Print Screen

A product of American Systems

Contents

Print Screen is the original and simplest screen printing and screen capture program. Print Screen can capture, save and/or print the contents of the entire screen to the printer when the 'Print Screen' key is pressed.

If it's on your screen, you can print it with Print Screen.

Product Support

Product Support

American Systems provides user support to registered versions via mail, and/or telephone.

American Systems will answer questions and resolve serious bugs for the first three months after registration. For problems involving a specific hardware or software environment or feature, we may choose not to modify the program. In that case, if a problem is reported within three months after purchase, then we shall offer to refund the user's purchase price.

If a bug prevents you from evaluating Print Screen Deluxe during the first 30 days (prior to purchase), American Systems will attempt to assist but is not under obligation to resolve issues beyond our control.

Please share the evaluation version of Print Screen Deluxe with others for the purpose of evaluation as long as it is unaltered and distributed in its entirety.

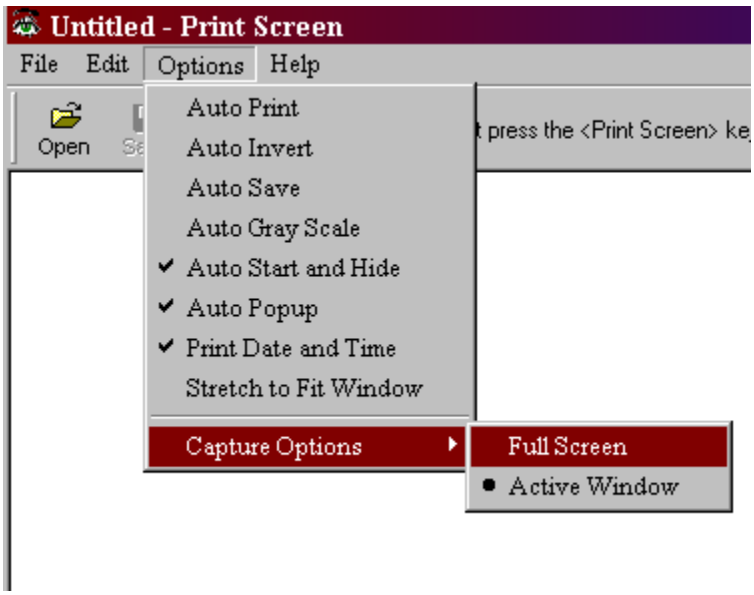
How to Use Print Screen
Ordering Print Screen

How do I Capture a screen?

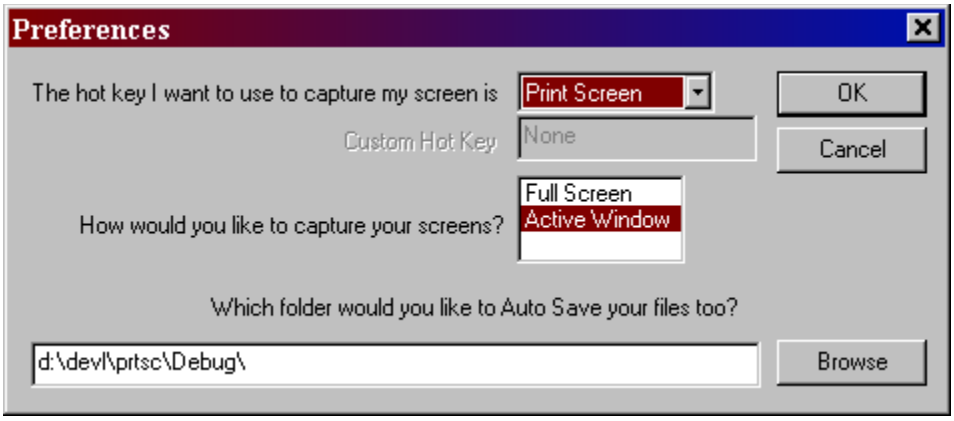
With Print Screen you can capture any of the following

- The entire screen
- The current active window

You can select capture options in 2 places. Either in the options menu (see below)



Or in the File..Preferencs window (see below)



If you would like to **capture the entire screen** then do the following.

1. Make sure that you have the 'Options'..'Capture Options'..'Full Screen' option checked.

2. Capture the entire screen by hitting the screen capture hot key (default is **<PrintScreen>).**

3. A copy of the entire screen will appear in the Print Screen Deluxe window. You can then print, save, email or enhance it using the 'Special Effects' menu provided by Print Screen Deluxe.

If you would like to **capture the current active window** then do the following.

