What is KickOff?

KickOff is a program and file launcher which uses a hierarchy of popup menus to organize your applications. The menus display an icon as well as a description for each item, and they take up no space on your desktop until you ask for them. Once you have selected an item, the menus disappear until you need them again.

[Click here to see a sample menu](#)

Why Program Manager is difficult to use.

1. Cannot define groups within groups.
This limits your ability to arrange your items logically the way you use them.
2. It takes up screen space just like any other application.
If you want your applications just a mouse click away, you must share valuable screen space with the Program Manager window.
3. Cannot see all icons at once.
If you are like me, you have lots of programs. To launch an application, you must close one or more group windows in order to find and open the group that you want to launch from.
4. Cannot customize group icons.
This makes finding the group window to open a description reading exercise.
5. Cannot launch applications if Program Manager is covered by other windows.
You must close or minimize other application windows to uncover program manager, before you can even begin looking for the group containing the application you wish to launch.

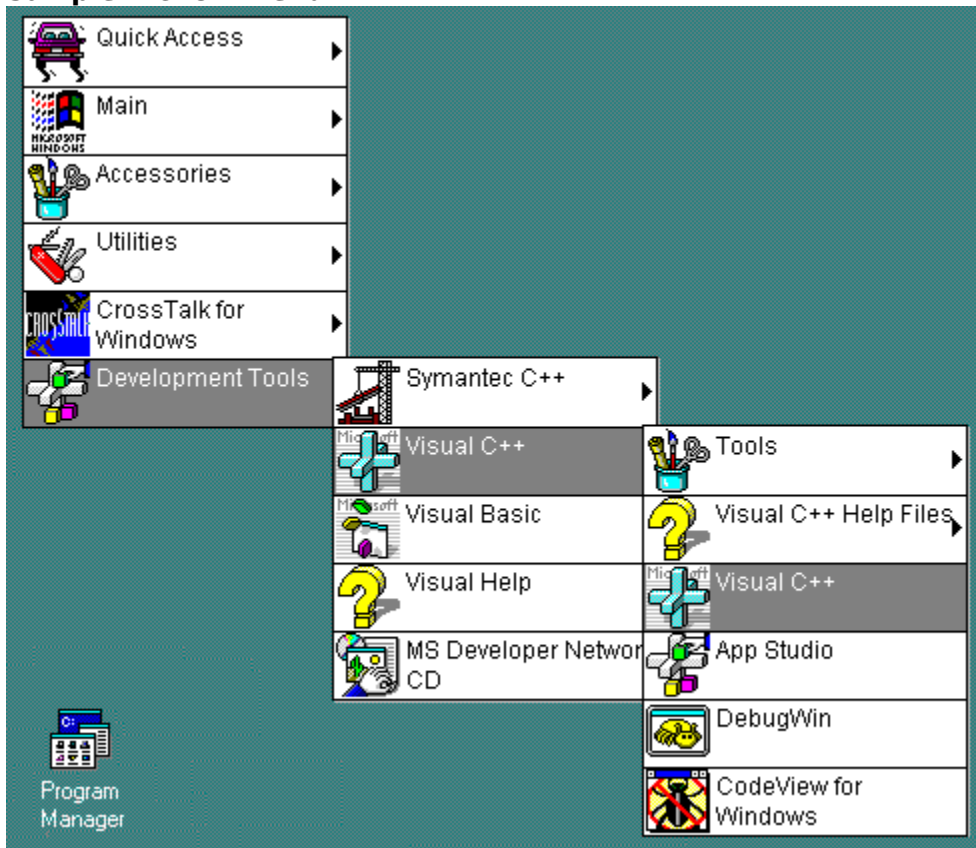

What makes KickOff better?

