

IBM and Red Hat have joined forces to offer the convenience of purchasing Red Hat Enterprise Linux with an IBM @server xSeries or BladeCenter server. Together, Red Hat Enterprise Linux and IBM xSeries servers deliver the reliability, availability, scalability and manageability required for enterprise-inspired IT operations. Customers can choose from three Red Hat Enterprise Linux products, each available with or without Red Hat support. Customers may also purchase IBM Support Line or IBM ServicePac. As a result, customers have the flexibility to deploy the hardware, software and support combination that best meets their needs.

Red Hat/IBM xSeries Features

- IBM and Red Hat enable enterprise-strength Linux solutions for the full range of IBM @server xSeries platforms.
- xSeries servers, based on IBM Enterprise X-Architecture, deliver mainframe-class performance, availability and scalability features in cost-effective Intel processor-based servers.
- Red Hat Enterprise Linux includes Red Hat Network for patch/security management and software delivery
- The offerings are also available to IBM resellers via PartnerChoice.
- IBM and Red Hat have a multi-year alliance that includes services and expanded support for software and servers, providing broad Linux support for enterprise customers worldwide.

Red Hat/IBM xSeries Value Proposition

- Gives customers the confidence that comes from working with two leaders in the Linux marketplace.
- Delivers the reliability made possible by the enterprise-class features of Red Hat Enterprise Linux combined with those of xSeries servers.
- Saves time for IBM Business Partners and customers through one-stop shopping.
- Gives IBM resellers and customers the widest choice of hardware, software, and support combinations available in the marketplace for Red Hat Enterprise Linux.

Who can benefit from Red Hat Linux Enterprise Server and IBM xSeries?

- Customers who want a partner that has a strong commitment to Linux-based solutions and a clear, long-range vision for its Linux products.
- Customers who want a vendor with a worldwide Linux consulting, service and support infrastructure already in place.
- Customers who want to reduce costs without sacrificing enterprise-class power, availability and scalability.
- Customers who want to reduce the number of servers without degrading performance, even under peak loads.
- Customers who want to simplify the management of their increasingly complex computing infrastructures so they can reduce IT staffing costs and ease the burden of finding qualified personnel.
