

**Strategic aims
from
LTSN Centre for Bioscience
Annual Report 2003**

B1 To be the accepted information & advice resource for all staff involved in learning & teaching in bioscience in UK Higher Education

B2 To promote, disseminate & record good & innovative learning & teaching practices in bioscience in UK HE institutions & to encourage the adoption of innovative practice developed in other subject areas

Develop ways of informing about, and assisting with teaching methodology, the types of student recruited under Widening Participation

B3 To maintain close collaborative contact with other LTSN centres, and with the Generic Centre and to contribute to the corporate activity within the national programme

To broker the exchange of information & experience between the Centre for Bioscience & the GC, & between the Centre for Bioscience & our community

To participate in external projects from which we may harvest ideas &/or contribute to the experience of our community

B4 To develop and maintain appropriate, efficient and effective systems to ensure the Centre is successful in meeting its strategic aims and which allow activity within the Centre to be monitored

B5 To ensure that HE staff within the Bioscience community are aware of the work of the Centre and how to make contact with the Centre

To continue to develop our contacts with Staff and Educational Developers

B6 To develop and sustain effective relationships and partnerships with appropriate stakeholders throughout the community to ensure a coherent and comprehensive approach to learning and teaching which is appropriate for all involved stakeholders

B7 To develop a set of disseminated contacts throughout the community to support the delivery of and feedback on national policy objectives relating to learning and teaching

Be aware of current national priorities (eg. new method of quality assurance, Widening Participation, external examining etc) & to inform & audit our community in responding to them

B8 To provide an international outlook on learning & teaching matters in terms of importing ('observatory') and exporting ('beacon') L&T resources, materials, trends & ideas