1. You can define groups within groups.
Nest your groups to any depth. Finally you can have it the way you want it.
2. Absolutely no screen space required.
All applications are a mouse click away without reserving any space on your desktop. Simply click the mouse button you choose on the desktop, or any titlebar or menu, to bring KickOff menus on top of whatever you are doing.
3. All your applications are available without opening and closing windows.
Instead, they are in convenient submenus, organized the way you want them.
4. You can customize group icons.
The ability to personalize the icon for each group helps you to identify groups without having to read the description.
5. You can launch applications anytime, even if you have other windows maximized.
Simply click the mouse button you choose on the desktop, or any titlebar or menu, to bring KickOff menus on top of whatever you are doing.

Does KickOff replace Program Manager?

Not at the moment. You take no risk by running KickOff because it does not change Windows in any way. Future enhancements will give you the option to completely replace Program Manager should you want to.

Sample KickOff Menu

What is KickEdit?

KickEdit is the KickOff menu editor. It is a highly intuitive, what you see is what you get, editor with a full drag and drop interface. Along with the ability to manually create groups and items, it can also create menu groups from program manager and accept files dropped from file manager. You will use it whenever you want to change your menu layout.

Key Features

- Editor displays your menus exactly as they actually appear. They also behave exactly like the real thing.
- Fully visual, intuitive, WYSIWYG interface. No need for trial and error menu design. No complex .INI files to learn.
- Manual program and group item creation using dialogs similar to Program Manager.
- Drag files from File Manager, and drop them into your menus.
- Select Program Manager groups from a list, and automatically add identical groups to your menus. This feature is great after installing a new product.
- Rearrange menus by dragging groups or items to a new location.

License Agreement/Warranty

License Agreement and Warranty Disclaimer

You should carefully read the following terms and conditions before using this software. Use of this software indicates your acceptance of these terms and conditions.

Shareware Version

You are hereby licensed to: use the Shareware Version of the software for a reasonable evaluation period; make as many copies of the Shareware version of this software and documentation as you wish; give exact copies of the original Shareware version to anyone; and distribute the Shareware version of the software and documentation in its unmodified form via electronic means. There is no charge for any of the above.

You are specifically prohibited from charging, or requesting donations, for any such copies, however made; and from distributing the software and/or documentation with other products (commercial or otherwise) without prior written permission, with one exception: **Disk Vendors approved by the Association of Shareware Professionals are permitted to redistribute KickOff, subject to the conditions in this license, without specific written permission.**

Evaluation and Registration

This is not free software. This license allows you to use this software for evaluation purposes without charge for a reasonable period of time. If you decide to continue to use this software, a registration fee of \$25 is required. Payments must be in US dollars drawn on a US bank, and should be sent to Steve Sutherland, P.O. Box 20654, Tampa, FL 33622-0654.

One registered copy of KickOff and KickEdit may be dedicated to a single person who uses the software on one or more computers or to a single workstation used by multiple people.

You may access the registered version of KickOff and KickEdit through a network, provided that you have obtained individual licenses for the software covering all workstations that will access the software through the network. Site licenses are available as specified on the order form.

Governing Law

This agreement shall be governed by the laws of the State of Florida.

Disclaimer of Warranty

This software and the accompanying files are sold "as is" and without warranties as to performance of merchantability or any other warranties whether expressed or implied. Because of the various hardware and software environments into which this software may be put, no warranty of fitness for a particular purpose is offered.

The user must assume the entire risk of using the software. Any liability of the seller will be limited exclusively to product replacement or refund of purchase price.

Registration Form/Invoice

Registration/Orders

Payments can only be made by check or money order. To register or place an order, send this form and a check or money order to Steve Sutherland, P.O. Box 20654, Tampa, FL 33622-0654. Payments must be in US dollars drawn on a US bank. You will receive a registration number which will continue to be valid for all future versions of KickOff.

Site licenses

A site license for KickOff entitles an organization to receive one copy of the distribution package and duplicate the distribution disk for the specified number of copies. You may also install the Licensed copy of KickOff and accompanying files on a network, as long as steps are taken to ensure that the total number of concurrent uses does not exceed the specified number of copies.

