

Macintosh Plus Holiday Ornament

by MacStudio

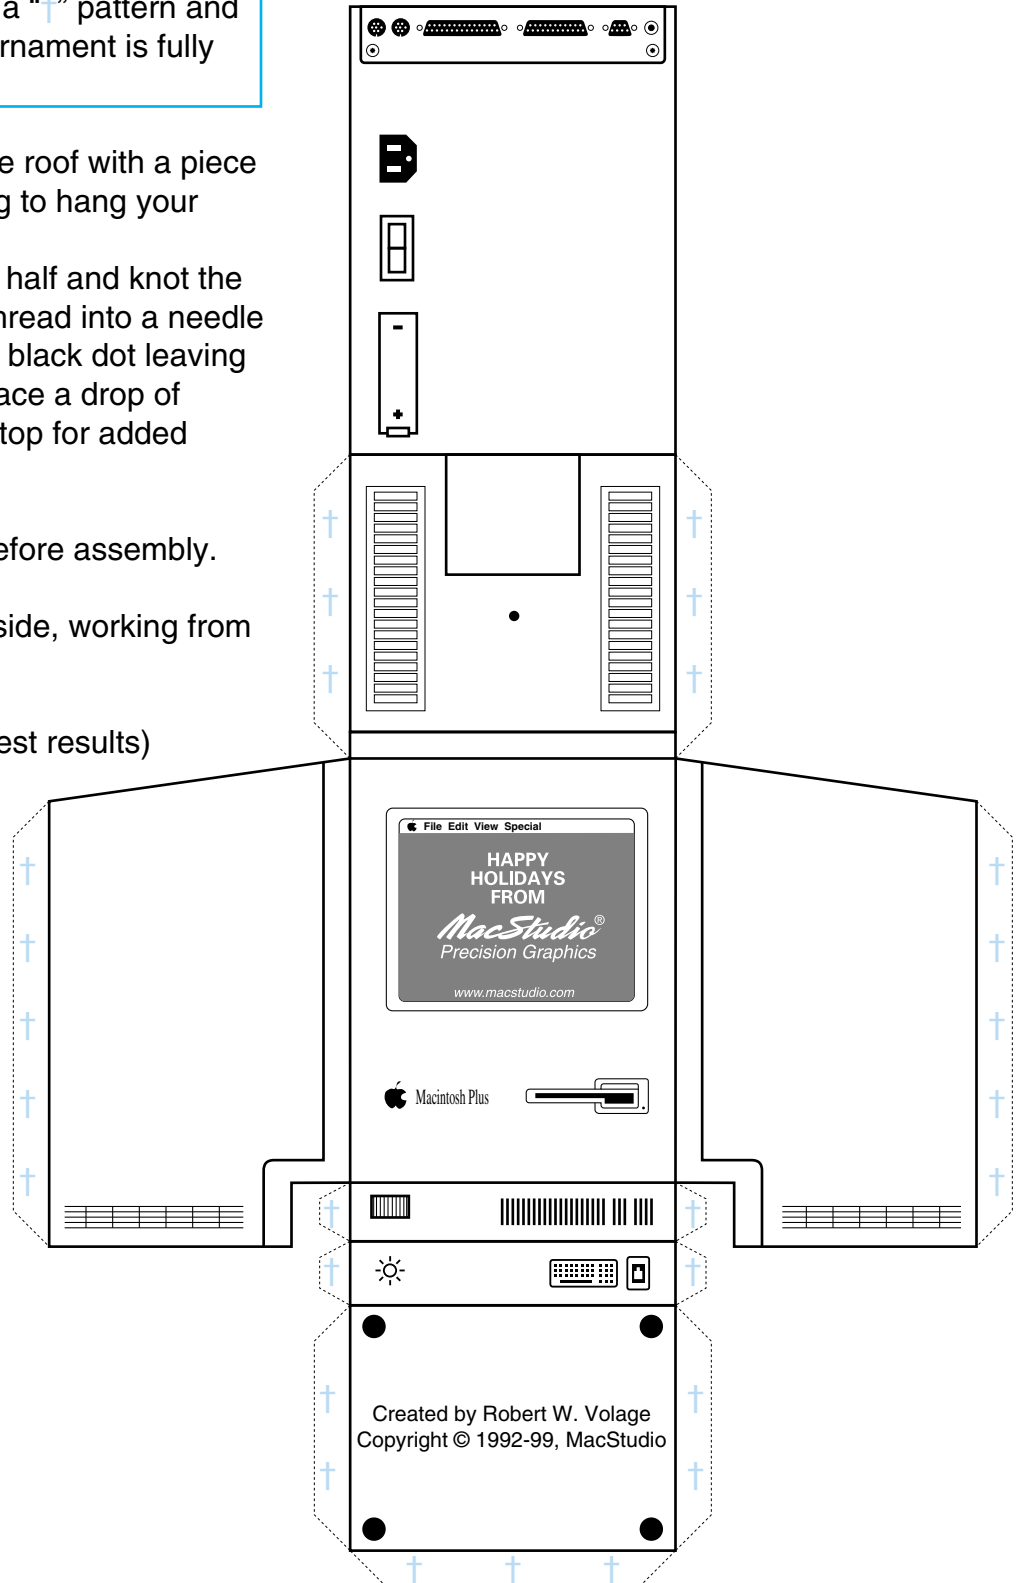

1. Print this page & cut out ornament in one piece.

All tabs are marked with a “+” pattern and will not show when the ornament is fully assembled.

2. Reinforce the inside of the roof with a piece of tape if you are planning to hang your ornament.
Fold a length of thread in half and knot the ends, see figure below, thread into a needle and pierce the roof at the black dot leaving the knot on the inside. Place a drop of glue over knot inside the top for added holding power.
3. Crease all folding lines before assembly.
4. Glue all “+” tabs to the inside, working from the top to the base.

(use Elmer's® glue for best results)