1. Make sure that you have the 'Options'..'Capture Options'..'Active Window' option checked.

2. Capture the entire window by hitting the screen capture hot key (default is **<PrintScreen>).**

3. A copy of the active window will appear in the Print Screen Deluxe window. You can then print, save, email or enhance it using the 'Special Effects' menu provided by Print Screen Deluxe.

How do I automatically print my screen capture?

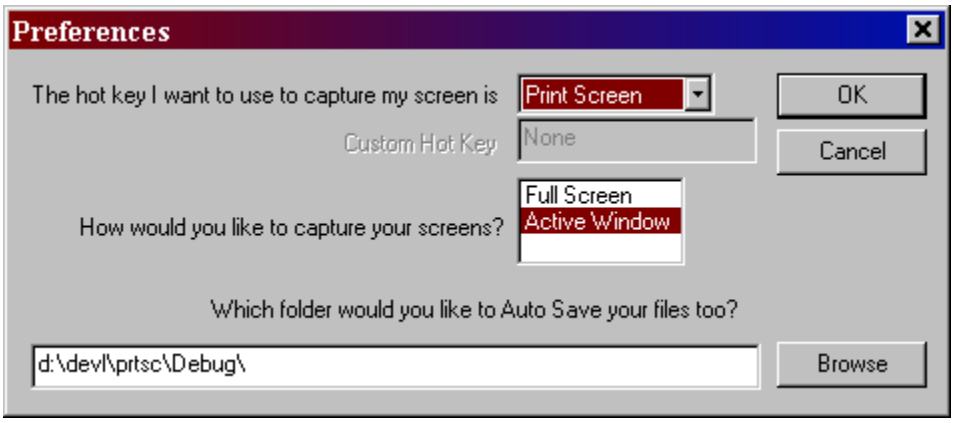
1. Make sure that you have the 'Options'..'Auto Print' option checked. If it is not, then click on it. If you look at it again it will be checked.

2. Now perform a screen capture by hitting the hot key (default is **<PrintScreen>**)

3. When the capture is complete, watch your printer. Your screen capture will print on your printer.

How do I change the hot key that initiates the screen capture?

1. Click the 'File'..'Preferences' menu command. The window below will appear.



2. Look at the top. The default hot key is <PrintScreen>. If you do not want to use the <Print Screen> key, click the drop down menu and click Custom. Then go to the Custom Hot Key field and type the hot key you want to use.

How do I run Print Screen automatically when Windows starts?

Make sure that the 'Options'..'Auto Start and Hide' option is checked. If not, click on it and a check will appear. The next time you start Windows, Print Screen will start with the icon in the system tray (clock window on the task bar).

How do I open an existing image file to preview or print?

You can open a file in 1 of 2 ways.

1. Drag a bmp or jpg file onto the Print Screen window

or

2. Click the 'File'..'Open' menu command and use the window that appears to select the file you want. You can change the type of file you are looking for by clicking on the 'Files of Type' list.

How do I email an image?

Note: The Send Mail output option is only supported if you have a MAPI mail client installed (for example, Microsoft Exchange).

Once you open an image file or capture an image, click on the 'File'..'Send' menu command. Your mail system create an email message containing your image and allow you to further edit your email. At that point you can send, file, or do whatever you wish with your email.

Please note that once you click on the 'File'..'Send' command your email system takes over. Print Screen Deluxe has no control over what happens in your email system.

How do I automatically save my screen capture to a file?

Make sure you have the 'Options'..'Auto Save' option checked.

This automaticaly saves the screen print to a .JPG file when the screen capture hot key (default is **<PrintScreen>**) is pressed.

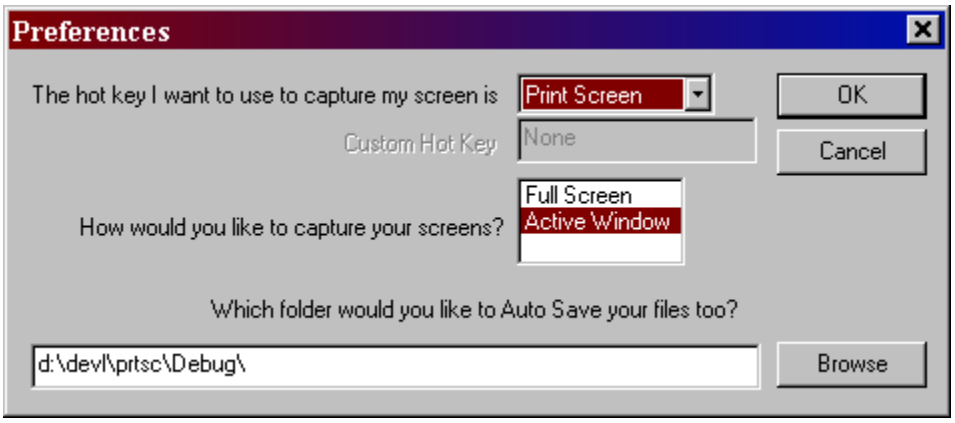
The program can either

a)Generate a file name like PS000010.JPG. The first file name generated is PS000000.JPG. The file name of each screen print that you want automatically saved after that will be incremented by one, for example, PS000001.JPG, then PS000002.JPG...

or

b)prompt you for a filename.

