The InfoMagic STANDARDS Viewer Interface

Overview

The InfoMagic Standards discs provide a wealth of international standards in a variety of formats. Some of these standards have been made accessible through this hypertext interface. The exclusive InfoMagic Interface allows you to browse index listings of selected standards. To view a particular standard, click on any part of the corresponding entry in one of the index listings. This will cause the InfoMagic interface to start up an appropriate Windows application to view the requested document, in the preferred format.

Setting Options

By clicking the OPTIONS button, you can display the Options dialog which allows you to specify the programs to be used to view the standards documents on the discs. Choose an appropriate application program for each file type listed. You may also set or change the drive letter associated with either of the Standards discs. This is useful if you have a CD changer, or if your CD drive letter changes when you connect to a network.

Text Search

Click the SEARCH button to find specific text strings using a special dialog. Results are always displayed in the main window. To return to the main contents display, click the CONTENTS button at any time.

For more detailed information see:

- ▶ [Using the Options Dialog](#)
- ▶ [Using Full-Text Search](#)

InfoMagic Standards Viewer Interface

Using the Options Dialog

This dialog enables you to specify file viewers for browsing document files, and drive letters to associate with Disc 1 and Disc 2 of the Standards CD-ROM.

File Viewers

The File Viewers section allows you to specify the programs to be used when you request to view a document by clicking on its entry in one of the index lists. You may specify up to four different viewers; one for .TXT or .ASC files, one for .DOC files, one for Postscript files, and one for any other format files.

You may also set the priority field for each type of file. When a document is available in more than one format, the InfoMagic Interface will display the format with the lowest priority number, thus allowing users to determine which formats will be displayed.

Use the Browse for Viewer button to select an application program from a standard file menu, when you don't know the name/path for the application.

File Viewers

The File Viewers section allows you to specify the programs to be used when you request to view a document by clicking on its entry in one of the index lists. You may specify up to four different viewers; one for .TXT or .ASC files, one for .DOC files, one for Postscript files, and one for any other format files.

Drive Letters

Use the **Drive Letters for CD** area to specify the drive letter associated with **Disc 1** and **Disc 2** of the InfoMagic Standards CD-ROM. These are normally set to the same letter for conventional CD-ROM drives, and different letters if your drive holds more than one CD at a time.

Keyboard Techniques

Navigating in Viewer

Navigating Through Your Title

There are many ways of navigating through your Viewer title. You can select topics from the [Contents screen](#), jump from one topic to another from a [hot spot](#), browse through topics that are related to one another, retrace your steps backwards (topic by topic), or return to any previously viewed topic.

Navigating in Viewer

Using Links

Topics are linked to one another by means of **hot spots**. A hot spot can be a word or phrase, or a picture or part of a picture. Text hot spots may be underlined, and are usually displayed in a different color than the surrounding text. A picture hot spot may have a border around it. You can identify a hot spot by noticing the mouse cursor: it changes to a pointing hand when over a hot spot.

For example, point to the Navigating icon in the upper left-hand corner of this topic and you will see the cursor change into a hand, as shown below:

Click on this icon and it will jump to another topic, which in this case, is the Navigating in Viewer menu.

In addition to **jumping** to other topics, hot spots can bring up popup windows. Popups are displayed over the main Viewer window. To remove the popup, click anywhere outside of the popup, or press the ESC key. Click on this **hot spot** to view a popup window.

Navigating in Viewer

Browsing Through Topic Sequences

Related topics may be linked to one another using [browse sequences](#). The browse feature lets you browse through topics, one by one.

► To display the next or previous topic:

- * Choose the [>> button](#) or [<< button](#) in the Viewer window.

[Using Links](#)

Navigating in Viewer

Jumping to the Table of Contents

The contents button, on the Viewer button bar, returns you to the main screen for your title. This screen is like a table of contents, from which you can select a variety of topics.

- ▶ To look up a topic from the contents screen:
 - 1 Choose the **Contents button** in the Viewer window to display the contents screen for the open title.
 - 2 Select the name of the **topic** you want to view from the list.

[Returning to Any Topic Viewed](#)

▶ Navigating in Viewer

Returning to Any Topic Viewed

As you view topics, Viewer keeps a record of where you have been. The History button displays a list of the topics you've viewed, starting with the most recent. Select any topic from this list to return to it.

▶ To jump back to a topic using the History button:

- 1 Choose the **History button** in the Viewer window.

Viewer lists the last 40 **topics** you have viewed in the History window.

- 2 Double-click the topic you want to view.

Use the scroll bar to see topics not visible in the list.

- 3 The History window remains displayed. You can choose another topic. You can also resize or move the History window.

