

Bioscience

E.T.H.I.C.S. project

(Ethics Teaching Highlighted In Contextualised Scenarios)

Collaborative project involving LTSN subject centres for:

- Health Sciences & Practice, Law, Medicine, Dentistry & Veterinary Medicine, Philosophical & Religious Studies and Psychology

Activities:

- Examination of current provision of professional and academic ethics teaching across these disciplines
- Identification and sharing of good practice, any key concerns and problems (SIG, events etc.)
- Development of cross and sub-disciplinary networks
- Dissemination of existing research & development of new research

Funding for mini-projects

- Up to £3,000 for individual projects designed to promote the use of effective learning, teaching and assessment of Ethics in bioscience and cognate disciplines
- Closing date is **Friday 28th February 2003 (12 noon)**

Collection of Contextualised scenarios (case studies)

- Working examples of applied ethical problems used in teaching to highlight relevant ethical principles