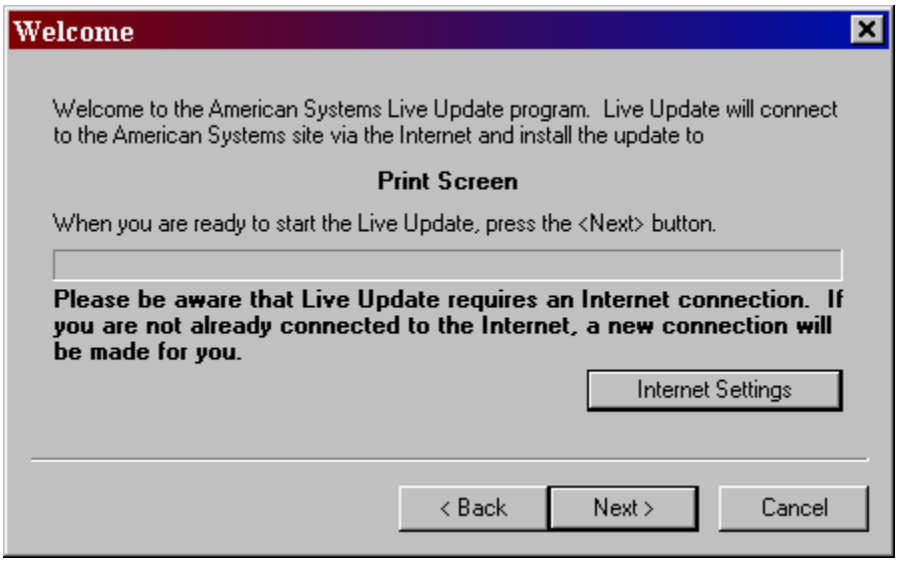
You can set this option in the File..Preferences window. See below.



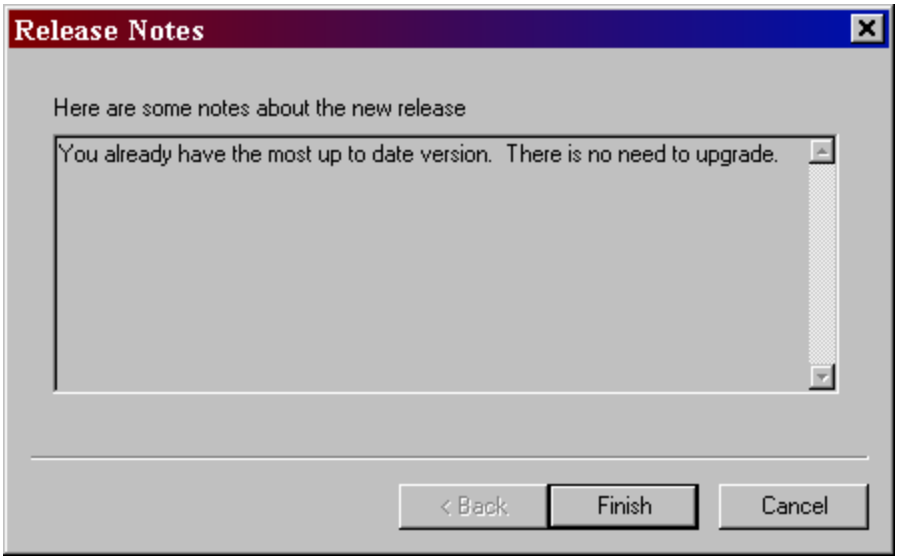
This feature is very handy if you are documenting a program or system. You can move through the program you are documenting, screen by screen, pressing the screen capture hot key (default is **<PrintScreen>**), saving them to files.

How do I get the latest version of Print Screen?

Print Screen Deluxe has a really neat feature built in called "Live Update".



Live Update will connect to the American Systems web site using your Internet connection and retrieve the latest upgrade and install it for you. If you have the latest version you will see a message similar to the following.



Otherwise you will see a screen with the features the new upgrade adds. Just follow the instructions on the screen and install the new version.