Comments:

Installing KickOff

Files Included on the Disk

CTL3D.DLL	Microsoft supplied DLL to implement 3D controls.
KICKDLL.DLL	KickOff routines common to KickOff and KickEdit.
KICKEDIT.EXE	The KickOff menu Editor
KICKOFF.EXE	The menu launcher itself
KICKEDIT.HLP	This help file.
README.TXT	Last minute notes and introductory text.

Installing Kickoff

1. If you are installing KickOff for the first time, create a new directory for the files. A suggested name might be 'C:\KICKOFF', but you are free to choose what ever you want. If you have an older version of kickoff installed, you will just use the same directory that the older version is installed in.
2. Copy all of the files (listed above) into the KickOff directory.
3. Add KICKOFF.EXE, and KICKEDIT.EXE to a group in Program Manager. If you are not sure how to do this, consult the Program Manager Help on adding new items.
4. If you want KickOff to be available everytime you start Windows, add KICKOFF.EXE to the Program Manager Startup group.

Creating your first menus

If you are installing KickOff for the first time, you will need to define your menus before you can use them. Fortunately, KickEdit will help you if you wish, by offering to create an initial set of menus from your Program Manager groups. These menus won't be pretty, but you can customize and rearrange them to make them suit your tastes. To create your first menus, follow these steps:

1. Start the KickOff menu editor (KICKEDIT.EXE).
2. Upon noticing that there are no menus currently defined, your will be prompted whether you want to create your initial menus from the Program Manager groups. Your response to this is up to you.

If you choose Yes,
Every single Program Manager group will be added to the main menu automatically.

If you choose No,
You will be presented with a menu with a single item in it. You can then add Program Manager groups individually using the Edit | Program Manager menu option.
3. Move, rearrange groups, change properties, customize to your hearts content.
4. When you have the menus looking the way you want them, choose the Save option in the File menu to save your changes. If KickOff is already running, you will be asked if you want the changes to update the running menus (In this case choose Yes).
5. If it is not already running, start KickOff (KICKOFF.EXE) and begin using your menus.

How to Uninstall KickOff

Changes Made to Your System

KickOff makes no changes to system files. There is one file created in the Windows directory to save your menu definitions (KICKOFF.INI), and one to save your editor settings (KICKEDIT.INI), but otherwise, all files are where you installed them.

To Remove KickOff from Your System

1. Delete KICKOFF.INI, and KICKEDIT.INI from your \WINDOWS directory.
2. Delete the files from the KickOff directory you created at install time.
3. Delete the KickOff directory.
4. Remove the KickOff and KickEdit Icons from Program Manager.

Displaying the Menu

One of the key features of KickOff is that the menus take up no screen space, and are always available with only a single mouse click.

To Display the KickOff Menu

- ▶ Click the KickOff mouse button on any exposed portion of the Windows desktop.
Or Click the KickOff mouse button on any titlebar, menubar, titlebar control, or minimized window.

The KickOff mouse button is by default the right button. For systems with a middle mouse button, you may optionally choose to use that to activate KickOff menus.

Launching an Application

KickOff's main objective is to launch applications quickly and conveniently.

To Start an Application

► Display the KickOff menu with the KickOff mouse button, then click on the item you wish to start.

If the item you want is in a group, then you will need to click on the group to display its items and select from there.

Selecting a Mouse Button

The KickOff icon's menu has an item which lets you choose which mouse button to use to activate the menus.

To Select a Mouse Button

► Choose the Mouse option on the KickOff icon's system menu. Select Right Button or Middle Button to select the desired activation button.

Once selected, this is the button you will use to 'popup' the KickOff menus. If you had previously hidden the KickOff icon, you will need to redisplay it first by starting KickOff again without shutting it down.

See Also...

[System Menu](#)

Hiding and Showing the KickOff Icon

The KickOff icon's menu has an item which lets you hide the icon now, and whenever KickOff starts, until you redisplay it again.