Tip: You may want to arrange the Viewer window and the History window so that they are side by side.

▶ To close the History window:

- * Choose Cancel, or double-click the Control menu box. Pressing the ESC key also closes the History window.

Ways to Find Information In Your Title

To find information in your title, you can use the following techniques:

- Perform full-text searches for topic text

Using the Search button, you can search on any word or words in the topics. The Search feature not only takes you to the topic found, but highlights the word or words found by the search. You can use search operators such as AND, OR, NOT, THRU, and NEAR to further narrow your search.

See Also

[Using Full-Text Search](#)

Finding Information

Using Full-Text Search

- ▶ To search for topics that contain a certain word or phrase:
 - 1 Choose the **Search button** in the Viewer window.
 - 2 In the Search by Word box, type a **search query** telling Viewer what text you are searching for.

To enter a search query that you've searched on previously, select the search query from the drop-down list box.
 - 3 Under Search In, select All Topics, Current Topic Only, or List of Previous Topics Found.

To search only the **topic titles**, choose the **Options button** and select this option, then choose the OK button.
 - 4 Choose OK.

Viewer lists the title of each topic containing a **search hit** in the **Search Results** dialog box.

[Browsing Through the Search Results](#)

[Using Search Operators](#)

Finding Information

Browsing Through the Search Results

When you choose the OK button to search for information, Viewer lists the **topics** that contain **search hits** in the **Search Results** dialog box.

- ▶ To view a topic in the list:
 - * Double-click the title.
- Use the scroll bar to see titles not visible in the list.
- or**
- * Use the Search Results buttons to move through topics.

To view	Do this
Selected topic	Choose the <u>Go To button</u> or double-click the topic.
Search dialog box	Choose the <u>To Search button</u> .
Next search hit in the current topic	Choose the <u>Next Match button</u> .
Previous search hit in the current topic	Choose the <u>Previous Match button</u> .

When you view a topic with search hits, Viewer highlights the search hits in that topic. If you minimize the Search Results window, highlighting turns off until you maximize the Search Results window again.

- ▶ To close the Search Results window:
 - * Choose the Cancel button in the Search Results window.

For your convenience, the Search Results window always appears on top of the Viewer window. You can resize it, move it, or you can minimize it to an icon and then restore it later when you need it.

[Using Search Operators](#)

Finding Information

Using Search Operators

When you use the [Search button](#) to search for information, you can use the search operators AND, OR, NOT, and NEAR to narrow your search. Each operator is described below. You can enter an operator in either lowercase or uppercase letters ("and" is interpreted the same as "AND").

AND

The AND operator selects topics containing all phrases connected by AND operators. If a phrase does not appear in quotes, any space between words in the phrase is assumed to represent an implicit AND. For example:

Bees love Honey

This phrase finds any topic containing the three words "Bees," "love," and "Honey." This is the same as specifying Bees AND love AND Honey. However, when quotes are used, Viewer searches for the entire phrase. For example:

"Bees love Honey"

This phrase finds any topic containing the phrase "Bees love Honey."

OR

The OR operator selects topics containing either phrase connected by OR operators. For example:

Bees OR Honey

This query displays topics containing either the word "Bees" or the word "Honey."

NOT

The NOT operator selects any topic that does contain the phrase preceding NOT, but doesn't contain the phrase following NOT. For example:

Bees NOT Honey

This query finds topics containing the word "Bees" but not the word "Honey."

NEAR

The NEAR operator selects any topic in which one phrase appears within a certain number of words of the second phrase. The default value is 8 words. For example:

Bees NEAR Honey

This query finds any topic in which the word "Bees" appears within 8 words before or after the word "Honey."

To change the default value, choose the [Options button](#) in the Search dialog box and enter a new number in the NEAR Means Within box. Words that are next to each other are within one word of each other.

Tip: You can choose the [Hints button](#) in the Search dialog box for a quick reminder on how to use search operators.

See Also

[Using Full-Text Search](#)

[Using Multiple Search Operators](#)

Finding Information

Using Multiple Search Operators

When you use the [Search button](#) to search for information, you can use multiple search operators to define more complex search criteria. For example, if you enter **honey AND bees NOT hives** in the Search by Word box, Viewer will match [topics](#) that contain the words "honey" and "bees" but do not contain the word "hives."

By default, operators are evaluated from left to right. You can use parentheses to specify a different order--operators within parentheses are evaluated first.

This query

honey OR bees AND hives

honey OR (bees AND hives)

honey OR bees NOT hives

honey OR (bees NOT hives)

Searches for

Topics containing either the word **honey** or the word **bees** in addition to the word **hives**.

Topics containing the word **bees** and the word **hives** or topics containing the word **honey**.

