New hardware category: POWER
The IBM Middleware Available on Linux matrix now includes a new inclusive hardware category known as POWER. Linux on POWER includes support for Linux on System i, Linux on System p, Linux on OpenPOWER (System p), and Linux on JS20 blades. Can't find the product that you are looking for under System p or System i? Check under the POWER hardware category. Many products have been reassigned to POWER.

Use the drop-down list below to search the matrix by IBM System and by IBM Brand. You can also view the entire matrix.

Using the IBM Middleware Available on Linux Matrix

The Basics

Use this matrix to find IBM Middleware Available on Linux by IBM Hardware and then by IBM Brand.

Product Name

Where available, the product name is a link to the product's external IBM Web site.

Release or Version

Sometimes several *releases* are available for a product.
The most recent *version* is listed first followed by later versions.

IBM Hardware

Important! Check the availability by IBM Hardware.

Kernel and Distribution

This information is obtained from the software announcements or release information. In the **Data Management** column, if only the kernel levels are given, a distribution that supports that kernel level should supply support. The **Kernel and Distribution** column is good starting place for operating system requirements; an IT specialist can help determine the software and hardware requirements for each IBM Middleware product.

	Information Source	A link to the software announcement or release information and a sample one-year license and software maintenance Passport Advantage product number is provided to assist with ordering. IBM offers a variety of licensing methods, contact your IBM sales representative for the appropriate product number for your needs.