To Hide the KickOff Icon

- ▶ Choose the Hide Icon option on the KickOff icon's system menu.

The icon will disappear, and will stay hidden even across restarts.

To Redisplay the KickOff Icon

- ▶ Start KickOff a second time from Program Manager, and the icon will reappear.

Rather than actually starting a second time, KickOff instead redisplay the hidden icon, which will now remain visible, even across restarts.

[System Menu](#)

Reloading the Menu

The KickOff icon's menu has an item which lets you force KickOff to reload its menus. This is usually not necessary since the editor will reload the menus for you.

To Reload the Menu

- ▶ Choose the Reload Menu option on the KickOff icon's system menu.

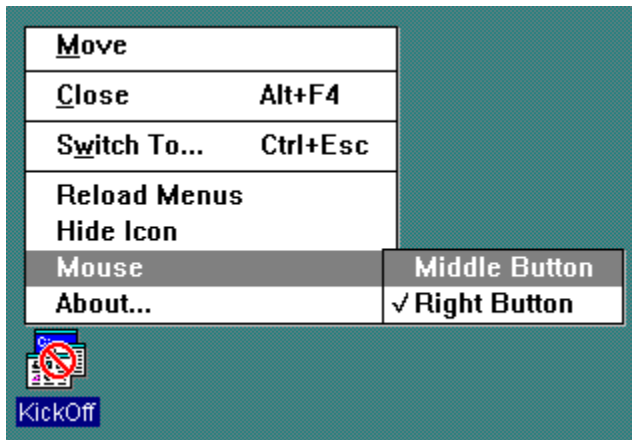

KickOff will reload the current menu definitions.

Icon List

► Scroll through the icons by clicking the scroll arrows or by using the LEFT and RIGHT ARROW keys. Select the icon you want to use, and then press ENTER or choose the OK button.

File Name

► Type a new filename, if needed. You can choose an icon from another application by typing the name of the program file for that application, and pressing ENTER or pressing the OK button. If you do not know this information, you can also choose Browse and select a file Browse dialog.

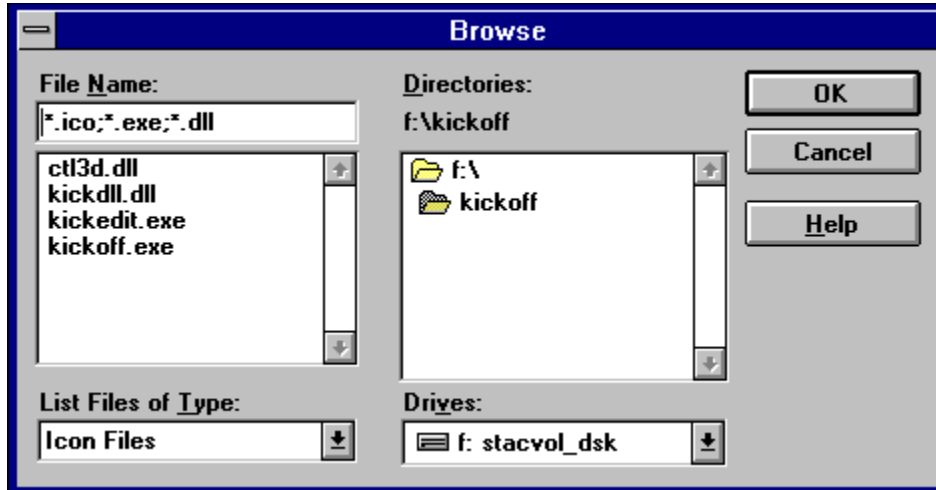

See Also...

[File Browse Dialog](#)

File Browse Dialog

Click on any control for help on that control.

Use this dialog box to easily find and select files.

OK

- ▶ Choose this button to return the selected file to the application.
This button will be disabled unless you have selected a file.