Topics containing either the word **honey** or the word **bees** but not the word **hives**.

Topics containing the word **bees** but not the word **hives** or topics containing the word **honey**.

Tip: You can choose the [Hints button](#) in the Search dialog box for a quick reminder on how to use search operators.

Printing and Copying

Changing Printers and Printer Options

Viewer prints [topics](#) on the default printer. If you have installed more than one printer in Windows, you can make any of your installed printers the default printer. You can also change the default printer options.

- ▶ To change printers:
 - 1 From the File menu, choose Print Setup.
 - 2 Select Specific Printer.
 - 3 Select the printer that you want to change to, from the drop down list box.
If this file is not in the list box, switch to the Control Panel, select Printers, and activate the printer you want to use. Then switch back to Viewer.
 - 4 Choose OK to close the Print Setup dialog box.
- ▶ To change printer options:
 - 1 From the File menu, choose Print Setup.
 - 2 Choose the Options button to change the default printer options.
The options available depend on the type of printer you have selected.
 - 3 Choose the options you want, and then choose OK.
 - 4 Choose the OK button to close the Print Setup dialog box.
- ▶ To change printer orientation, paper size, or source:
 - 1 From the File menu, choose Print Setup.
 - 2 Select Portrait or Landscape for the orientation.
 - 3 Select the paper size you want from the drop down list box.
 - 4 Select the paper source you want from the drop down list box.
 - 5 Choose OK to close the Print Setup dialog box.

For more information on setting up printers, see your Windows documentation.

Bookmarks and Annotations

Annotating Your Title

The Bookmark and Annotation features in Viewer allow you to save information in reference to your title. A bookmark is simply that: a marker which "saves your place" in the Viewer title. Like any book, you can have many bookmarks in your title. When the bookmark is selected, Viewer takes you directly to that topic.

Annotations are simply notes or comments "paper clipped" to a topic. It's the same as paper clipping a note to a page in a book. You can copy and paste text in annotations.

See Also

[Using Bookmarks](#)

[Annotating a Topic](#)

Bookmarks and Annotations

Using Bookmarks

Just as you can place bookmarks in a printed book to mark specific references, you can place [bookmarks](#) at the Viewer [topics](#) you view frequently. Once you have placed a bookmark at a topic, you can quickly display that topic from the Bookmark menu.

- ▶ To insert a bookmark:
 - 1 Display the topic at which you want to place a bookmark.
 - 2 From the Bookmark menu, choose Define.
 - 3 Viewer proposes the [topic title](#) as the bookmark name. If you want to change the name, type a new name in the Bookmark Name box.
 - 4 Choose OK.
The bookmark name appears on the Bookmark menu.
- ▶ To remove a bookmark:
 - 1 From the Bookmark menu, choose Define.
 - 2 Select the bookmark you want to remove.
 - 3 Choose Delete.
 - 4 Choose OK.

See Also

[Jumping to a Bookmark](#)

Bookmarks and Annotations

Jumping to a Bookmark

After you've inserted bookmarks, you can go directly to them at any time.

- ▶ To go to a marked topic:

- * From the Bookmark menu, choose the topic you want to view.

Underlined numbers precede the first nine bookmark titles. You can press the corresponding number key or choose the bookmark title to go quickly to a marked topic.

If more than nine bookmarks have been defined, choose More from the Bookmark menu. Select a bookmark, and then choose the Go To button.

See Also

[Using Bookmarks](#)

Bookmarks and Annotations

Annotating a Topic

You can attach your own comments to a [topic](#). When you annotate a topic, Viewer places a paper clip icon to the left of the topic heading. The paper clip icon reminds you that you have attached text to this topic.

- ▶ To attach text to the current topic:
 - 1 From the Edit menu, choose Annotate.
 - 2 Type the text in the Annotation edit box.
If you make a mistake, press Backspace or the Delete key to erase any unwanted characters and then continue typing.
 - 3 Choose OK when you have finished the annotation.
- ▶ To remove an annotation:
 - 1 Display the topic where you made the annotation.
 - 2 Click the paper clip icon.
 - 3 Choose the Delete button.

See Also

Bookmarks and Annotations

Viewing an Annotation

- ▶ To view an annotation:
 - 1 Display the topic where you made the annotation.
 - 2 Click the paper clip icon.
 - 3 Choose the Save or Cancel button when you have finished reading the annotation.

Tip: Place a **bookmark** at an annotation to return to it quickly.

See Also

[Copying and Pasting Annotations](#)

[Using Bookmarks](#)

▶ **Bookmarks and Annotations**

Copying and Pasting Annotations

You can copy text from an annotation to the [Clipboard](#) or paste text from the Clipboard into an annotation.

