Centre for the Arts and Design in the Environment

- bring together and take part in cross-disciplinary research, consultancy and conferences allowing professionals to benefit from new ways of seeing and doing

- engage with local, regional and national organisations to promote arts and design in the environment for cultural, social and economic benefits

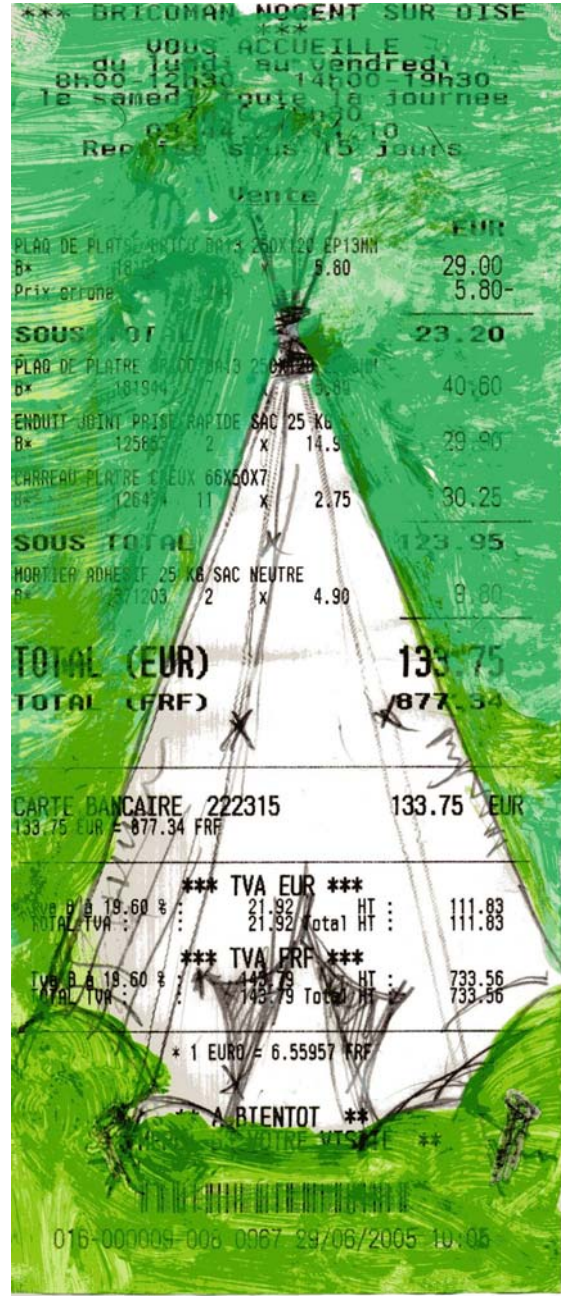

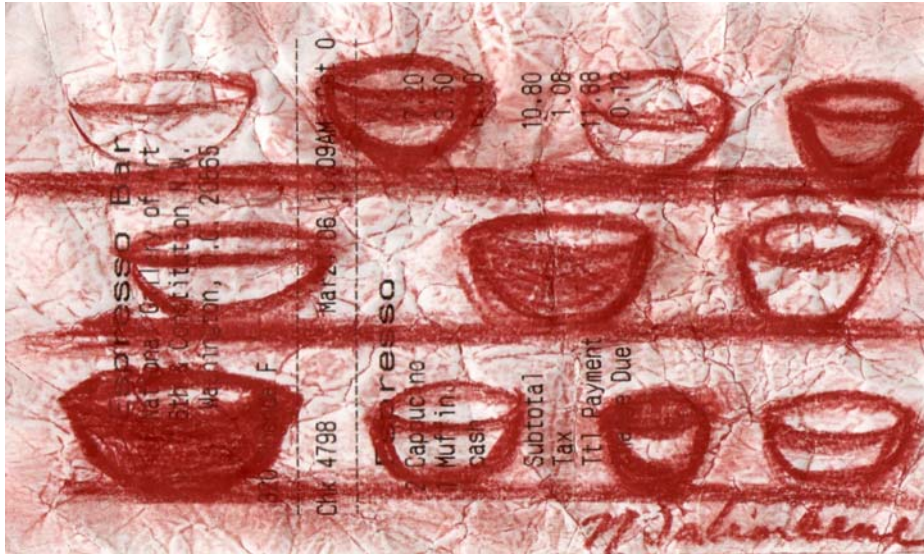

- establish a community of recent arts and design graduates who wish to develop their businesses and find ways into the creative professions

Writtle College has hosted a series of artists who came to Essex as part of an artistic exchange programme with Picardy, in France. The programme has been funded by Essex County Council.
