

From Hand Therapist to Coastal Marine Biologist

By Sue Willis

My remit

- The learning experiences and challenges I faced when starting and during my degree
- The changes and difference in learning biology as an undergraduate student compared with secondary school

The beginnings...

How scary???

Cyber-student

The highs and lows...

- Needed good IT skills from the word go
- Remote access was essential and complicated!
- OK, accessing online lecture notes is not like being there but...
- My "Super Lecturer"

Millport, Isle of Cumbrae...

Practicals, practicals and more practicals...

Tobago...

The good, the bad and the ugly...

Good = Feedback on assignments

Bad = Late timetabling

Ugly = Monotonous Powerpoint lists!!!

And finally...

The end...or is it just
the beginning!