- ▶ To copy text from an annotation to the Clipboard:
 - 1 Display the **topic** where you made the annotation.
 - 2 Click the paper clip icon.
 - 3 If you want to copy all of the annotation, choose the Copy button.
If you want to copy only a portion of the annotation, select the text in the Annotate edit box, and then choose the Copy button.
- ▶ To paste text from the Clipboard into an annotation:
 - 1 Display the topic where you made the annotation.
 - 2 Click the paper clip icon.
 - 3 Position the insertion point where you want to paste the text.
To position the insertion point, point and click the mouse or press the arrow keys.
 - 4 Choose the Paste button.
If any text is selected when you choose the Paste button, it is replaced by the new text.

Contents button

The Viewer button that displays the contents screen for the open title.

Index button

The Viewer button that looks up [topics](#) associated with particular words or phrases defined by the title's author.

Go Back button

Go Back

The Viewer button that backtracks through [topics](#) in the order you viewed them.

History button

The Viewer button that displays a list of the last 40 **topics** you have viewed.

>> button

The Viewer button that displays the next [topic](#) in the current [browse sequence](#) within the open title.

<< button

The Viewer button that displays the previous **topic** in the current **browse sequence** within the open title.

Search button

The Viewer button that searches for all **topics** containing a particular word or combination of words.

Hints button

In the Search dialog box, the button that shows examples of how to enter [search queries](#).

Next Match button

The button in a list of [search hits](#) that displays the next search hit not currently displayed on the Viewer screen.

Previous Match button

Previous Match

The button in a list of [search hits](#) that displays the previous search hit not currently displayed on the Viewer screen.

To Index button

The button in the [Topics Indexed](#) dialog box that takes you back to the Index dialog box.

To Search button

The button in the [Search Results](#) dialog box that takes you back to the Search dialog box.

Options button

The button in the Search dialog box that displays the available search options. The Search Options dialog box is where you can change the NEAR value, select topic titles as the search domain, or select to search from a list of previous topics found.

Go To button

The button in the **Topics Indexed** and the **Search Results** dialog box that displays the selected **topic** from the list.

bookmark

A name associated with a **topic** for easy reference. Bookmarks appear on the Bookmark menu. When you select a bookmark from the menu, Viewer immediately displays the topic associated with that bookmark.

Clipboard

The Microsoft Windows application that holds cut or copied information, which you can then insert into another file. Whenever you use a Cut, Copy, or Paste command, you are using the Clipboard.

contents screen

The "table of contents" for a title. From this screen you can select which part of the title you want to look in.

topic

A single entry or article in a title. Examples of topics might be a quotation, the definition of a word, or an article in an encyclopedia.

Topics Indexed

An index dialog box that lists **topics** from an index search which allows you to browse and go to topics in the list.

Search Results

The dialog box that lists **topics** containing **search hits** from a **search query** and allows you to browse and go to topics in the list.

search query

A combination of words, phrases, and operators telling the Search command what text to search for.

browse sequence

A sequence of **topics** arranged so that you view them in sequence when you select the << or >> buttons.

topic title

A name identifying a **topic** found by searches from the Index and Search commands.

jump

A **hot spot** that displays another **topic** in the main Viewer window.

hot spot

A word, phrase, or picture that you select to jump to a new Viewer **topic**, display a window, or perform an author-defined Viewer operation.

search hit

An occurrence of text in a **topic** that matches the **search query** entered for the Search command.

current position

The position in an audio or video sequence that is currently being played, indicated by the **thumb** in the **slider** control.

thumb

The pointer in the **slider** of a controller indicating the **current position** in the audio or video sequence.

slider

The control in an audio or video sequence that contains the **thumb**, which indicates the **current position** in the audio or video sequence. The slider may also include tick marks indicating the **sections** in the audio or video segment.

section

A subdivision of an audio or video sequence indicated by tick marks on the **slider**. Drag the **thumb** on the slider to any tick mark to begin playing the sequence at the corresponding section.

Controlling Sound and Video

Using the Multimedia Controller

You can play an audio or video sequence using a control panel that appears within a **topic** or that pops up when you select a hot spot. Either type of sequence may include the multimedia controller, as shown below:

Select any control from this illustration to find out what action it performs.

- ▶ To control a sequence that does not have a control panel:
 - * Click the window while the sequence is playing to stop it.
 - * Click the window after stopping the sequence to start playing it again.

Pause/Play Button

Plays the object if it is currently stopped or paused, or pauses the object if it is currently playing.

Stop Button

Stops playback of the audio or video sequence.

The **slider** control lets you drag the **thumb** to move the **current position** back (left) or forward (right) in the audio or video sequence.