Cancel

- ▶ Choose this button to close this dialog, ignoring any changes made.

File Name

- ▶ Select the name of the file you want, and then choose the OK button.

Or type the filename in this box, and then choose the OK button. If necessary, also specify a path and drive.

If the file you want does not appear in the File Name list, you can change drives or directories, or specify a different file type.

Drives

► Open the list, and then select the drive which contains the file you want to use. When you change drives, the directories on that drive appear in the Directories box.

Directories

► Select the directory which contains the file you want to use. When you change directories, the files in that directory appear in the File Name box. If the directory you want does not appear in the list, you may have to change drives by choosing a different drive from the Drives list.

List Files of Type

► Open the list, and then select the type of file you want displayed in the File Name box.

For example, if you select Programs, the File Name list displays only program files (files with an .EXE, .PIF, .COM, or .BAT filename extension).

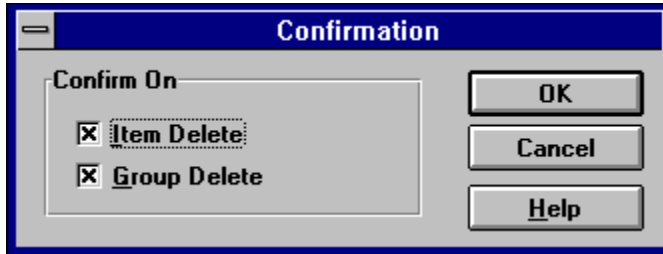

Help

- ▶ Choose this button to display help on this dialog.

Confirmation Dialog

Click on any control for help on that control.

Specifies whether confirmation messages are displayed.

OK

- ▶ Choose this button to close this dialog and apply changes made.

Cancel

- ▶ Choose this button to close this dialog without applying any changes.

Help

- ▶ Choose this button to display help on this dialog.

Group Delete

- ▶ Check this item if you would like to be warned before deleting a group item.

Item Delete

- ▶ Check this item if you would like to be warned before deleting a program item.

Program Manager Dialog

Click on any control for help on that control.

Insert selected Program Manager groups into your menu, at the focused item.

Insert

► Choose this button to create and insert a new group in your menu for each selected Program Manager group in the group list.

Each group will automatically be filled with the items exactly as they are currently defined in Program Manager.

Close

- ▶ Choose this button to close the dialog.

Help

- ▶ Choose this button to display help on this dialog.

Group List

- ▶ Select one or more groups to be inserted into your menu.

This contains a list of all the groups currently defined in Program Manager. When you have made your selection, choose Insert to create and insert the group and its contents into your menu at the focused item.

Adding Program Items

A program-item icon represents an application, accessory, or document in a KickOff group. By choosing the icon for a program item, you start the application or accessory, or open the document. You can create a program item in one of three ways: Manually enter the information for the item, or drag a program or document file from File Manager and drop on a KickOff group, or create an entire group from Program Manager complete with all of its defined program items.

To create a program item manually

1. Open the group menu that you want to add an item to.
2. Select the item in the group where you want to insert the new item.
3. From the Edit menu, choose New.
Or press the INSERT key.
Or click the right mouse button over the focused item and choose New.
4. In the New Item dialog box, select the Program Item option, and then choose the OK button.
5. Fill in the Program Item Properties dialog box as necessary, and choose the OK button.

To add a new menu item using File Manager drag-drop

1. Open the group menu that you want to add an item to.
2. Open File Manager and select the file or files you want to add to your menu.
3. Drag the files from File Manager and drop onto a KickOff, positioned where you want the file(s) to be inserted.
4. The items will be inserted with a suitable default description and icon.

Editing Menu Items

Once you have created a program item or group, you can go back and change its properties. For program items, you can change the description of the item, the working directory where files that the application creates are stored, the icon that KickOff uses to represent the application, and whether the application is minimized to an icon whenever you start it. For a group, you can only change the description, and the icon that KickOff uses to represent the group.

To change the properties of a program item or group

- 1 Select the menu item for the program or group item to change.
- 2 From the Edit menu, choose Properties.
Or press ALT+ENTER.
Or click the right mouse button over the focused item and choose Properties.
- 3 In the Program or Group Item Properties dialog box, change properties as needed.
- 4 Choose the OK button.

[Program Item Properties Dialog](#)

Changing Icons

If more than one icon is available for a program item, you can change the icon. You can also choose an icon from another application or icon source for any Program or Group item.

To change an icon

- 1 Select the Program or Group item for which you want to change the icon.
- 2 From the Edit menu, choose Properties.
Or press ALT+ENTER.
Or click the right mouse button over the focused item and choose Properties.
- 3 In the Program or Group Item Properties dialog box, choose the Change Icon button.
- 4 If more than one icon is available in the Current Icon area, scroll through the icons by clicking the scroll arrows or by using the LEFT and RIGHT ARROW keys. If you would like more icons to choose from, you can scroll through all the available icons in other Windows programs. In the File Name box, type the file name of the icon source to use and press ENTER.
- 5 When the icon you want to use is selected, choose the OK button.
- 6 In the Program or Group Item Properties dialog box, choose the OK button.

Arranging an Organizing Menus

Using KickEdit, you can organize your applications and files into groups that make sense to you. For help with organizing menus, choose one of the following topics:

[Adding Menu Items](#)

[Changing Menu Item Properties](#)

[Changing an Items Icon](#)

[Copying a Menu Item](#)

[Deleting a Menu Item](#)

[Moving a Menu Item](#)

Copying Groups from Program Manager

Program Manager groups already contain all of the information needed to add new items quickly. You can use this feature whenever you install a new application in Program Manager that you also want in your menus. Once the new group(s) are added, you can rearrange, and customize each item to suit your tastes.

To copy one or more Program Manager groups

1. Open the group menu that you want to add a Program Manager group to.
2. Select the item in the group where you want to insert the new group.
3. From the Edit menu, choose Program Manager.
Or click the right mouse button over the focused item and choose Program Manager.
4. In the Program Manager dialog box, select the group or groups you wish to insert, and then choose the Insert button.
5. Choose the Close button to return to the editor.

See Also...

[Program Manager Dialog](#)

Copying Menu Items

When you copy a menu item, the original stays in the source group. You create a duplicate in the destination group.

To copy a menu item

1. Select the menu item you want to copy.
2. Press and hold down CTRL while dragging the menu item from its current location to the destination-group menu.
3. Release the mouse button and CTRL key when the mouse is inside the destination-group menu, positioned where you want the copy to be placed.

If the menu item you copied was a Program item, KickEdit will create a copy of the program item and place it where you dropped it. If it was a group item, KickEdit will copy the group and all of its contents, and place it where you dropped it.

You can also copy a menu item by choosing the Copy and Paste commands from the Edit menu.

Moving Menu Items

You can move a menu item from one group to another, or somewhere else in the same group. When you move a menu item to another group, it is removed from the source group.

To move a program item to another group

1. Select the menu item you want to move.
2. Drag the menu item to the destination-group menu.
3. Release the mouse button when the mouse is inside the destination-group menu, positioned where you want the item to be moved.

If the menu item you moved was a Program item, KickEdit will move the item to where you dropped it. If it was a group item, KickEdit will move the group and all of its contents to where you dropped it.

You can also move a program item by choosing the Cut and Paste commands from the Edit menu.

Deleting Menu Items

When you delete a menu item, it is removed from its group. If the item is a Group item, then its contents, as well as any sub-groups are deleted.

To delete a menu item

1. Select the menu item you want to delete.
2. From the Program Manager Edit menu, choose Delete.
Or press DEL.
Or click the right mouse button over the focused item and choose Delete.
3. In the Delete dialog box, choose the Yes button.
Or press ENTER.
