## DISCLAIMER

THIS SOFTWARE AND ITS DOCUMENTATION ARE PROVIDED "AS IS" WITHOUT REPRESENTATION OR WARRANTY OF ANY KIND, EITHER EXPRESS OR IMPLIED, INCLUDING WITHOUT LIMITATION, ANY REPRESENTATIONS OR ENDORSEMENTS REGARDING THE USE OF, THE RESULTS OF, OR PERFORMANCE OF THE INFORMATION, ITS APPROPRIATENESS, ACCURACY, RELIABILITY, OR CURRENTNESS. THE ENTIRE RISK AS TO THE USE OF THIS INFORMATION IS ASSUMED BY THE USER. IN NO EVENT WILL JOHN STAPLES, VISUAL SOFTWARE DESIGN GROUP OR IT'S EMPLOYEES BE LIABLE FOR ANY DAMAGES, DIRECT, INDIRECT, INCIDENTAL OR CONSEQUENTIAL, RESULTING FROM ANY DEFECT IN THE INFORMATION EVEN IF JOHN STAPLES, VISUAL SOFTWARE DESIGN GROUP OR IT'S EMPLOYEES HAVE BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES. THIS DISCLAIMER SHALL SUPERSEDE ANY VERBAL OR WRITTEN STATEMENT TO THE CONTRARY. IF YOU DO NOT ACCEPT THESE TERMS YOU MUST IMMEDIATELY STOP USING THIS PRODUCT.

## LICENSE AGREEMENT

Your use of this package indicates your acceptance of the following terms and conditions:

**1. Copyright:** These programs and the related documentation are copyright. The sole owner is John Staples. You may not use, copy, modify, or transfer the programs, documentation, or any copy except as expressly provided in this agreement.

**2. Shareware Version:** If you are using the Shareware version(s) of these programs, you are hereby granted permission to duplicate and/or distribute the programs and their accompanying documentation if the complete set of files is distributed in its original archived format. You are not allowed to sell the shareware versions of these programs except that the nominal fees charged by BBS's and Shareware distributors is permitted.

The Shareware versions of these programs are easily identified by the information screen that appears when you run or exit the programs. On this screen you will find a version number with an "S" after it; this is the mark of the Shareware versions of these programs (for example, "Version 1.01S" indicates this is the Shareware version of the program, while "Version 1.01" would be a registered version.)

IF YOU ARE USING THE REGISTERED VERSIONS OF THESE PROGRAMS YOU ARE NOT ALLOWED TO DUPLICATE OR DISTRIBUTE THEM.

## What Is Shareware?

Shareware is copyrighted software which is distributed by software developers through bulletin boards, on-line services, disk vendors, and copies passed among friends. It is commercial software which you are allowed to try before you pay for it. Therefore, Shareware provides the ultimate in a money back guarantee.

Most money back guarantees require you to pay for a software product and then decide whether or not you like it. With Shareware the process is quite a bit more "consumer friendly"! You get to try software products for a reasonable limited time (like 15 days), *before* buying them. You can use the programs on your own computer and in your own work environment to evaluate whether they work for you. If you decide not to continue using the program you simply delete it from your system and all you have invested is your evaluation time. If you do continue using it, then and only then do you pay for it.

It is important to understand that Shareware is a distribution method, and not a type of software. Software distributed via the Shareware method is developed by professional programmers, just like the software sold in the stores. There is good and bad software being distributed via Shareware just as there is good and bad retail software. The big advantage Shareware provides to software users is that you find out if a program is good or bad **before** you pay for it (the advantage for the developers of the software is they get their products into your hands without investing hundreds of thousands of dollars to launch products in the traditional retail channels.) Another user benefit is that the registration fee for Shareware programs is typically a small percentage of what you would have to pay for a comparable program from a retail establishment (because the developers are passing their savings along to you.)

The continued availability of quality Shareware products depends on you and your willingness to register and pay for the Shareware products you use. It is the registration fees you pay which allow developers to continue to develop new products as well as provide support for current ones. Please demonstrate your support for Shareware by registering programs you use and by passing them along to others.

## How Do I Register and What Do I Get?

If you like Home Office Team Word Processor, Spreadsheet and Calendar and you choose to continue to use any or all of them, you are required to register them. When you register you will receive the latest versions of the programs (without the "Nag" screens) plus our desktop utilities that were featured in Windows Magazine as Superior Shareware! You will also be notified of upgrades and have access to complete technical support.

But wait, there's more! In the timeless tradition of Ginsu knives and Popeil Pocket Fisherman, anyone registering any of the programs in 1995 will receive, at no extra charge, a screen saver! The screen saver prevents monitor "burn-in" while drawing pleasant shapes and colors on your screen. Or, you can add your own pictures or slogans which float across the screen!

## Registration Form

You can print and use this form to register.

=====  
\_\_\_\_ Complete Home Office Team.....\$49.95 + \$3.00 S&H  
(includes Word Processor, Spreadsheet,  
Calendar, plus LaunchPad, Audition,  
Viewport, and StopWin)

## What is Home Office Team?

Home Office Team is a suite of applications for Windows designed to give you power at an affordable cost. The suite includes a Word Processor, Spreadsheet, and Calendar.

- The HOT Word Processor is a full featured word processor which is capable of multiple document editing and opening/saving RTF file format. It includes full control over font and paragraph formatting and provides a robust find and replace facility. Most commands are accessible from both the menu and the tool bars which can be turned on or off. The tool bars include a fully functional ruler for graphically setting tabs and indents. Online Help is provided to explain the word processor and its features.

- The HOT Spreadsheet is a Microsoft Excel 4.0 compatible spreadsheet. It can load and save Excel spreadsheets. It is capable of multiple worksheet editing and "in cell" editing of formulas. Of course, you can enter your own formulas and copy them using both relative and absolute cell referencing. In addition, we have included 125 built-in functions in the following categories;

math	text handling	statistics
financial	date & time	logical
information	lookup & reference	DDE & external

There are tool bars included to make it easy to use and online help is provided to explain the spreadsheet features as well as a detailed help screen for each of the 125 built-in functions.

- The HOT Calendar is a rather simple desktop utility you will use regularly. It provides a monthly calendar that you can set to any size for convenience on your desktop. You can control all the fonts, their styles, colors, and sizes. You can control the 3-D effects (or turn them off). You can designate whether the calendar displays dates only or includes a different picture for each month (you can even replace the included pictures with your own for each month of the year!) The best part is that once you set the calendar to your liking, it retains your preferences and always loads like you last set it (unless you reset it to the defaults or choose not to save settings.) Calendar includes online help to explain its features and functions.
