prizes to the winners through mail. Only the winners in the Graphics competition will have to wait a while to get their prizes. This is because we have to at least try to find out which pictures might be direct rip offs (like the picture which originally came in third, made by Louie / Insane, which is technically a good picture but directly drawn from Heavy Metal magazine, and thus disqualified).

But as always, not everything went completely as planned. The biggest thing people complained about was the delays in between and during the competitions. In the end the PC demo competition, which was the last competition, was delayed by around one and a half hours. We were supposed to show only ten of the demos on the big screen, but the jury wasn't able to watch all the demos in time. That's why we had to show twenty demos even though we didn't really have the time for it. And to get the time, we decided to let the audience decide when a demo should be stopped/interrupted. But this only made some groups very angry. To correct this at the next party the finals should consist of only the top 10 demos, which would not be stopped no matter what.

It was not our meaning to offend those groups who felt mistreated, and we would like to apologize.

More news are to follow later!

Mini Report

Only 200 peoples came, but if you look at the name of the groups and the
quality of demos released all the elite french scene was here... The place
was really cool and the weather also hot! Organization was good, the
restaurant offered a good choice of food and drinks. Anyway due to the few
people, organizers got some financial problems...

The Trackering is divided into 2 weeks, here's the info :

---- Compo ---- Week : 1

The Trackering is held on channel #tt, every first and third Saturday of every month at 01.00AM CET / 07.00PM EST. After we gather, I'll declare contestants, and shortly after that you'll be DCC'd the Sample-Pack. The pack will be available on DCC in 1 hour, so i'll declare contestant until 02.00AM CET. Right after you get the pack you can begin.

I want all the tunes back before the following weekend, same time(1am cet/7pm est). I'll be on IRC as axl (of course) at that time so you can just dcc them to me, or mail it to 'axelsson@freenet.hut.fi' with either UUEncode or MIME.

* Note : TT is on AnotherNet,
so connect your irc-client to one of these AnotherNet servers:

```
- neato.org
- irc.netnation.com
- serve.org
```

---- Voting ---- Week : 2

After the compo is over, a vote-pack will be available on IRC or some FTP. Everyone can judge the TT compo, but a contestant must judge it or he'll be disqualified.

The voting system is a scale from 0-9. There will be a vote-form included in the vote-pack, which is almost self-explanatory :), if you need help on how to vote, then just mail me.

The results will be out 1 week after the compo has ended, it'll be distributed to all who's on the Mailing List, and on IRC.

---- Compo ---- Week : 1

The Trackering is held on channel #tt, every first and third
Saturday->Sunday of every month at 01.00AM CET / 07.00PM EST. After

I want all the tunes back before the following weekend, same time(1am

just dcc them to me, or mail it to 'axelsson@freenet.hut.fi' with either
UUEncode or MIME. This is just the deadline so you can send your tune
to me during the week.

* Note : TT is on AnotherNet,
so connect your irc-client to one of these AnotherNet servers:
