## Display Options

Only one of these options can be selected at one time.

**Cycle photos FX** - Photos will be randomly selected and shown with transitions, otherwise it is identical to the cycle photos option.

**Cycle photos** - If selected when the screensaver is started each image will be displayed for a period of time. When the last image is reached display will begin again with the first image.

**Select photos** - If selected when the screensaver is started the image selected in the list will be displayed.

## **Color Options**

Only one of these options can be selected at one time.

**Color** - This will display the images in color. Depending upon the video driver that is in use images will be displayed in either 16, 256, or high color with high color giving the best resulting display.

**Grayscale** - This will display the images in grayscale. In some cases this will result in a better looking image on screen.

## **Timer Controls**

Use the up and down arrow controls to increase or decrease the values in the timer controls.

**Cycle Delay in Seconds** - This sets the delay between images when in cycle mode.

## **Buttons**

**Ok** - Accept the changes to the configuration settings and return to the desktop settings dialog.

**Cancel** - Discard the changes to the configuration settings and return to the desktop settings dialog.

**Wallpaper** - The Display Options and Display Color settings will be used to determine an image to reference. This image will then be written in .BMP format to a file called earthwin.bmp in the windows directory. Your Windows setting for desktop wallpaper will be adjusted so that this image is now your wallpaper. Experiment with the 16 color and 256 color settings to find the best result on your hardware.

**Help** - Starts up the help system with this help information.

**Directory** - Displays a dialog which allows you to select the location of the images on your hard disk. This will need to be set the first time running this configuration dialog in order for the screen saver to find the images.

**About** - Displays a dialog box which shows the program credits and version number.
